Reliable NCA-6.10 Exam Cost, NCA-6.10 Trustworthy Exam Torrent

In the world of industry, NCA-6.10 certification is the key to a successful career. If you have achieved credential such as NCA-6.10 then it means a bright future is waiting for you. Avail the opportunity of NCA-6.10 dump at RealValidExam.com that helps you in achieving good scores in the exam. Due to these innovative methodologies students get help online. The NCA-6.10 Exam Questions Answers PDF is very effective and greatly helpful in increasing the skills of students. They can easily cover the exam topics with more practice due to the unique set of NCA-6.10 exam dump. The NCA-6.10 certification learning is getting popular with the passage of time.

Nutanix Certified Associate v6.10 Sample Questions (Q10-Q15):

NEW QUESTION # 10

An administrator needs to implement a disaster recovery plan. The company has two sites, each with its own Nutanix AHV cluster. Latency between the sites is 30ms.

Which built-in functionality in Prism Element could the administrator use to enable disaster recovery between the two clusters?

- A. Data Protection
- B. Recovery Plan
- C. Protection Policies
- D. Metro Cluster

Answer: D

NEW QUESTION # 11

When multiple Alert policies are applied to an entity, which will take precedence?

- A. Policy are applied to an entity type in a cluster.
- B. Policy are applied to all entities of an entity type.
- C. Policy are applied to an entity type in a category.
- **D. Policy are applied to a specific entity type.**

Answer: D

Explanation:

When multiple alert policies are applied to an entity, Nutanix uses a hierarchical approach. Policies applied to an entity type within a category take precedence. For example:

* If a category (e.g., "Production") has policies applied to entities like VMs, and the entity matches that category, the category-specific policy will override general policies.

* This prioritization allows administrators to fine-tune alert policies for specific workloads or environments.

NEW QUESTION # 12

What is the purpose of the OpLog?

- A. Persistent data storage
- B. Global metadata
- **C. Persistent write buffer**
- D. Dynamic read cache

Answer: C

NEW QUESTION # 13

Which Nutanix Disaster Recovery component or feature provides the best Recovery Time Objective (RTO)?

- **A. Metro Availability**
- B. Availability Zone
- C. NearSync
- D. Async

Answer: A

Explanation:

Nutanix Metro Availability provides the best Recovery Time Objective (RTO) because it enables synchronous replication between two sites. In the event of a failure at one site, VMs can be instantly restarted on the other site with minimal disruption. This setup ensures zero data loss and near-instantaneous recovery.

* A. Async: Provides high RPO (Recovery Point Objective) but has a longer RTO compared to synchronous replication methods.

* B. Availability Zone: This term refers to a general site setup, not specific to recovery objectives.

* C. Metro Availability: Correct, as it uses synchronous replication for near-zero RTO.

* D. NearSync: Provides better RPO than Async but does not match the RTO of Metro Availability.
