

New Hitachi HQT-4160 Exam Fee - HQT-4160 Test Torrent

Exam Type Qualification
Format Proctored, closed book exam
Credential Hitachi Vantara Qualified Professional - VSP 5000 Series Installation
Validity 3 years
Delivery Criterion Webassessor System*
Questions 35
Passing Score 65%
Duration 60 minutes
Cost US \$100 or equivalent in local currency (plus local tax, depending on location)
Supporting Material • 1090PI - Installing and Configuring the Hitachi VSP 5000 Series (5 day-ILT)

This test is designed for Hitachi Vantara employees and partners who install Hitachi Virtual Storage Platform (VSP) 5000 series systems. The test will validate that the successful candidate has knowledge and skills in installing, configuring and supporting VSP 5000 series systems at customer sites. This includes strong knowledge of the systems' hardware and associated program products, thorough understanding of installation and configuration procedures, and associated support activities. This test covers Hitachi Virtual Storage Platform models VSP 5100(H), VSP 5500(H), VSP 5200(H) and VSP 5600(H).

Audience: Hitachi Vantara Employee and Partner Installation Professionals

Hitachi VSP 5000 series installation professionals should have strong knowledge and skills in installing and supporting storage systems deployed as part of VSP 5000 series solutions implementation. They perform pre-installation checks and install, configure and test the systems so they can be handed over in an operational state to customers. They also provide post-installation services, including support, maintenance, updates and upgrades, and have knowledge of problem-determination and incident-resolution procedures, tools and techniques.

Test Objectives	
Section 1 System Architecture	
1.1	Describe the different VSP 5000 models and their specifications.
1.2	Describe the VSP 5000 systems architecture, their components and their functions.
1.3	Describe the front-end design and layout of VSP 5000 systems and the supported Channel Boards (CHBs).
1.4	Describe the back-end design and layout of VSP 5000 systems and the supported Disk Adapters (DKAs).
Section 2 System Pre-installation and Installation	
2.1	Describe the VSP 5000 storage systems pre-installation procedures and documentation.
2.2	Describe the VSP 5000 disk controllers (DKCs) interconnections.
2.3	Describe the "New Installation" procedure for VSP 5000 storage systems and when it is appropriate to use.
2.4	Describe the VSP 5000 storage systems network settings.
2.5	Describe the VSP 5000 storage microcode upgrade procedures.
Section 3 System Configuration	
3.1	Describe the key steps involved in the installation of VSP 5000 storage systems.
3.2	Describe how to create Parity Groups on VSP 5000 storage systems.

* Depending on the location and course delivery format, this closed-book, proctored qualification test may also be offered and administered by the instructor at the conclusion of the supporting course.

2026 Latest Pass4cram HQT-4160 PDF Dumps and HQT-4160 Exam Engine Free Share: <https://drive.google.com/open?id=1G8OsRpH4PuE4fMcUc2VUFiRH6aA0mjc>

One of the biggest challenges of preparing for a Hitachi HQT-4160 certification exam is staying motivated. It is easy to get bogged down by all the material you need to learn and lose sight of your goal. That is why our Hitachi HQT-4160 PDF and practice tests are designed to be engaging and easy to understand.

Hitachi HQT-4160 Exam is a challenging exam, but it is also a great way to demonstrate your knowledge and skills in the field of IT. By passing HQT-4160 exam, you will be able to prove to your employer or potential employers that you have the expertise needed to install and manage the VSP 5000 Series. This can help you advance your career and increase your earning potential.

HQT-4160 Test Torrent & HQT-4160 Valid Test Experience

We know deeply that a reliable HQT-4160 exam material is our company's foothold in this competitive market. High accuracy and high quality are the most important things we always looking for. Compared with the other products in the market, our HQT-4160 latest questions grasp of the core knowledge and key point of the real exam, the targeted and efficient Hitachi Vantara Qualified Professional - VSP 5000 Series Installation study training dumps guarantee our candidates to pass the test easily. Our HQT-4160 Latest Questions is one of the most wonderful reviewing Hitachi Vantara Qualified Professional - VSP 5000 Series Installation study training dumps in our industry, so choose us, and together we will make a brighter future.

Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Sample Questions (Q32-Q37):

NEW QUESTION # 32

The process of 'sparing' in VSP 5000 storage systems is designed to:

- A. Automatically replace failing drives to prevent data loss
- B. Increase the processing power of the storage controllers
- C. Serve as a backup for the storage management software
- D. Provide additional storage for user data

Answer: A

NEW QUESTION # 33

Which management tool is used to create a Parity Group in a VSP 5000 system?

- A. Maintenance Utility
- B. Storage Navigator 2
- C. Hitachi Command suite
- D. Web Console

Answer: B

Explanation:

Storage Navigator 2 is the primary management tool used for configuring and managing storage on VSP 5000 systems, including the creation of Parity Groups.

NEW QUESTION # 34

You are installing a VSP 5500h with 3 pairs of CBXs. What is the total number of X-PATH cables that will be attached to the ISW ports?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

A VSP 5500h system with 3 pairs of Controller Boxes (CBXs) requires a total of 48 X-PATH cables attached to the Interconnect Switch (ISW) ports. Each CBX pair contributes 16 X-PATH cables (8 per CBX), and with 3 pairs, the total is $3 \times 16 = 48$.

NEW QUESTION # 35

Which two part replacements in a VSP 5000 system require blocking the controller? (Choose two.)

- A. Cache Flash Module (CFM)
- B. Cache DIMM
- C. Hitachi Interconnect Edge (HIE)
- D. Controller PCB

Answer: B,D

Explanation:

Controller PCB

Replacing the Controller PCB requires blocking the controller to ensure system integrity and prevent data loss during the hardware change.

Cache DIMM

Cache DIMMs are part of the controller's critical memory subsystem, so the controller must be blocked before replacing any cache DIMMs to avoid corruption and ensure a safe replacement process.

NEW QUESTION # 36

Which two components are different between VSP 5500 and VSP 5600 systems? (Choose two.)

- A. DKC Power Supply (DKCPS)
- B. Interconnect Switch (ISW)
- C. Hitachi Interconnect Edge (HIE)
- D. Controller Board

Answer: A,D

Explanation:

Controller Board

The VSP 5600 controllers use upgraded blades featuring dual 10-core Cascade Lake CPUs and two Compression Accelerator Modules per controller, hardware not present on the VSP 5500 controllers, delivering significantly higher processing and ADR offload capabilities.

DKC Power Supply (DKCPS)

A non-disruptive Data-in-Place upgrade from VSP 5500 to VSP 5600 requires swapping each VSP 5500's DKCPS units for the VSP 5600-specified power supplies, as the newer models use a different PSU design.

NEW QUESTION # 37

.....

Hundreds of Hitachi aspirants have cracked the Hitachi Vantara Qualified Professional - VSP 5000 Series Installation examination by just preparing with our real test questions. If you also want to become a Hitachi certified without any anxiety, download Hitachi updated test questions and start preparing today.
