GARP Sustainability and Climate Risk Sample Questions (Q86-Q91):

NEW QUESTION # 86

A natural gas production company makes a 2040 net-zero commitment. Before publicly announcing the commitment, the company sustainability team verifies the credibility and transparency of the company net-zero commitment to minimize any greenwashing claims. What action will the team most likely take to strengthen the credibility of the company net-zero commitment?

- A. Offset future GHG emissions that cannot be avoided with carbon credits.
- B. Utilize existing internal audit processes in the absence of external audit verification providers.
- C. Develop interim targets and implement third-party verification aligned with established standards.
- D. Develop and promote a comprehensive media campaign announcing the company net-zero commitment.

Answer: C

NEW QUESTION # 87

The climate risk team at a global bank works on a sustainability and climate risk report for a forthcoming company strategy meeting. The meeting will focus on bank goals to achieve net zero GHG emissions by 2050. Bank leaders will discuss potential risk exposures the bank may face, as well as possible financial systemic effects. Which of the following is an example of how systemic climate risk can translate into liquidity risk for the bank?

- A. Sea level rise causes coastal property prices to decrease, which leads to real estate losses for the bank.
- B. Sector-wide asset stranding for the financial sector increases due to climate pressures, which affects bank revenue and profits as cash flow decreases.
- C. High level of deposit withdrawals from households and corporations after a hurricane severely affects a country.
- D. Insurers significantly increase premiums due to climate-related risks and leave the bank without coverage, amplifying risks to financial stability.

Answer: C

NEW QUESTION # 88

The board of directors of a growing asset management firm recommends the firm expand its ERM framework to incorporate climate risks. In response, the risk team references the COSO ERM framework for applying ESG-related risks to develop and propose a strategy to implement climate risk into the various ERM components.

How will the risk team modify the existing strategy component of the company's ERM framework?

- A. Evaluate the full business context on climate risk and understand how climate change affects the inputs, business activities, and outputs.
- B. Factor in climate risk impacts when reassessing risks after considerable business changes.
- C. Gather and use scores and physical and transition risk exposure data to conduct various analyses to determine if excess risk would exist in an unfavorable climate scenario.
- D. Rank climate risks by likelihood of occurrence and severity to examine resulting outcomes and how the firm can mitigate these risks.

Answer: A

NEW QUESTION # 89

A risk consultant begins an engagement for a development agency. The engagement focuses on identifying policies that address climate change impacts. The consultant drafts an action plan that incorporates a roadmap of effective climate policies to present to senior directors at a strategic meeting. The plan includes an introductory summary of the backdrop and effectiveness of historical and current climate policies.

How should the consultant describe the context of climate policy evolution?

- A. Evidence from the past two decades has accumulated that warming levels will lead to tipping points, supporting an international consensus and policies around a goal of limiting warming to 2.5°C.
- B. The first attempts to create international climate policies and accords focused on emissions reductions occurred in the 1970s, as anthropogenic GHG emissions were globally recognized as fact by scientists.
- C. As global mean annual temperatures rose significantly in the 1980s, scientific consensus around human influence on climate solidified, leading to the formation of the IPCC.
- D. After the World Climate Summit, global climate policy legally required countries responsible for the greatest share of cumulative emissions to cut back emissions the most.

Answer: C

NEW QUESTION # 90

A mid-size bank in Australia will implement scenario analysis as part of a risk assessment to measure climate risk. A risk manager in charge of this project reviews current practices among peers worldwide.

To align with common and well-established practices of financial firms, how will the risk manager implement scenario analysis to assess climate risk?

- A. Examine portfolio-level exposures in various climate outcomes
- B. Provide ex-ante climate risk analysis to national regulators
- C. Compare the likelihood of physical and transition risks
- D. Create inclusionary criteria for investments based on climate risk

Answer: A

NEW QUESTION # 91

.....
