CompTIA SY0-701 Valid Real Exam, Real SY0-701 Exam Dumps

With our motto "Sincerity and Quality", we will try our best to provide the big-league SY0-701 exam questions for our valued customers like you. Our company emphasizes the interaction with customers on our SY0-701 Study Guide. We not only attach great importance to the quality of CompTIA Security+ Certification Exam exam, but also take the construction of a better after-sale

service on our SY0-701 learning materials into account.

CompTIA Security+ Certification Exam Sample Questions (Q633-Q638):

NEW QUESTION # 633

Which of the following tools can assist with detecting an employee who has accidentally emailed a file containing a customer's PII?

- A. Antivirus
- B. SCAP
- C. DLP
- D. Net Flow

Answer: C

Explanation:

DLP stands for Data Loss Prevention, which is a tool that can assist with detecting and preventing the unauthorized transmission or leakage of sensitive data, such as a customer's PII (Personally Identifiable Information). DLP can monitor, filter, and block data in motion (such as emails), data at rest (such as files), and data in use (such as applications). DLP can also alert the sender, the recipient, or the administrator of the data breach, and apply remediation actions, such as encryption, quarantine, or deletion. DLP can help an organization comply with data protection regulations, such as GDPR, HIPAA, or PCI DSS, and protect its reputation and assets. Reference = CompTIA Security+ Study Guide with over 500 Practice Test Questions: Exam SY0-701, 9th Edition, Chapter 2, page 78. CompTIA Security+ SY0-701 Exam Objectives, Domain 2.5, page 11.

NEW QUESTION # 634

A company must ensure that log searches are conducted in the shortest time frame. Which of the following should the company do to maintain logs in live storage for 90 days?

- A. Apply aggregation.
- B. Conduct deduplication.
- C. Apply compression.
- D. Conduct archiving.

Answer: A

Explanation:

The best answer is C. Apply aggregation.

In Security+ logging and monitoring concepts, log aggregation means collecting logs from multiple systems and centralizing them in one place, often for use by a SIEM or another monitoring platform. This improves the speed and efficiency of searches because analysts do not need to query many separate devices or locations individually. Centralized logs are much easier to index, correlate, and search quickly.

Why the other options are not the best choice:

* A. Conduct deduplication Deduplication reduces repeated data and may save storage space, but it is primarily a storage-efficiency method. It does not directly provide the best improvement for fast searching across logs.

* B. Conduct archiving Archiving is used for long-term retention, but archived logs are usually moved out of readily searchable live storage. This would not support the requirement for the shortest search time frame.

* D. Apply compression Compression saves storage capacity, but compressed logs may require decompression or additional processing before review. This does not best support the need for the fastest searches.

From a Security+ perspective, when the goal is rapid log review, correlation, and search performance, aggregation is the strongest answer because it supports centralized monitoring and efficient analysis of live logs over the retention period.

NEW QUESTION # 635

An attacker gained access to a virtual machine and was able to access the hypervisor. Which of the following describes this attack?

- A. SQL injection
- B. VM escape
- C. Logic bomb
- D. Privilege escalation

Answer: B

Explanation:

VM escape is an attack in which a malicious actor breaks out of the confines of a virtual machine to gain access to the underlying hypervisor or other virtual machines, matching the scenario described.

NEW QUESTION # 636

A security analyst learns that an attack vector, used as part of a recent incident, was a well-known IoT device exploit. The analyst needs to review logs to identify the time of the initial exploit. Which of the following logs should the analyst review first?

- A. NAC
- B. Firewall
- C. Endpoint
- D. Application

Answer: C

Explanation:

Detailed Explanation: Firewall logs provide details of all network traffic, including connections to and from IoT devices. They are typically the first source of evidence for identifying the time of an exploit. Reference:

CompTIA Security+ SY0-701 Study Guide, Domain 4: Security Operations, Section: "Log Analysis for Incident Response".

NEW QUESTION # 637

Which of the following would be most useful in determining whether the long-term cost to transfer a risk is less than the impact of the risk?

- A. RTO
- B. SLE
- C. RPO
- D. ARO
- E. ALE

Answer: E

Explanation:

The Annual Loss Expectancy (ALE) is most useful in determining whether the long-term cost to transfer a risk is less than the impact of the risk. ALE is calculated by multiplying the Single Loss Expectancy (SLE) by the Annualized Rate of Occurrence (ARO), which provides an estimate of the annual expected loss due to a specific risk, making it valuable for long-term financial planning and risk management decisions.

NEW QUESTION # 638

.....

SY0-701 certification is an essential certification of the IT industry. Are you still vexed about passing SY0-701 certification test? Itcertmaster will solve the problem for you. Our Itcertmaster is a helpful website with a long history to provide SY0-701 Exam Certification training information for IT certification candidates. Through years of efforts, the passing rate of Itcertmaster's SY0-701 certification exam has reached to 100%.

SY0-701 Valid Real Exam: <https://www.itcertmaster.com/SY0-701.html>

However, the SY0-701 qualification examination is not so simple and requires a lot of effort to review, CompTIA Exam SY0-701 Collection So far our passing rate for most IT real tests is nearly 99.6%, In one word, we not only provide the most effective and accurate SY0-701 Valid Real Exam - CompTIA Security+ Certification Exam free prep material to help candidates passing through the test but also provide the most convenient and comprehensive after-sale service, CompTIA Exam SY0-701 Collection You can buy our products at once.

Since we now have a darker background for our light text, we can SY0-701 actually shift it over to the right side of the design, Likewise, it you can enjoy iTunes Radio programming using Apple TV.
