Salesforce Advanced-Administrator Exam is a valuable certification for anyone who wants to advance their career in Salesforce administration. Salesforce Certified Advanced Administrator certification is recognized by employers as a mark of excellence in advanced Salesforce administration. It opens up new opportunities for career advancement and provides a competitive edge in the job market.

## Salesforce Certified Advanced Administrator Sample Questions (Q148-Q153):

### NEW QUESTION # 148

Cloud Kicks uses a Lightning web component to provide instructions to sales reps. An administrator needs to correct a spelling error in the displayed text in one of the Lightning web components.

What is the recommended tool to make the change?

- A. Developer Org
- B. Developer Console

- C. VisualStudio Code
- D. Salesforce Lightning Inspector

**Answer: C**

Explanation:

VisualStudio Code is a recommended tool to make the change in the displayed text in one of the Lightning web components. VisualStudio Code is an integrated development environment (IDE) that supports Salesforce development tools such as Salesforce Extensions for Visual Studio Code, Salesforce CLI, and Lightning Web Components. You can use VisualStudio Code to create, edit, debug, and deploy Lightning web components and other Salesforce metadata. To make the change in the displayed text, you need to open the HTML file of the Lightning web component in VisualStudio Code and modify the text element accordingly.

#### NEW QUESTION # 149

A user at Cloud Kicks has informed the administrator that they are unable to log in to Salesforce via multi-factor authentication. Which two areas should the administrator review to understand potential root causes?

Choose 2 answers

- A. Identity Verification History
- B. Setup Audit Trail
- C. Debug Logs
- D. Login History

**Answer: A,D**

Explanation:

Identity verification history and login history are two areas that the administrator can review to understand potential root causes of multi-factor authentication issues. Identity verification history shows the methods and results of identity verification attempts for a user, such as email verification, SMS verification, or app verification. Login history shows the status, source, and location of login attempts for a user, as well as any login errors or challenges that occurred. These two areas can help the administrator identify if the user entered the correct verification code, if the user's device or app is compatible with multi-factor authentication, or if there are any network or security issues that prevent successful verification. #### NEW QUESTION # 150

The marketing department at Universal Containers regularly changes the page layout requirements for its customer marketing objects. The VP of Marketing has asked the administrator for permission to configure only these objects. What can the administrator do to meet this request?

- A. Grant the VP of Marketing the ability log in as a user who is an administrator.
- B. Enable Marketing User permission on the user record for the VP of Marketing.
- C. Setup the VP of Marketing as a delegated administrator for the custom marketing objects.
- D. Create a custom profile with the Edit permissions on the custom marketing objects and assign to the VP of Marketing

**Answer: C**

#### NEW QUESTION # 151

In a two-step approval process where the first step is a hiring manager and second is the appropriate director, which of the following relationship types would a system administrator use to establish a relationship between the two approvers? \* (1 Point)

- A. Master detail relationship
- B. Sibling relationship
- C. Hierarchical relationship
- D. Look up relationship

**Answer: C**

### NEW QUESTION # 152

The wrong choices on the list should be improved.

A lead needs to be assigned automatically to a Sales Rep if there has been no action on the account after 10 days. And the Deal status should be set to "Stalled" after it has been approved by a Manager. Which automation processes can a system administrator use? \* (1 Point)

- A. Assignment Rule. Auto-Response Rule, Workflow Rule
- B. Validation Rule. Assignment rule. Approval Process.
- **C. Assignment Rule, Approval Process**
- D. Assignment Rule. Approval Process. Workflow Rule

**Answer: C**

### NEW QUESTION # 153

.....
