시험패스에 유효한 AP-208인증덤프샘플 다운 덤프샘플문제 다운

우리 Itexamdump의 덤프는 여러분이 Salesforce AP-208 인증 시험 응시에 도움이 되시라고 제공되는 것입니다, 우리 Itexamdump에서 제공되는 학습 가이드에는 Salesforce AP-208 인증 시험 관련 정보 기술로 여러분이 이 분야의 지식 장악에 많은 도움이 될 것이며 또한 아주 정확한 Salesforce AP-208 시험 문제와 답으로 여러분은 한번에 안전하게 시험을 패스하실 수 있습니다, Salesforce AP-208 인증 시험을 아주 높은 점수로 패스할 것을 보장해 드립니다,

최신 Accredited Professional AP-208 무료 샘플 문제 (Q76-Q81):

질문 # 76

An investment bank is implementing Financial Services Cloud (FSC) to manage the deal pipeline. Each opportunity has confidential information that the deal team members must only view. In addition, each member needs the ability to take and share notes directly within Salesforce with others on the team.

Which three FSC features should be part of the solution design?

- A. Sharing Rules
- B. Financial Deal Management
- C. Profiles
- D. Interaction Summaries
- E. Compliance Sharing

정답: A,B,D

설명:

The following FSC features should be part of the solution design for managing confidential deal information and notes sharing among deal team members:

Financial Deal Management: Financial Deal Management is a feature in Financial Services Cloud that allows you to track and manage complex deals that involve multiple parties, products, and stages. You can use Financial Deal Management to store confidential deal information such as deal name, amount, status, or participants. You can also use Financial Deal Management to associate opportunities, products, or tasks with a deal.

질문 # 77

Which three record type options should an advisor configure for a Lead object configuration?

- A. Retirement Planning
- B. Referral
- C. Adjustments
- D. General
- E. Opportunity

정답: A,B,D

설명:

Reference: Financial Services Cloud - Account and Contact Record Types | Salesforce Help Explanation: Record types are a way to categorize records in Salesforce based on different business processes or requirements. Record types can have different page layouts, picklist values, and business logic. For the Lead object, a financial services company can create different record types to capture different types of leads based on their source, interest, or qualification. Some examples of record types for the Lead object are:

Referral: This record type can be used to capture leads that are referred by existing clients or partners.

Referral leads can have fields such as Referrer Name, Referrer Account, and Referral Type to track the source and nature of the referral.

General: This record type can be used to capture leads that are generated from general marketing campaigns or events. General leads can have fields such as Campaign Name, Campaign Source, and Lead Score to track the effectiveness and potential of the marketing efforts.

Retirement Planning: This record type can be used to capture leads that are interested in retirement planning services or products. Retirement planning leads can have fields such as Retirement Age, Retirement Goal, and Current Savings to assess the needs and suitability of the leads.

질문 # 78

Which Salesforce Financial Services Cloud feature enables financial advisors to track and manage client accounts?

- A. Opportunity management
- B. Performance reporting
- C. Client onboarding
- **D. Financial accounts management**

정답: D

설명:

Financial accounts management is a Salesforce Financial Services Cloud feature that enables financial advisors to track and manage client accounts. A financial account is any account managed by a financial institution, such as a bank, an insurance company, or an investment firm. Financial Services Cloud supports many kinds of financial accounts, such as checking accounts, savings accounts, mortgages, credit cards, investment accounts, insurance policies, and more³. Financial advisors can use Financial Services Cloud to view, create, update, and delete financial accounts for their clients, as well as link them to other objects, such as households, goals, referrals, or opportunities⁴.

질문 # 79

Which three permission sets grant access or extend permissions for record alerts in Financial Services Cloud (FSC)?

- **A. FSC Foundations permission set**
- **B. OmniStudio User permission set**
- C. FSC Basic permission set
- D. OmniStudio Admin permission set
- **E. FSC Standard permission set**

정답: A,B,E

설명:

Record alerts are a feature of Financial Services Cloud that let users create and display alerts on record pages to highlight important information or actions. Record alerts are based on OmniStudio, a low-code platform for building digital experiences in Salesforce. To access or extend permissions for record alerts in Financial Services Cloud, users need to have one of the following permission sets:

FSC Standard permission set: This permission set grants access to the core features of Financial Services Cloud, including record alerts. Users with this permission set can view and create record alerts on supported objects, such as accounts, contacts, financial accounts, and opportunities¹.

FSC Foundations permission set: This permission set grants access to the common features of Financial Services Cloud that are shared across subverticals, such as retail banking, wealth management, and insurance. Users with this permission set can view and create record alerts on supported objects².

OmniStudio User permission set: This permission set grants access to the OmniStudio features, such as OmniScripts, DataRaptors, Integration Procedures, and Record Alerts. Users with this permission set can view and create record alerts on any object that has the Record Alert component enabled³.
