At QuestionsTube, you can read FCP\_FAZ\_AN-7.4 free demo questions in pdf file, so you can check the questions and answers before deciding to download the Fortinet FCP\_FAZ\_AN-7.4 practice questions. These free demo questions are parts of the FCP\_FAZ\_AN-7.4 exam questions. Download and read them carefully, you will find that the FCP\_FAZ\_AN-7.4 test questions of QuestionsTube will be your great learning materials online. Share some FCP\_FAZ\_AN-7.4 exam online questions below.

BONUS!!! Download part of DumpsReview FCP\_FSM\_AN-7.2 dumps for free: <https://drive.google.com/open?id=15QoiAFJFpxVoVgqiE3IRxgUyA4IGdF40>

If you use the DumpsReview Fortinet FCP\_FSM\_AN-7.2 Study Materials, you can reduce the time and economic costs of the exam. It can help you to pass the exam successfully. Before you decide to buy our Fortinet FCP\_FSM\_AN-7.2 exam materials, you can download our free test questions, including the PDF version and the software version. If you need software versions please do not hesitate to obtain a copy from our customer service staff.

## Fortinet FCP\_FSM\_AN-7.2 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Machine learning, UEBA, and ZTNA: This section of the exam measures the skills of Advanced Security Architects and covers the integration of modern security technologies. It involves performing configuration tasks for machine learning models, incorporating UEBA (User and Entity Behavior Analytics) data into rules and dashboards for enhanced threat detection, and understanding how to integrate ZTNA (Zero Trust Network Access) principles into security operations.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Analytics: This section of the exam measures the skills of Security Analysts and covers the foundational techniques for building and refining queries. It focuses on creating searches from events, applying grouping and aggregation methods, and performing various lookup operations, including CMDB and nested queries to effectively analyze and correlate data.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Incidents, notifications, and remediation: This section of the exam measures the skills of Incident Responders and encompasses the entire incident management lifecycle. This includes the skills required to manage and prioritize security incidents, configure policies for alert notifications, and set up automated remediation actions to contain and resolve threats.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Rules and subpatterns: This section of the exam measures the skills of SOC Engineers and focuses on the construction and implementation of analytics rules. It involves identifying the different components that make up a rule, utilizing advanced features like subpatterns and aggregation, and practically configuring these rules within the FortiSIEM platform to detect security events.</li> </ul>

## Quiz FCP\_FSM\_AN-7.2 - Pass-Sure Latest FCP - FortiSIEM 7.2 Analyst Exam Simulator

There has been fierce and intensified competition going on in the practice materials market. As the leading commodity of the exam, our FCP\_FSM\_AN-7.2 practice materials have get pressing requirements and steady demand from exam candidates all the time. So our FCP\_FSM\_AN-7.2 practice materials have active demands than others with high passing rate of 98 to 100 percent. We are one of the largest and the most confessional dealer of practice materials. That is why our FCP\_FSM\_AN-7.2 practice materials outreach others greatly among substantial suppliers of the exam.

### Fortinet FCP - FortiSIEM 7.2 Analyst Sample Questions (Q37-Q42):

#### NEW QUESTION # 37

Refer to the exhibit.

According to the automation policy configuration shown in the exhibit, what happens if an associated rule triggers?

- A. FortiSIEM runs the remediation script, because that takes precedence over all other options.

- B. FortiSIEM fails to the integration policy, because no policy is defined.
- **C. FortiSIEM performs all selected actions.**
- D. FortiSIEM sends an email, because that is first on the list.

**Answer: C**

Explanation:

When an associated rule triggers, FortiSIEM performs all selected actions in the automation policy. In this case, it will send an email/SMS/webhook, run the remediation script, invoke the integration policy (even if none is currently defined), and create a case. All checked actions are executed.

### NEW QUESTION # 38

Which running mode takes the most time to perform machine learning tasks?

- A. Local auto
- B. Regression
- C. Forecasting
- **D. Local**

**Answer: D**

Explanation:

In Local mode, FortiSIEM performs machine learning tasks using the full dataset without optimization shortcuts, making it the most time-consuming mode compared to Local Auto, Forecasting, or Regression.

### NEW QUESTION # 39

Which two settings must you configure to allow FortiSIEM to apply tags to devices in FortiClient EMS? (Choose two.)

