GH-500 Sample Questions Answers - Microsoft Valid GH-500 Test Materials: GitHub Advanced Security Finally Passed

If you want to give up your certificate exams as you fail GH-500 exam or feel it too difficult, please think about its advantages after you obtain a Microsoft certification. Many special positions require employees to have a qualification. If you think it is very difficult for you to pass exams, our GH-500 Valid Exam Cram PDF can help you to achieve your goal. Our exam materials are collected from the real test center and edited by our experienced experts. If you need 100% passing rate, our GH-500 valid exam cram PDF can help you.

Microsoft GitHub Advanced Security Sample Questions (Q63-Q68):

NEW QUESTION # 63
Which of the following features helps to prioritize secret scanning alerts that present an immediate risk?

- A. Push protection
- B. Non-provider patterns
- C. Custom pattern dry runs
- D. Secret validation

Answer: D

Explanation:
Secret validation checks whether a secret found in your repository is still valid and active with the issuing provider (e.g., AWS, GitHub, Stripe). If a secret is confirmed to be active, the alert is marked as verified, which means it's considered a high-priority issue because it presents an immediate security risk.
This helps teams respond faster to valid, exploitable secrets rather than wasting time on expired or fake tokens.

NEW QUESTION # 64
If notification and alert recipients are not customized, which users receive notifications about new Dependabot alerts in an affected repository?

- A. Users with Read permissions to the repository
- B. Users with Admin privileges to the repository
- C. Users with Maintain privileges to the repository
- D. Users with Write permissions to the repository

Answer: D

Explanation:
By default, users with Write, Maintain, or Admin permissions will receive notifications for new Dependabot alerts. However, Write permission is the minimum level needed to be automatically notified. Users with only Read access do not receive alerts unless added explicitly.

NEW QUESTION # 65
Where can you view code scanning results from CodeQL analysis?

- A. At Security advisories
- B. A CodeQL database
- C. The repository's code scanning alerts
- D. A CodeQL query pack

Answer: C

Explanation:
All results from CodeQL analysis appear under the repository's code scanning alerts tab. This section is part of the Security tab and provides a list of all current, fixed, and dismissed alerts found by CodeQL.
A CodeQL database is used internally during scanning but does not display results. Query packs contain rules, not results. Security advisories are for published vulnerabilities, not per-repo findings.

NEW QUESTION # 66
Which syntax in a query suite tells CodeQL to look for one or more specified .ql files?

- A. qlpack
- B. query
- C. qls

Answer: B

Explanation:
In a query suite (a .qls file), the **query** key is used to specify the paths to one or more .ql files that should be included in the suite.
Example:
- query: path/to/query.ql
qls is the file format.
qlpack is used for packaging queries, not in suite syntax.

NEW QUESTION # 67
How many alerts are created when two instances of the same secret value are in the same repository?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:
When multiple instances of the same secret value appear in a repository, only one alert is generated. Secret scanning works by identifying exposed credentials and token patterns, and it groups identical matches into a single alert to reduce noise and avoid duplication.
This makes triaging easier and helps teams focus on remediating the actual exposed credential rather than reviewing multiple redundant alerts.

NEW QUESTION # 68

......

We promise you that if you fail to pass your exam after using GH-500 exam materials, we will give you refund. We are pass guarantee and money back guarantee. Moreover, GH-500 training materials cover most of knowledge points for the exam, and you can master the major knowledge points as well as improve your professional ability after practicing. GH-500 Exam Materials contain both questions and answers, and it's convenient for you to have a quickly check after practicing. We also have online and offline chat service, if you have any questions about GH-500 exam dumps, you can consult us.
GH-500 latest pdf vce provides you the simplest way to clear exam with little cost, Our GH-500 practice material is a good choice for you, Also we have GH-500 VCE free pictures to explain what our Soft & APP test engine look like, Microsoft GH-500 Sample Questions Answers Then our study materials can give you some guidance, With the GitHub Advanced Security (GH-500) exam you can validate your skills and upgrade your knowledge level.

Create processes, set priorities, maximize quality, measure people–and improve every day, Creating and Using Custom Exceptions, GH-500 latest pdf vce provides you the simplest way to clear exam with little cost.

GH-500 Exam Questions Conveys All Important Information of GH-500 Exam

Our GH-500 practice material is a good choice for you, Also we have GH-500 VCE free pictures to explain what our Soft & APP test engine look like, Then our study materials can give you some guidance.

With the GitHub Advanced Security (GH-500) exam you can validate your skills and upgrade your knowledge level.
