H19-341_V1.0 Pass Test Guide, H19-341_V1.0 Valid Exam Preparation

Huawei H19-341_V1.0 exam dumps is a surefire way to get success. TrainingQuiz has assisted a lot of professionals in passing their Huawei H19-341_V1.0 certification test. In case you don't pass the Huawei H19-341_V1.0 pdf questions and practice tests, you have the full right to claim your full refund. You can download and test any H19-341_V1.0 Exam Questions format before purchase. So don't get worried, start Huawei H19-341_V1.0 exam preparation and get successful.

Huawei HCSA-Field-Intelligent Collaboration V1.0 Sample Questions (Q35-

Q40):

NEW QUESTION # 35

The Huawei SMC platform only supports VM-based and cloud deployment.

- A. FALSE
- B. TRUE

Answer: A

Explanation:

This statement is FALSE . While the Huawei SMC (Service Management Center) is highly virtualized and optimized for VM (Virtual Machine) and Cloud environments (such as Huawei Cloud or private clouds), it also supports Bare-Metal deployment .

In high-performance scenarios or large-scale enterprise deployments where dedicated hardware resources are required to ensure maximum stability and registration capacity, the SMC can be installed directly on physical servers (e.g., Huawei 2288X or Taishan servers) without a virtualization layer.

NEW QUESTION # 36

What is the writing latency of Huawei IdeaHub Board 2 whiteboard?

- A. 16ms
- B. 12ms
- C. 25ms
- D. 35ms

Answer: C

Explanation:

Writing latency is a critical metric for a natural "pen-on-paper" experience.

* The IdeaHub Board 2 , primarily designed for education, features a writing latency of 25ms .

* For comparison, the premium IdeaHub S2 features a faster 16ms latency due to its more powerful specialized processing chip.

While 25ms is slightly higher than the S2, it still provides a smooth, lag-free experience suitable for classroom teaching and collaborative sketching.

NEW QUESTION # 37

Which one is not the feature of the Huawei digital classroom solution?

- A. Digitalized blackboard content: The content on the blackboard can be automatically synchronized to the IdeaHub.
- B. Keep traditional method: Teachers can write on the digital whiteboard as easily as they write on a traditional blackboard.
- C. Blackboard content saving: Teachers and students can save blackboard content effortlessly by scanning a QR code.
- D. Whiteboard/Green-colored blackboard: Writing using only chalks is supported, and the content can be synchronized to the IdeaHub.

Answer: D

Explanation:

In the Huawei Digital Classroom Solution , the "not correct" feature is Option A .

* The Reality: While the solution includes a Digital Blackboard (an electronic companion to the IdeaHub) that supports chalk and synchronization, a standard "Green-colored blackboard" is an analog surface. If a teacher uses only chalks on a traditional green board, there is no electronic sensor to capture and synchronize that data to the IdeaHub. Synchronization requires the Electronic Blackboard hardware. Options B, C, and D are all core features highlighting the interactive and digitizing capabilities of the smart classroom environment.

NEW QUESTION # 38

What standard SDKs can IdeaHub provide for 3rd-party ISVs for quick integration and customization services? (Select All that can apply)

- A. Meeting SDK

- B. Projection SDK
- C. System root SDK
- D. Whiteboard SDK

Answer: A,B,D

Explanation:

Huawei provides a suite of open Software Development Kits (SDKs) to allow Independent Software Vendors (ISVs) to integrate IdeaHub's hardware capabilities into their own applications:

* Meeting SDK (A): Allows apps to invoke the 4K camera, microphone array, and hardware encoding/decoding.

* Whiteboard SDK (B): Allows apps to utilize the ultra-low latency writing and drawing capabilities of the touchscreen.

* Projection SDK (C): Enables third-party apps to implement wireless content sharing features natively.

System root SDK (D) is not provided. To ensure enterprise-grade security and protect system integrity, Huawei does not grant "root" access to 3rd-party applications.

NEW QUESTION # 39

The advantages of optical anti-blue light over software anti-blue light are ().

- A. All of the above.
- B. Lower proportion of harmful blue light.
- C. No need manually to enable this feature.
- D. The picture has no color cast.

Answer: A

Explanation:

Optical Anti-Blue Light is a hardware-based solution that shifts the peak wavelength of harmful blue light (415nm-455nm) to a safer range at the source (LED backlight).

* No color cast (A): Unlike software filters that apply a yellow/orange tint to the screen, optical filtering maintains accurate, natural color reproduction.

* Lower harmful light (B): It physically reduces up to 60% of high-energy short-wave blue light while preserving color depth.

* Always-on (C): Because it is built into the backlight, it is active 100% of the time without requiring the user to navigate menus or enable "Night Mode" manually.

NEW QUESTION # 40

.....

The PDF version of our H19-341_V1.0 guide exam is prepared for you to print it and read it everywhere. It is convenient for you to see the answers to the questions and remember them. After you buy the PDF version of our study material, you will get an E-mail form us in 5 to 10 minutes after payment. Then you can click the link in the E-mail and download your H19-341_V1.0 study engine. You can download it as many times as you need.
