In this cut-throat competitive world of Microsoft, the Microsoft AZ-120 certification is the most desired one. But what creates an obstacle in the way of the aspirants of the Microsoft AZ-120 certificate is their failure to find up-to-date, unique, and reliable Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) practice material to succeed in passing the Microsoft AZ-120 Certification Exam. If you are one of such frustrated candidates, don't get panic. TestPassed declares its services in providing the real AZ-120 PDF Questions. It ensures that you would qualify for the Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) certification exam on the maiden strive with brilliant grades.

## Exam AZ-120: Planning and Administering Microsoft Azure for SAP Workloads

Candidates for this exam should be architects or engineers with extensive experience and knowledge of the SAP system landscape and industry standards that are specific to the initial migration or integration and the long-term operation of an SAP solution on Microsoft Azure.

Responsibilities for an architect or an engineer for Azure for SAP Workloads include making recommendations on services and adjusting resources as appropriate for optimal resiliency, performance, scale, provision, size, and monitoring.

Architects or engineers for Azure for SAP Workloads partner with cloud administrators, cloud database administrators, and clients to implement solutions.

A candidate for this exam should have extensive experience and knowledge of SAP applications: SAP HANA, S/4HANA, SAP NetWeaver, SAP BW/4HANA, OS servers for SAP applications and databases, Azure portal, Azure Marketplace, Azure Resource Manager templates (ARM templates), virtualization, cloud infrastructure, storage structures, high availability design, disaster recovery design, data protection concepts, and networking.

For this exam, we strongly recommended that you have an Azure Administrator Associate or Azure Solutions Architect Expert certification, in addition to SAP certifications.

**Part of the requirements for:** Microsoft Certified: Azure for SAP Workloads Specialty

## Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q56-Q61):

### NEW QUESTION # 56

You plan to deploy two Azure virtual machines that will host an SAP HANA database for an SAP landscape. The virtual machines will be deployed to the same availability set. You need to meet the following requirements:

- \* Ensure that the virtual machines support disk snapshots.
- \* Ensure that the virtual machine disks provide submillisecond latency for writes.
- \* Ensure that each virtual machine can be allocated disks from a different storage cluster.

Which type of operating system disk and HANA database disk should you use? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

**Answer:**

Explanation:

### NEW QUESTION # 57

You have an SAP landscape on Azure that contains the virtual machines shown in the following table.

You need to ensure that the Application Server role is available if a single Azure datacenter fails. What should you include in the solution?

- **A. Azure Application Gateway v1**
- B. Azure Private Link
- C. Azure Load Balancer Standard
- D. a local network gateway

**Answer: A**

### NEW QUESTION # 58

You have an Azure subscription that contains a highly available SAP NetWeaver deployment. The deployment contains four virtual machines.

You need to monitor the NetWeaver deployment by using Azure Monitor for SAP Solutions. During the implementation of Azure Monitor for SAP Solutions, downtime of the deployment must be minimized.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation

### NEW QUESTION # 59

For each of the following statements, select yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation

□

### NEW QUESTION # 60

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

□

#### Answer:

Explanation:

□ Explanation:

Graphical user interface, text, application, email Description automatically generated

□

Box 1: Yes

The following is a quick checklist of storage configuration best practices for running your SQL Server on Azure VM:

\* Place data, log, and tempdb files on separate drives.

Box 2: Yes

Accelerated networking enables single root I/O virtualization (SR-IOV) to a VM, greatly improving its networking performance. This high-performance path bypasses the host from the data path, which reduces latency, jitter, and CPU utilization for the most demanding network workloads on supported VM types.

Box 3: No

Note: The maximum transmission unit (MTU) is the largest size frame (packet), specified in bytes, that can be sent over a network interface. The MTU is a configurable setting. The default MTU used on Azure VMs, and the default setting on most network devices globally, is 1,500 bytes.