- **A. FortiEMS API credentials defined on FortiSIEM**
- **B. FortiSIEM API credentials defined on FortiEMS\**
- C. Remediation script configured
- D. ZTNA tags defined on FortiSIEM

**Answer: A,B**

Explanation:

To allow FortiSIEM to apply tags to devices in FortiClient EMS, FortiEMS API credentials must be defined on FortiSIEM to enable communication with EMS, and FortiSIEM API credentials must be defined on FortiEMS to allow EMS to accept tagging instructions from FortiSIEM. This bidirectional API trust is essential for tag application.

### NEW QUESTION # 40

Refer to the exhibit.

**Analytics Search**

The screenshot shows the Fortinet Analytics Search interface. At the top, there are three filter categories: 'Event Keywords', 'Event Attribute' (selected), and 'CMDB Attribute'. Below these are buttons for 'Clear All', 'Load', and 'Save'. The main search criteria are displayed in a table:

Paren	Attribute	Operator	Value	Paren	Next	Row
⊖	⊕ User	IN	Device IP: Server Inventory	⊖	⊕ AND OR	+ 🗑️
⊖	⊕ Event Type	IN	Group: Logon Failure	⊖	⊕ AND OR	+ 🗑️

Below the search criteria, there is a 'Time Range' section with three options: 'Real-time', 'Relative' (selected), and 'Absolute'. Under 'Relative', there is a 'Last' dropdown set to '10' and a 'Days' dropdown. The Fortinet logo is visible at the bottom of the interface.

The analyst is troubleshooting the analytics query shown in the exhibit.

Why is this search not producing any results?

- A. The Boolean operator is wrong between the attributes.
- B. You cannot reference User and Event Type attributes in the same search.
- C. The Time Range is set incorrectly.
- D. The inner and outer nested query attribute types do not match.

**Answer: D**

Explanation:

The issue is that the "User" attribute is incorrectly assigned a Device IP group value, which is a mismatch of attribute types. "User" expects a user name or identity, not a device IP group. This mismatch between the attribute type and the provided value causes the search to return no results.

**NEW QUESTION # 41**

Refer to the exhibit.

## Automation Policy

The screenshot shows the 'Automation Policy' configuration window. The 'Name' field is set to 'Automation'. The 'Severity' is set to 'High'. The 'Rules' dropdown is set to 'Group:Network'. The 'Time Range' is set to 'ANY'. The 'Affected Items' is set to 'ANY'. The 'Affected Orgs' is set to 'Rule:Aviation'. Under the 'Action' section, the following options are checked: 'Send Email/SMS/Webhook to the target users.', 'Run Remediation/Script.', 'Invoke an Integration Policy. Run: no policy.', and 'Create Case when an incident is created.'. Under the 'Settings' section, the following options are unchecked: 'Do not notify when an incident is cleared automatically.', 'Do not notify when an incident is cleared manually.', and 'Do not notify when an incident is cleared by system.'

## Remediation/Script Options

The screenshot shows the 'Automation Policy > Define Script/Remediation' configuration window. The 'Type' is set to 'Remediation Script'. The 'Script' dropdown is set to 'Fortinet FortiOS - Block Source IP FortiOS via API'. The 'Protocol' is set to 'HTTPS'. The 'Enforce On' dropdown is set to 'Device:FortiGate50B, Device:FortiGate90D'. The 'Run On' dropdown is set to 'Supervisor'. The 'VDOM' field is empty. At the bottom, there are 'Save' and 'Cancel' buttons.

If a rule containing the automation policy shown in the exhibit triggers, what will happen?

- A. Associated source IP addresses will be blocked on two FortiGate firewalls.
- B. Associated source IP addresses will be blocked on devices in the Network CMDB group.
- C. Associated source IP addresses will be blocked on devices in the Aviation organization.
- D. Associated source IP addresses will be blocked on all FortiGate firewalls.

Answer: A

#### Explanation:

The automation policy is configured to run a remediation script named "Fortinet FortiOS - Block Source IP FortiOS via API". It specifies enforcement on two FortiGate devices: FortiGate508 and FortiGate90D. Therefore, associated source IP addresses will be blocked on those two FortiGate firewalls only.

#### NEW QUESTION # 42

.....

It is because of our high quality Fortinet FCP\_FSM\_AN-7.2 preparation software, PDF files and other relevant products, we have gathered thousands of customers who have successfully passed the Fortinet FCP\_FSM\_AN-7.2 in one go. You can also attain the same success rate by using our high standard FCP\_FSM\_AN-7.2 Preparation products. Thousands of satisfied customers can't be wrong. You must try our products to believe this fact.
