Questions Pass for sure**

Visit [Lead2PassExam](#) and find out the best features of updated C_ACDET_2506 exam dumps that is available in three user-friendly formats. We guarantee that you will be able to ace the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite C_ACDET_2506 examination on the first attempt by studying with our actual SAP C_ACDET_2506 exam questions.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	<ul style="list-style-type: none"> Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 3	<ul style="list-style-type: none"> Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Reliable C_ACDET_2506 Technical Training Offer You The Best Certification Questions | SAP SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite C_ACDET_2506 exam dumps are available in an eBook and software format. Many people get burdened when they hear of preparing for a SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite C_ACDET_2506 examination with software. SAP C_ACDET_2506 Practice Exam software is easy to use. You don't need to have prior knowledge or training using our C_ACDET_2506 exam questions. SAP C_ACDET_2506 exam dumps are user-friendly interfaces.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q51-Q56):

NEW QUESTION # 51

Users are able to publish a contract workspace without populating the Supplier field. What action can be performed on the Supplier field to force population before publishing?

- A. Enable Required
- **B. Enable Require value before publish**
- C. Configure a validity condition
- D. Configure a visibility condition

Answer: B

Explanation:

SAP Ariba provides a specific property in the Advanced tab called "Require value before publish", which ensures that a field must be populated prior to the contract workspace being published. Enabling this option on the Supplier field enforces this mandatory behavior during the publish action. The standard "Required" checkbox only enforces field completion in the UI during data entry but does not prevent publishing if the field is empty. Visibility conditions control whether the field is displayed, not whether it is required at publish. Validity conditions enforce value correctness but not presence at publish time. This feature enhances data completeness at critical lifecycle points.

NEW QUESTION # 52

Which Activate phase is tied to performing configurations in your SAP Ariba Strategic Sourcing suite solution?

- A. Setup
- **B. Realize**
- C. Configure
- D. Deploy

Answer: B

Explanation:

The Realize phase is where the core configuration activities happen. During Realize, the project team sets up system parameters, creates templates, defines master data fields, and configures business processes in the SAP Ariba Strategic Sourcing suite. This phase includes building, unit testing, and preparing the system for user acceptance testing. Deploy is focused on cutover and go-live, while Configure and Setup are not formal SAP Activate phases for Ariba.

NEW QUESTION # 53

While working on editing a field for a customer, you notice that "Editable in full Contract Amendment" is not an option available in the advanced tab of field configuration.

What is likely the cause for this behavior? Note: There are 2 correct answers to this question.

- A. The field you are customizing is standard and therefore cannot be changed.
- **B. The contract must be in an amendment state for this option to be visible in customizing**
- **C. The field you are customizing is not in the contract workspace or request classes.**
- D. A customization is in flight and needs to be cleared and reset prior to making this change.

Answer: B,C

NEW QUESTION # 54

Which of the following data elements must be manually loaded into the Production environment after full configuration migration is completed using the Intelligent Configuration Manager (ICM)? (Select 2 correct answers)

- A. Enumerations
- B. Relation and Relation Entries
- C. User to Group Mapping
- D. Units of Measure

Answer: A,B

Explanation:

After migrating configurations using ICM, Enumerations and Relation entries require manual loading into Production because they are not included in automatic migration bundles. Enumerations provide picklist values, while Relations define dependencies between fields. Units of Measure are typically part of standard configuration or migrated automatically. User to Group Mapping is managed separately through provisioning or identity management tools, not via ICM. Manual loading of these data elements ensures data integrity and avoids missing references.

NEW QUESTION # 55

How can you create a field label with Italics?

- A. By using standard HTML formatting like `<i>label</i>` can be added to the field label
- B. By selecting the option "Italic label"
- C. By marking the text in the field and selecting Ctrl-I
- D. Formatting of a field label is not possible
- E. Find the correct folder

Answer: A

Explanation:

In SAP Ariba, field labels themselves do not support rich text formatting directly in the UI, meaning you cannot use Ctrl-I or a specific "Italic label" toggle to style the label. However, SAP allows the use of basic HTML tags, including `<i>` for italics, in help tip text or validation/error message text associated with fields. By embedding HTML tags like `<i>...</i>`, administrators can add italicized text in these auxiliary field descriptions, enhancing clarity and user guidance.

This is because SAP Ariba's UI rendering engine processes simple HTML in certain field-related text areas but treats field labels as plain text for consistency and localization reasons.

Therefore, the correct method for italicizing field-related text is using HTML tags in Help Tips or validation messages, not in the label itself.

This behavior is documented in SAP Ariba configuration best practices, emphasizing limited HTML support to maintain UI integrity and accessibility standards.

NEW QUESTION # 56

.....

Everyone is not willing to fall behind, but very few people take the initiative to change their situation. Take time to make a change and you will surely do it. Our C_ACDET_2506 actual test guide can give you some help. Our company aims to help ease the pressure on you to prepare for the C_ACDET_2506 exam and eventually get a certificate. Obtaining a certificate is equivalent to having a promising future and good professional development. Our C_ACDET_2506 Study Materials have a good reputation in the international community and the quality of our C_ACDET_2506 study guide is guaranteed.
