CASPO-001 exam consists of multiple-choice questions and is administered online. Candidates have two hours to complete the exam, and they must score at least 70% to pass.

## GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q39-Q44):

### NEW QUESTION # 39

The process of regular inspection and adaptation employs knowledgeable and skilled inspectors. What are two ways in which the Product Owner takes the lead in the inspection process? (Choose the best two answers)

- A. At the Daily Scrum the Product Owner inspects the Sprint burn-down for progress towards a complete Increment and re-planning the team's work.
- B. At the end of Sprint Planning the Product Owner verifies the Sprint Backlog for completeness in order to allow the Sprint to start.
- C. The Product Owner invites stakeholders to the Sprint Review to learn how the current state of the marketplace influences what is the most valuable thing to do next.
- D. At the Sprint Review the Product Owner shares the current state of Product Backlog, which, combined with the inspection of the Increment, leads to an updated Product Backlog.

**Answer: C,D**

Explanation:

The Product Owner leads inspection related to value and backlog management:

\* A: At the Sprint Review, they present the Product Backlog state, adapting it based on Increment feedback, per: "The Product Owner discusses the Product Backlog as it stands."

\* D: Inviting stakeholders ensures market insights inform value, aligning with: "The Product Owner may invite other people to attend."

\* B: Daily Scrum is for Developers; the Product Owner doesn't inspect burn-downs there.

### NEW QUESTION # 40

The time-box for a Daily Scrum is? (Choose the best answer)

- A. Two minutes per person.
- B. The same time of day every day.
- C. 15 minutes for a 4-week Sprint. For shorter Sprints it is usually shorter.
- D. 15 minutes.
- E. 4 hours.

**Answer: D**

Explanation:

The Scrum Guide defines the Daily Scrum as a 15-minute time-boxed event: "The Daily Scrum is a 15-minute event for the Developers of the Scrum Team." This duration is fixed regardless of Sprint length, ensuring consistency and focus on synchronizing work and identifying impediments. Option A refers to a scheduling practice, not the time-box. Option B is arbitrary and not Scrum-defined. Option C is far too long and contradicts the Scrum Guide. Option E incorrectly suggests variability based on Sprint length, which isn't supported- 15 minutes is the standard. Thus, D is the correct answer.

### NEW QUESTION # 41

How does an organization know that a product built through Scrum is successful? (Choose the best answer)

- A. By measuring that velocity has increased since the last release
- B. By the Product Owner and stakeholders accepting the Increment at the Sprint Review
- C. By releasing often, and updating key performance indicators (KPIs) on value after every release and feeding this information back into work on the Product Backlog
- D. By measuring the actual time spent on development versus the time estimated for development

**Answer: C**

Explanation:

Success in Scrum is tied to value delivery, not internal metrics. Option B- frequent releases with KPI updates- aligns with Scrum's empirical nature: "Scrum is founded on empiricism and lean thinking." Real- world feedback refines the Product Backlog, ensuring success.

\* A: Velocity is an internal capacity metric, not a success indicator.

\* C: Time variance is irrelevant to value.

### NEW QUESTION # 42

Which is NOT a Scrum role? (Choose the best answer)

- A. Developers
- B. Product Owner
- **C. Project Manager**
- D. Scrum Master

**Answer: C**

Explanation:

Scrum defines three roles: Product Owner, Scrum Master, and Developers. The Scrum Guide states: "The Scrum Team consists of one Scrum Master, one Product Owner, and Developers." Project Manager (C) is a traditional role absent in Scrum, where responsibilities are distributed among the Scrum Team.

\* A, B, D: These are explicit Scrum roles.

### NEW QUESTION # 43

The Product Owner's authority to change and update the Product Backlog is unlimited, except for: (Choose the best answer)

- A. Technical and architectural work that needs to be done first, as indicated by the chief enterprise architect.
- B. Decisions by the chief program manager.
- **C. Nothing. The entire organization must respect a Product Owner's decisions.**
- D. Work for which impediments exist that the Scrum Master still needs to resolve.
- E. High impact changes that have not been approved by the change request board.
- F. Decisions by the CFO, the CEO, or the board of directors.

**Answer: C**

Explanation:

The Scrum Guide grants the Product Owner sole authority over the Product Backlog: "The Product Owner is one person, not a committee... For Product Owners to succeed, the entire organization must respect their decisions." No external roles or processes override this.

\* A, C, D, E: These introduce roles (CFO, CEO, program manager, architect, change board) not recognized in Scrum as limiting the Product Owner's authority.

\* F: Impediments affect execution, not the Product Owner's right to update the backlog.
