- B. They automate non-critical business functions without supporting overall ERP transformation.
- C. The earlier the solutions are leveraged in a transformation project, the more value they can generate.
- D. They are primarily focused on human resources management.

Answer: A,C

Explanation:
Leveraging SAP Business Transformation Management (BTM) Solutions early in a RISE with SAP project allows organizations to gain critical insights into their existing processes, applications, and technology landscape. This helps accelerate transformation readiness and reduces rework during design and implementation.
"Early adoption of SAP BTM Solutions within RISE projects maximizes value by providing transparency and actionable insights into business processes and IT landscapes, ensuring cost-efficient and faster ERP transformation." Reference:
Early Value Realization (Answer A):
The earlier BTM tools such as SAP Signavio, SAP LeanIX, and WalkMe are applied, the faster organizations can identify inefficiencies and define transformation scope, which increases long-term value generation.
"The earlier SAP BTM tools are introduced, the more transformation value can be realized through early visibility, stakeholder alignment, and optimized process design." Cost Efficiency through Faster Insights (Answer B):
SAP BTM solutions provide data-driven visibility into as-is processes and dependencies, enabling companies to reduce transformation costs by addressing inefficiencies early.
