Every Identity-and-Access-Management-Architect exam candidate who has used our exam

preparation material has passed the exam with flying colors.

Salesforce Certified Identity and Access Management Architect Sample Questions (Q215-Q220):

NEW QUESTION # 215
NorthernTrail Outfitters (NTO) leverages Microsoft Active Directory (AD) for management of employee usernames, passwords, permissions, and asset access. NTO also owns a third-party single sign-on (SSO) solution. The third-party party SSO solution is used for all corporate applications, including Salesforce.
NTO has asked an architect to explore Salesforce Identity Connect for automatic provisioning and deprovisioning of users in Salesforce.
What role does identity Connect play in the outlined requirements?

- A. User Management
- B. Identity Provider
- C. Service Provider
- D. Single Sign-On

Answer: A

Explanation:
Salesforce Identity Connect is a tool that synchronizes user data between Microsoft Active Directory and Salesforce. It allows automatic provisioning and deprovisioning of users in Salesforce based on the changes made in Active Directory. Therefore, Identity Connect plays the role of user management in the outlined requirements. References: Identity Connect Implementation Guide, Identity Connect Overview

NEW QUESTION # 216
Northern Trail Outfitters (NTO) has a requirement to ensure all user logins include a single multi-factor authentication (MFA) prompt. Currently,users are allowed the choice to login with a username and password or via single sign-on against NTO's corporate Identity Provider, which includes built-in MFA.
Which configuration will meet this requirement?

- A. Create a custom login flow that enforces MFA and assign it to a permission set. Then assign the permission set to all employees.
- B. Enable "MFA for User Interface Logins" for your organization fromSetup -> Identity Verification.
- C. For all employee profiles, set the Session Level Required at Login to High Assurance and add the corporate identity provider to the High Assurance list for the org's Session Security Levels.
- D. Create and assign a permission set to all employees that includes "MFA for User Interface Logins."

Answer: B

Explanation:
Enabling "MFA for User Interface Logins" for the organization is the simplest way to ensure that all user logins include a single MFA prompt. This setting applies to both direct logins and SSO logins, and overrides any other MFA settings at the profile or permission set level. References: Enable MFA for Direct User Logins, Everything You Need to Know About MFA Auto-Enablement and Enforcement

NEW QUESTION # 217
Universal Containers (UC) has a Customer Community that uses Facebook for of authentication. UC would like to ensure that changes in the Facebook profile are 65. reflected on the appropriate Customer Community user. How can this requirement be met?

- A. Develop a scheduled job that calls out to Facebook on a nightly basis.
- B. Use the updateUser() method on the Registration Handler class.
- C. Use information in the Signed Request that is received from Facebook.
- D. Use SAML Just-In-Time Provisioning between Facebook and Salesforce.

Answer: B

NEW QUESTION # 218

Universal Containers wants to implement Single Sign-on for a Salesforce org using an external Identity Provider and corporate identity store.

What type of authentication flow is required to support deep linking'

- A. Identity-Provider-initiated SSO
- B. Web Server OAuth SSO flow
- C. Service-Provider-Initiated SSO
- D. StartURL on Identity Provider

Answer: C

NEW QUESTION # 219

Northern Trail Outfitters (NTO) uses the Customer 360 Platform implemented on Salesforce Experience Cloud. The development team in charge has learned of a contactless user feature, which can reduce the overhead of managing customers and partners by creating users without contact information.

What is the potential impact to the architecture if NTO decides to implement this feature?

- A. Contactless user feature is available only with the External Identity license, which can restrict the Experience Cloud functionality available to the user.
- B. Passwordless authentication cannot be supported because the mobile phone receiving one-time password (OTP) needs to match the number on the contact record.
- C. If contactless user is upgraded to Community license, the contact record is automatically created and linked to the user record, but not associated with an Account.
- D. Custom registration handler is needed to correctly assign External Identity or Community license for the newly registered contactless user.

Answer: C

Explanation:
Explanation
According to the Salesforce documentation3, contactless user feature allows creating users without contact information, such as email address or phone number. This reduces the overhead of managing customers and partners who don't need or want to provide their contact information. However, if a contactless user is upgraded to a Community license, a contact record is automatically created and linked to the user record, but not associated with an account. This can impact the architecture of NTO's Customer 360 Platform, as they may need to associate contacts with accounts for reporting or other purposes.

NEW QUESTION # 220

......
