## Newest Real AP-212 Exam Answers Help You to Get Acquainted with Real AP-212 Exam Simulation

If you start to prepare for the AP-212 exam from books, then you will find that the content is too broad for you to cope with the exam questions. So, we just pick out the most important knowledge to learn. Through large numbers of practices, you will soon master the core knowledge of the AP-212 Exam. It is important to review the questions you always choose mistakenly. You should concentrate on finishing all exercises once you are determined to pass the AP-212 exam. And you will pass for sure as long as you study with our AP-212 study guide carefully.

## Salesforce Loyalty Management Accredited Professional Sample Questions

## (Q76-Q81):

### NEW QUESTION # 76

A company is designing a new Loyalty Program to reward its members based on purchases and short-term and long-term engagement with the program.

Which two types of currency does Salesforce Loyalty Management offer out-of-the-box that can be configured to accomplish the company's Loyalty Program objectives?

- A. Fixed Model and Qualifying Points
- B. Fixed Model and Activity Model
- **C. Non-Qualifying Points and Qualifying Points**
- D. Non-Qualifying Points and Activity Points

**Answer: C**

Explanation:

Salesforce Loyalty Management offers two types of currency out-of-the-box that can be configured to accomplish the company's objectives for rewarding members based on purchases and engagement:

\* Non-Qualifying Points and Qualifying Points (B): Non-Qualifying Points are typically used for

\* redemption purposes, allowing members to redeem these points for rewards or benefits. Qualifying Points, on the other hand, are often used to determine a member's tier or status within the loyalty program, often based on their purchases or engagement activities.

Fixed Model and Activity Model (option A), Activity Points (option C), and Fixed Model in combination with Qualifying Points

(option D) are not types of currency offered by Salesforce Loyalty Management. The system specifically uses Non-Qualifying and Qualifying Points to differentiate between points that contribute to tier status and those available for redemption.

Salesforce documentation on Loyalty Management would detail the configuration and use of these currencies within a loyalty program, including how they can be tailored to meet specific program objectives.

### NEW QUESTION # 77

Northern Trail, outfitters (NTO) needs to process tier assessment rules on its member's anniversary date NTO wants to set up a Data Process Engine that transforms the data that is available in Salesforce and writes back the transformation results as new or updated records.

Which Kind of permission Set is required to enable the Data Processing Engine definitions?

- A. Loyalty Analytics admin
- B. Rule Engine Designer
- **C. Data Pipelines Base User**
- D. CLA Analytics Base Admin

**Answer: C**

Explanation:

To enable the Data Processing Engine for processing tier assessment rules on members' anniversary dates, the required permission set is:

\* Data Pipelines Base User (B): This permission set grants the necessary access to configure and manage Data Processing Engine definitions, allowing for the transformation of Salesforce data and the writing back of transformation results as new or updated records. This capability is crucial for automating tier assessments and other data-intensive processes within Salesforce Loyalty Management.

Options A (CLA Analytics Base Admin), C (Rule Engine Designer), and D (Loyalty Analytics Admin) do not specifically pertain to enabling the Data Processing Engine for tier assessment and other data processing tasks within Loyalty Management.

Salesforce documentation on Loyalty Management and Data Processing Engine would provide insights into the required permissions and best practices for setting up and managing data transformations and tier assessments within a loyalty program.

### NEW QUESTION # 78

The Loyalty Administrator for Northern Trail Outfitters (NTO) Insider program defines tier groups - Status Tier Group with a Fixed Model and Period of one year. The three tiers are defined - Silver (base), Gold (next tier), and Platinum (the highest tier).

Qualifying Points reset date is set at December 31,2022, with a frequency of one year.

Extend Expiration for this tier group is Qualifying Points Reset Date.

A member joins NTO Insider in the Silver tier and, after a year of engagement, gets upgraded to the Gold tier on March 16, 2023.

Which date would be the new Expiry date for this member after the tier is upgraded to Gold?

