Exam 300-740 Simulator Fee | New 300-740 Braindumps Files

The study system of our company will provide all customers with the best study materials. If you buy the 300-740 latest questions of our company, you will have the right to enjoy all the 300-740 certification training materials from our company. By updating the study system of the 300-740 Training Materials, we can guarantee that our company can provide the newest information about the exam for all people. We believe that getting the newest information about the exam will help all customers pass the 300-740 exam easily.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q51-Q56):

NEW QUESTION # 51

What does the term "workload" refer to in the context of cloud security?

- A. The amount of data processed by the cloud
- B. The user's responsibility in managing cloud security
- C. Applications and processes running in cloud environments
- D. The physical servers in a data center

Answer: C

NEW QUESTION # 52

Implementing a Web Application Firewall (WAF) for direct-internet-access applications ensures:

- A. Protection against web-based threats while maintaining application performance
- B. That all user data is publicly accessible
- C. A decrease in operational costs by eliminating other security tools
- D. An increase in latency and reduction in user satisfaction

Answer: A

NEW QUESTION # 53

Event Packet	Last Packet	Action	Reason	Initiator IP	Initiator Country	Responder IP	Responder Country	Security Intelligence Category	Ingress Security Zone	Egress Security Zone	Source Port / XCMP Type	Destination Port / XCMP Code	Application Protocol
2023-09-10 22:27:52		Block	IP Block	172.17.1.2		180.43.223.6	NLD	Response	inside	outside	49198 / tcp	80 (http) / tcp	
2023-09-10 22:18:29		Block	DNS Block	10.1.108.100		172.17.1.2		DNS Cryptomining	inside	outside	42438 / udp	53 (domain) / udp	DNS
2023-09-10 21:51:38	2023-09-10 21:51:38	Block	URL Block	10.1.104.101		188.78.145.90	USA	URL Response	inside	outside	49453 / tcp	80 (http) / tcp	HTTP

Refer to the exhibit. An engineer is analyzing a Cisco Secure Firewall Management Center report. Which activity does the output verify?

- A. A DNS response from IP address 10.1.108.100 was blocked.
- B. A DNS request to IP address 172.17.1.2 was blocked.
- C. An HTTP request to IP address 10.1.113.7 was blocked.
- D. An HTTP response from IP address 10.1.104.101 was blocked.

Answer: A

Explanation:

The exhibit shows DNS Block as the reason and lists 10.1.108.100 as the Responder IP, with the Initiator being 10.1.113.7. In Cisco Secure Firewall Management Center reports, the "Initiator IP" is the source of the request and the "Responder IP" is the source of the response. Since the DNS security intelligence engine flagged the traffic, and 10.1.108.100 was the responder, the blocked traffic corresponds to a DNS response from that IP.

NEW QUESTION # 54

What is the primary purpose of implementing identity certificates for user and device authentication?

- A. To track device locations
- B. To increase network speed
- C. To monitor user activity
- D. To ensure secure access to resources

Answer: D

NEW QUESTION # 55

Upon detecting a user or application compromise, the first action should be to:

- A. Disconnect the entire network
- B. Immediately delete all compromised accounts
- C. Ignore the incident
- D. Contain the threat to prevent further spread

Answer: D

NEW QUESTION # 56
