Up to now, we have business connection with tens of thousands of exam candidates who adore the quality of our SC-401 exam questions. Besides, we try to keep our services brief, specific and courteous with reasonable prices of SC-401 Study Guide. All your questions will be treated and answered fully and promptly. So as long as you contact us to ask for the questions on the SC-401 learning guide, you will get the guidance immediately.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 2	<ul style="list-style-type: none"> Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 3	<ul style="list-style-type: none"> Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 4	<ul style="list-style-type: none"> Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.

SC-401 Reliable Mock Test | 100% Free Efficient Valid Administering

Information Security in Microsoft 365 Practice Materials

We provide first-rate service on the SC-401 learning prep to the clients and they include the service before and after the sale, 24-hours online customer service and long-distance assistance, the refund service and the update service. The client can try out our and download SC-401 Guide materials freely before the sale and if the client have problems about our SC-401 study brandumps after the sale they can contact our customer service at any time.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q119-Q124):

NEW QUESTION # 119

You need to test Microsoft Purview Advanced Message Encryption capabilities for your company.

The test must verify the following information:

- The acquired default template names
- The encryption and decryption verification status

Which PowerShell cmdlet should you run?

- A. Test-Mailflow
- B. Test-OAuthConnectivity
- C. Test-IRMConfiguration
- D. Test-ClientAccessRule

Answer: C

Explanation:

Verify Microsoft Purview Message Encryption configuration in Exchange Online PowerShell You can verify that your Microsoft 365 tenant is properly configured to use Microsoft Purview Message Encryption in Exchange Online PowerShell.

1. Using a work or school account that has sufficient permissions in your organization, such as Compliance Administrator, start a Windows PowerShell session and connect to Exchange Online.

For instructions, see Connect to Exchange Online PowerShell.

2. Run the Get-IRMConfiguration cmdlet.

You should see a value of \$True for the AzureRMSLicensingEnabled parameter, which indicates that Microsoft Purview Message Encryption is configured in your tenant. If it is not, use Set-IRMConfiguration to set the value of AzureRMSLicensingEnabled to \$True to enable Microsoft Purview Message Encryption.

NEW QUESTION # 120

Hotspot Question

You have a Microsoft 365 E5 subscription that contains the groups shown in the following table.

□ The subscription contains the resources shown in the following table.

□ You create a sensitivity label named Label1.

You need to publish Label1 and have the label apply automatically.

To what can you publish Label1, and to what can Label1 be auto-applied? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

There are two different methods for automatically applying a sensitivity label to content in Microsoft 365

1. Client-side labeling when users edit documents or compose (also reply or forward) emails
2. Service-side labeling when content is already saved (in SharePoint or OneDrive) or emailed (processed by Exchange Online).

NEW QUESTION # 121

You have a Microsoft J65 E5 subscription that contains a user named User1.

All users are assigned Microsoft 365 Copilot licenses.

You deploy Microsoft Purview Data Security Posture Management for AI (DSPM for AI).

You need to ensure that User1 can analyze prompts and responses for AI interaction events. The solution must follow the principle of least privilege.

To which two role groups should you add User1? Each correct answer presents part of the solution.

NOTE; Each correct selection is worth one point.

- A. Security Reader
- **B. Content Explorer Content Viewer**
- C. Information Protection Analysts
- **D. Content Explorer list Viewer**
- E. Insider Risk Management Investigators

Answer: B,D

NEW QUESTION # 122

You have a new Microsoft 365 E5 tenant.

You need to create a custom trainable classifier that will detect product order forms. The solution must use the principle of least privilege.

What should you do first? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

To create a custom trainable classifier in Microsoft Purview (formerly Microsoft Compliance Center), you must first opt into the trainable classifier feature.

Before using custom trainable classifiers, Microsoft requires manual opt-in through the Microsoft Purview compliance portal.

Without this step, you cannot create a new classifier.

The Compliance Administrator role has the necessary permissions to configure data classification, DLP policies, and trainable classifiers. Global Administrator has higher privileges but is not required for this task, violating the principle of least privilege. Security Administrator is focused on security-related settings but does not manage compliance features like classifiers.

NEW QUESTION # 123

You have a Microsoft 365 E5 tenant and the Windows Client devices shown in the following table.

To which devices can you apply Microsoft 365 Endpoint data loss prevention (Endpoint DLP) settings?

- A. Device1 only
- **B. Device1 and Device2 only**
- C. Device1 and Device3 only
- D. Device1, Device2, Device3, and Device4
- E. Device1, Device3, and Device4 only

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/endpoint-dlp-getting-started>

NEW QUESTION # 124

.....

It can be said that all the content of the SC-401 prepare questions are from the experts in the field of masterpieces, and these are understandable and easy to remember, so users do not have to spend a lot of time to remember and learn. It takes only a little practice on a daily basis to get the desired results. Especially in the face of some difficult problems, the user does not need to worry too much, just learn the SC-401 Practice Guide provide questions and answers, you can simply pass the exam. This is a wise choice, and in the near future, after using our SC-401 exam braindumps, you will realize your dream of a promotion and a raise,