- A. March 16,2024
- B. March 31, 2024
- **C. December 31,2024**
- D. December 31. 2023

**Answer: C**

Explanation:

For a member who joins the NTO Insider program in the Silver tier and gets upgraded to the Gold tier on March 16, 2023, the new expiry date after the tier upgrade would be December 31, 2024 (C). This is because the tier group is defined with a Fixed Model and a Period of one year, with the Qualifying Points reset date set at December 31, 2022, and a frequency of one year. The Extend Expiration setting being tied to the Qualifying Points Reset Date means that regardless of when the tier upgrade occurs within the year, the expiration of the new tier status aligns with the annual reset date, extending to the end of the following reset period, which would be December 31, 2024.

This approach ensures that members who achieve a higher tier partway through the year enjoy the benefits of that tier for the remainder of the current year plus the entire next year, providing a full year's benefit from the point of the annual reset.

Salesforce documentation on Loyalty Management would outline the functionality and configuration options for tier groups, tier upgrades, and expiration settings, guiding administrators on setting these up to meet the program's strategic objectives and ensure clarity and fairness for members.

#### NEW QUESTION # 79

A member reaches out to the Member Services team regarding points that have expired and requests to restore them. The Loyalty program has a fixed model expiration for non-qualifying points.

How should the Member Services Agent restore the expired points and also set them to expire in the next two months?

- A. Edit the Loyalty Member Currency record to restore the Points Balance and set the 'NextExpirationDate' field to two months from the current date
- B. Edit the 'Credit' ledgers corresponding to the points that expired and extend the expiration date to two months from the current date
- C. Delete the transaction journal that expired the points and re-run the expiration Data Processing Engine job after two months
- **D. Use 'Adjust Points' action on Loyalty Program Member page to credit points and select the Points Expiration Date as two months from the current date**

**Answer: D**

Explanation:

To restore expired points for a member in a Loyalty program with a fixed model expiration for non-qualifying points and set them to expire in the next two months, the Member Services Agent should:

\* Use 'Adjust Points' action on Loyalty Program Member page to credit points and select the Points Expiration Date as two months from the current date (B): This action allows for the direct adjustment of the member's points balance, including the ability to specify a new expiration date for the credited points. It's a straightforward and effective way to restore expired points and set a new expiration date, aligning with the member's request.

Deleting the transaction journal that expired the points (option A), editing the 'Credit' ledgers (option C), or editing the Loyalty Member Currency record (option D) are not standard practices for restoring expired points and setting a new expiration date in Salesforce Loyalty Management.

Salesforce documentation on Loyalty Management would detail the process for adjusting points, including how to handle requests for restoring expired points and setting new expiration dates, ensuring member satisfaction and program integrity.

#### NEW QUESTION # 80

Northern Trail Outfitters wants to show member information in its member portal hosted outside of Salesforce.

What is a prerequisite for using Loyalty APIs to fetch the member information?

- A. Create custom objects in Loyalty
- B. Create customer integration code
- **C. Create a Connected App in Platform**
- D. Create Data Processing jobs

**Answer: C**

Explanation:

For Northern Trail Outfitters to display member information in its external member portal, a crucial prerequisite is the creation of a Connected App in Salesforce Platform. This Connected App facilitates secure API access to Salesforce data, including Loyalty Management information, by providing an authentication and authorization framework.

By setting up a Connected App, Northern Trail Outfitters can establish a secure connection between its external member portal and Salesforce, enabling the retrieval of member information through Loyalty APIs.

This setup ensures that the external portal can access up-to-date loyalty data, such as member points, tier status, and transaction history, in a secure and controlled manner, enhancing the member experience outside of Salesforce.

## NEW QUESTION # 81

.....

Our experts have great familiarity with AP-212 real exam in this area. With passing rate up to 98 to 100 percent, we promise the profession of them and infallibility of our AP-212 practice materials. So you won't be pestered with the difficulties of the exam any more. What is more, our AP-212 Exam Dumps can realize your potentiality greatly. Unlike some irresponsible companies who churn out some AP-212 study guide, we are looking forward to cooperate fervently.
