## Pass4sure Professional-Cloud-Security-Engineer Exam Prep & Professional-Cloud-Security-Engineer Reliable Test Cost

Pass4Leader Professional-Cloud-Security-Engineer exam training materials can help you save a lot of time and energy, and make you yield twice the result with half effort to pass Professional-Cloud-Security-Engineer certification exam. After you purchase our Professional-Cloud-Security-Engineer exam dumps, we will also provide one year free renewal service for you. If there's any quality problem in Professional-Cloud-Security-Engineer Exam Dumps you buy or you fail Professional-Cloud-Security-Engineer certification exam, we promise to give you a full refund unconditionally.

## Google Cloud Certified - Professional Cloud Security Engineer Exam Sample Questions (Q92-Q97):

### NEW QUESTION # 92

You manage one of your organization's Google Cloud projects (Project A). AVPC Service Control (SC) perimeter is blocking API access requests to this project including Pub/Sub. A resource running under a service account in another project (Project B) needs to collect messages from a Pub/Sub topic in your project. Project B is not included in a VPC SC perimeter. You need to provide access from Project B to the Pub/Sub topic in Project A using the principle of least Privilege.

What should you do?

- A. Configure an ingress policy for the perimeter in Project A and allow access for the service account in Project B to collect messages.
- B. Create an access level that allows a developer in Project B to subscribe to the Pub/Sub topic that is located in Project A.

- C. Remove the Pub/Sub API from the list of restricted services in the perimeter configuration for Project A.
- D. Create a perimeter bridge between Project A and Project B to allow the required communication between both projects.

**Answer: A**

#### NEW QUESTION # 93

Your security team wants to reduce the risk of user-managed keys being mismanaged and compromised. To achieve this, you need to prevent developers from creating user-managed service account keys for projects in their organization. How should you enforce this?

- A. Remove the iam.serviceAccounts.getAccessToken permission from users.
- B. Configure Secret Manager to manage service account keys.
- C. Enable an organization policy to prevent service account keys from being created.
- D. Enable an organization policy to disable service accounts from being created.

**Answer: C**

Explanation:

<https://cloud.google.com/iam/docs/best-practices-for-managing-service-account-keys>

"To prevent unnecessary usage of service account keys, use organization policy constraints:

At the root of your organization's resource hierarchy, apply the Disable service account key creation and Disable service account key upload constraints to establish a default where service account keys are disallowed.

When needed, override one of the constraints for selected projects to re-enable service account key creation or upload."

#### NEW QUESTION # 94

Your team wants to limit users with administrative privileges at the organization level.

Which two roles should your team restrict? (Choose two.)

- A. Organization Role Viewer
- B. Organization Administrator
- C. Compute Admin
- D. Super Admin
- E. GKE Cluster Admin

**Answer: B,D**

Explanation:

The Organization Administrator and Super Admin roles have extensive administrative privileges at the organization level. Restricting these roles is crucial to limit the number of users who have the ability to manage critical resources and configurations within the organization, thereby enhancing security and minimizing potential risks.

Organization Administrator: Has comprehensive permissions to manage all aspects of the Google Cloud organization, including projects, folders, and IAM policies.

Super Admin: In Google Workspace (formerly G Suite), the Super Admin has access to all administrative features and can manage user accounts, services, and settings across the organization.

#### NEW QUESTION # 95

Your organization is building a chatbot that is powered by generative AI to deliver automated conversations with internal employees. You must ensure that no data with personally identifiable information (PII) is communicated through the chatbot. What should you do?

- A. Discover and transform PII data in both input and output by using the Cloud Data Loss Prevention (Cloud DLP) API.
- B. Prevent PII data exfiltration by using VPC-SC to create a safe scope around your chatbot.
- C. Encrypt data at rest for both input and output by using Cloud KMS, and apply least privilege access to the encryption keys.
- D. Scan both input and output by using data encryption tools from the Google Cloud Marketplace.

**Answer: A**

Explanation:

<https://cloud.google.com/blog/topics/developers-practitioners/how-keep-sensitive-data-out-your-chatbots>

#### **NEW QUESTION # 96**

A company is running workloads in a dedicated server room. They must only be accessed from within the private company network. You need to connect to these workloads from Compute Engine instances within a Google Cloud Platform project. Which two approaches can you take to meet the requirements? (Choose two.)

- A. Configure the project with VPC peering.
- B. Configure the project with Shared VPC.
- **C. Configure the project with Cloud Interconnect.**
- **D. Configure the project with Cloud VPN.**
- E. Configure all Compute Engine instances with Private Access.

**Answer: C,D**

#### **NEW QUESTION # 97**

.....

You may feel astonished and doubtful about this figure; but we do make our Professional-Cloud-Security-Engineer exam dumps well received by most customers. Better still, the 98-99% pass rate has helped most of the candidates get the certification successfully, which is far beyond that of others in this field. In recent years, supported by our professional expert team, our Professional-Cloud-Security-Engineer Test Braindumps have grown up and have made huge progress. We pay emphasis on variety of situations and adopt corresponding methods to deal with. More successful cases of passing the Professional-Cloud-Security-Engineer exam can be found and can prove our powerful strength.
