CFA Institute Sustainable-Investing Exam Syllabus Topics:

Topic	Details
Topic 1	• Introduction to ESG Investing: This section of the exam measures skills of Investment Analysts and Portfolio Managers and covers the foundational concepts of environmental, social, and governance (ESG) investing. It focuses on defining ESG investment, different responsible investment approaches, sustainability concepts, benefits and challenges of ESG integration, and key global initiatives in ESG.
Topic 2	• Environmental Factors: This section measures skills of Environmental Analysts and Sustainability Specialists by exploring environmental issues such as climate change, resource management, biodiversity, and pollution. It covers systematic relationships, material impacts, and methodologies for environmental analysis at country, sector, and company levels.
Topic 3	• ESG Analysis, Valuation, and Integration: This domain measures the capabilities of Portfolio Managers and Equity Analysts to integrate ESG factors into investment decision-making. It addresses challenges of integration, the impact on industry and company performance, security valuation, and approaches to ESG data analysis across asset classes.
Topic 4	• Integrated Portfolio Construction and Management: Targeting Portfolio Managers and Investment Strategists, this section discusses ESG integration into portfolio construction. It covers ESG screening approaches, benchmarking, the effect on risk-return profiles, and managing ESG portfolios across various asset classes.

Now we are willing to introduce the Sustainable-Investing Study Materials from our company to you in order to let you have a deep understanding of our study materials. We believe that you will benefit a lot from our Sustainable-Investing study materials.

CFA Institute Sustainable Investing Certificate (CFA-SIC) Exam Sample Questions (Q344-Q349):

NEW QUESTION # 344
In the European Union, publicly listed firms are obliged to change auditors at least every:

- A. 5 years
- B. 20 years
- C. 10 years

Answer: C

Explanation:
In the European Union, publicly listed firms are required to change their auditors at least every 10 years. This regulation is part of the EU's statutory audit reform, which aims to enhance the independence of auditors and the quality of audits. The rotation requirement is intended toprevent long-term relationships between auditors and clients that could compromise the auditor's objectivity.
Regulatory requirement: The EU Audit Regulation (Regulation (EU) No 537/2014) mandates that public-interest entities, including publicly listed firms, must rotate their statutory auditors or audit firms after a maximum of 10 years.
Objective: This measure is designed to reduce the risk of conflicts of interest and ensure a fresh perspective on the firm's financial statements.

NEW QUESTION # 346
According to the "Shades of Green" methodology developed by the Center for International Climate Research (CICERO), which of the following colors best categorizes a green bond that reduces emissions in the near term without contributing to climate-resilient long-term solutions?

- A. Yellow
- B. Medium Green
- C. Light Green

Answer: C

Explanation:
Light Greenbonds supportshort-term emissions reductionsbut do not contribute significantly tolong-term climate resilience.
* Medium Green (C) supports more sustainable, long-term transitions.
* Yellow (A) is not a recognized CICERO category.

NEW QUESTION # 347
A materiality assessment to identify ESG issues impacting a company's financial performance is most likely measured in terms of:

- A. likelihood only.
- B. magnitude of impact only.
- C. both likelihood and magnitude of impact.

Answer: C

Explanation:
A materiality assessment to identify ESG issues impacting a company's financial performance is most effectively measured in terms of both likelihood and magnitude of impact. This approach provides a comprehensive view of potential risks and opportunities by evaluating how likely anissue is to occur and the extent of its potential impact on financial performance. This dual assessment helps in prioritizing ESG issues that are both probable and significant in their effects.

NEW QUESTION # 348
Which of the following is an environmental megatrend that has a severe social impact?

- A. Mass migration
- B. Urbanization
- C. Globalization

Answer: A

Explanation:
Mass migration is an environmental megatrend that has a severe social impact. Environmental changes, such as climate change, natural disasters, and resource depletion, can force large populations to migrate, leading to significant social consequences.
Displacement and Refugees: Environmental degradation and climate-related events can displace millions of people, creating large numbers of refugees and internally displaced persons. This leads to humanitarian crises and puts pressure on host communities and countries.
Social and Economic Strain: Mass migration can strain social and economic systems in both the areas people migrate from and to. It can lead to increased competition for jobs, housing, and resources, and can also cause social tensions and conflicts.
Cultural Impact: Migration can impact cultural dynamics, leading to changes in community structures and potential conflicts over cultural integration and identity. The social fabric of both sending and receiving regions can be significantly affected.
