2026 Latest PDFDumps H13-624\_V5.5 PDF Dumps and H13-624\_V5.5 Exam Engine Free Share:  
<https://drive.google.com/open?id=17uTmIhtMwJ9IghPuXPCuA12pPKiKUKzJ>

Only by practising our H13-624\_V5.5 exam braindumps on a regular base, you will see clear progress happened on you. Besides, rather than waiting for the gain of our H13-624\_V5.5 practice guide, you can download them immediately after paying for it, so just begin your journey toward success now. With our H13-624\_V5.5 learning questions, you will find that passing the exam is as easy as pie for our H13-624\_V5.5 study materials own 100% pass guarantee.

## Huawei H13-624\_V5.5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Huawei Intelligent Storage Products and Features: This section of the exam measures the skills of a Storage Administrator and focuses on Huawei's intelligent storage solutions. It includes understanding product models, management interfaces, and advanced features like storage tuning and data protection. Candidates will explore how to manage system operations, optimize resource usage, and apply Huawei-specific technologies for secure and high-performance storage deployment.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Storage System O&amp;M Management: This section of the exam measures the skills of a Storage Operations Specialist and covers the daily operational management of Huawei storage systems. It emphasizes practical abilities in system monitoring, troubleshooting, fault handling, and health checks. The goal is to ensure smooth, reliable operations and reduce risks through proactive maintenance and efficient use of Huawei's O&amp;M tools.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Basic Storage Technologies: This section of the exam measures the skills of a Storage Engineer and includes fundamental knowledge of storage systems. It covers key concepts such as intelligent storage architecture, RAID levels, storage networking, and widely used data protocols. The section also introduces the structure and function of SAN and NAS environments. A strong grasp of these basic technologies helps professionals support large-scale data infrastructure with efficiency and stability.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Storage Technology Trends: This section of the exam measures skills of a Data Center Specialist and covers the latest advancements in the storage industry. It focuses on emerging technologies that are shaping intelligent storage development, including trends like AI integration, green computing, and cloud-oriented storage evolution. Candidates are expected to understand how these trends influence storage planning and deployment in modern IT environments.</li> </ul>

## Best H13-624\_V5.5 Study Material & Study H13-624\_V5.5 Reference

The Huawei H13-624\_V5.5 PDF is the most convenient format to go through all exam questions easily. It is a compilation of actual Huawei H13-624\_V5.5 exam questions and answers. The PDF is also printable so you can conveniently have a hard copy of Huawei H13-624\_V5.5 Dumps with you on occasions when you have spare time for quick revision. The PDF is easily downloadable from our website and also has a free demo version available.

### Huawei HCIP-Storage V5.5 Sample Questions (Q31-Q36):

#### NEW QUESTION # 31

Single-select OceanStor 9000 restricts file storage and re-striping through the InfoTier water level threshold.

When configuring InfoTier

Select Spill over, other parameters default, which of the following statements is correct?

- A. When the used space accounts for 859% of the total storage space of the node pool, the system reports a read-only alarm
- B. When the used space accounts for 90% of the total storage space of the node pool, data can still be written to the node pool
- C. When the used space accounts for 85% of the total storage space of the node pool, data can still be written to the node pool
- D. When the used space accounts for 90% of the total storage space of the node pool, the system reports an insufficient capacity alarm

**Answer: C**

#### NEW QUESTION # 32

Multiple Choices What are the advantages of Huawei OceanStor 9000 clustered NAS technology over traditional NAS storage systems? Multiple choices

- A. Multi-node cluster, load balancing, global cache, provide strong performance
- B. Scale-out engine architecture is scalable.
- C. The failover is fast, and the failure of a single node in the cluster does not affect the business
- D. The cluster is followed by SAN storage, and the SAN storage can use heterogeneous storage

**Answer: A,B,C**

### NEW QUESTION # 33

When delivering a Huawei OceanStor Pacific scale-out storage project, an engineer introduced the end-to-end data Integrity check technology of scale-out storage to the customer. Which of the following statements are false about this technology?

- A. In this technology, write requests are checked at the system entry (virtual block service). User data is checked again in the object storage device (OSD) before being written to disks. Data is written to disks only after the data integrity check succeeds.
- **B. This technology enables the storage system to implement periodic background data integrity check. When the service load is heavy or service access is frequent, the system automatically starts periodic background data integrity check and self-healing.**
- C. For silent data scenarios such as bit change and read offset, the end-to-end data integrity check technology supports logical block addressing (LBA) check of clusters and hosts.
- D. Block, NAS, and object services support end-to-end data integrity check, but the HDF5 service does not.

**Answer: B**

### NEW QUESTION # 34

For the NDMP feature of OceanStor 9000 product, which of the following is the description of each option incorrect?

- A. In data protection scenarios and archiving scenarios, NDMP features can be used
- **B. NDMP backup features need to be purchased and can be used**
- C. The NDMP feature of OceanStor 9000 uses snapshot-based backup by default
- D. The NDMP protocol supported by OceanStor 9000 is V4

**Answer: B**

### NEW QUESTION # 35

An Internet customer has deployed a remote replication environment based on multiple flash storage devices. During actual service running, the customer discovers that there are multiple running statuses for a remote replication pair. Which of the following statements is true about the running status of a pair?

- A. After a pair is disconnected, if the pair is deleted from the primary or secondary site, which causes configuration inconsistency between the primary and secondary sites, the pair running status changes to "To be recovered."
- B. When the pair running status is "To be synchronized", the pair relationship between the primary and secondary LUNs must be manually disconnected to meet the service requirements of a single LUN.
- C. When the pair running status is "Split", the pair relationship between the primary and secondary LUNs is interrupted (not manually).
- **D. When the pair running status is "Normal", data synchronization between the primary and secondary LUNs is complete.**

**Answer: D**

### NEW QUESTION # 36

.....

If moving up in the fast-paced technological world is your objective, Huawei is here to help. The excellent HCIP-Storage V5.5 (H13-624\_V5.5) practice exam from Huawei can help you realize your goal of passing the Huawei Treasury with HCIP-Storage V5.5 (H13-624\_V5.5) certification exam on your very first attempt. Most people find it difficult to find excellent Huawei Treasury with HCIP-Storage V5.5 (H13-624\_V5.5) exam dumps that can help them prepare for the actual HCIP-Storage V5.5 (H13-624\_V5.5) exam.
