真実的なOrder-Management-Administrator一発合格と素晴らしいOrder-Management-Administrator試験内容

ほぼ100%の通過率は我々のお客様からの最高のプレゼントです。我々は弊社のSalesforceのOrder-Management-Administrator試験の資料はより多くの夢のある人にSalesforceのOrder-Management-Administrator試験に合格させると希望します。我々のチームは毎日資料の更新を確認していますから、ご安心ください、あなたの利用しているソフトは最も新しく全面的な資料を含めています。

Salesforce Order-Management-Administrator 認定試験の出題範囲：

| トピック | 出題範囲 |
|--------|--|
| トピック 1 | <ul style="list-style-type: none">• Process Automation and Integrations: This section helps the Salesforce Order Management Administrator Consultant demonstrate the capability to deliver business value by integrating Order Management with external systems using clicks rather than code. Mastery of navigation within Order Management processes, connecting nodes, and integrating systems efficiently ensures understanding of how to implement effective solutions. |
| トピック 2 | <ul style="list-style-type: none">• Deployment and Debugging: In this area, aspiring order management administrator consultant demonstrates a deep understanding of deployment options, life cycles, and the configuration of supporting objects. This includes creating processes from scratch, leveraging pre-set data, and validating results in runtime scenarios. |

- Advanced Topics: This topic challenges the Salesforce Order Management Administrator Consultant to diagnose and resolve configuration issues that hinder the launch or operation of Order Management processes. Proficiency includes troubleshooting integration problems and articulating how various processes interact to support successful deployments and system functionality.

Salesforce Order Management Administrator Accredited Professional 認定 Order-Management-Administrator 試験問題 (Q77-Q82):

質問 # 77

How can an administrator allow an org to publish a change set to another org?

- A. In the target org: Open Deployment Settings, Click Edit next to the source org. Select Allow Inbound Changes and Click Save
- B. In the source org: Open Publish Settings, Select the checkbox next to the environment to publish to and Click Save
- C. In the target org: Open Deployment Settings, Select the environments to allow publishing from and Move them to the Enabled list
- D. In the source org: open Deployment settings, Select the environments to publish to and Move them to the enabled list

正解: A

質問 # 78

An item is not able to be fulfilled by the location assigned to the Item's Fulfillment Order. What two steps does a customer service representative need to do to move the item to a different fulfillment location?

Choose 2 answers

- A. Change the Quantity field of the Fulfillment Order Product to 0 from the Fulfillment Order's related list
- B. Create a new Fulfillment Order Product assigned to the appropriate Fulfillment Order
- C. Cancel the Fulfillment Order
- D. Delete the Fulfillment Order Product record from the Fulfillment Order's related

正解: A、B

質問 # 79

An admin is working with Order Management licensed as standalone (B2C Commerce is not in the scenario). The admin submits a JSON payload using Workbench and Workbench indicates the operation was successful. The second time the same payload is submitted the operation fails. What are two likely causes?

- A. The Order Reference Number must be updated
- B. Stock Keeping Unit values must be updated
- C. The payment data must be updated
- D. The stock levels in the org are depleted from the first order

正解: A、C

解説:

Two likely causes that could make the second submission of the same JSON payload fail are:

The payment data must be updated. The payment data in the JSON payload contains information such as the payment method, amount, and authorization code. If the same payment data is used for the second order, it may cause a duplicate payment error or an invalid authorization error.

The Order Reference Number must be updated. The Order Reference Number is a unique identifier for each order that is generated by the external system and sent in the JSON payload. If the same Order Reference Number is used for the second order, it may cause a duplicate order error or an invalid order error.

質問 # 80

What type of relationship exists between FulfillmentOrder and Location?

- A. Junction (Many to Many)
- B. One-to-one Lookup (Location) FulfilledFromLocationId
- C. One-to-many Lookup (Location) FulfilledFromLocation
- D. Many-to-One Lookup (Location) FulfilledfromLocationId

正解: B

質問 # 81

A company sells its products in kits. The company wants the kits to remain grouped together during returns in Order Management so that all parts of the kit are accounted for.

What should the administrator recommend?

- A. Pass the data as is. Order Management will handle the kit.
- B. Add a custom attribute to the order header only
- C. Add a suffix to the Stock Keeping Unit of the Product which represents Kit status
- D. Track the individual kit items using custom attributes

正解: D

解説:

The best way for the administrator to recommend tracking the kits so that they remain grouped together during returns in Order Management is to use custom attributes. Custom attributes are fields that can be added to objects to store additional information that is not available in standard fields. The administrator can create custom attributes for the Order Item Summary object to indicate whether an item is part of a kit, and what are the other items in the kit. This way, the kits can be easily identified and handled during returns. Verified Reference:
