CCSE-204 Certificate Exam - CCSE-204 Exam Vce Format

We are all well aware that a major problem in the industry is that there is a lack of quality study materials. Our CCSE-204 braindumps provides you everything you will need to take a certification examination. Details are researched and produced by CCSE-204 Dumps Experts who are constantly using industry experience to produce precise, logical verify for the test. You may get CCSE-204 exam dumps from different web sites or books, but logic is the key.

CCSE-204 exam dumps provided by PassCollection are tested through practice, and are the most correct and the newest practical CCSE-204 test dumps. Our PassCollection can provide accurate CCSE-204 certification training questions based on extensive research and the experience of real world to make you pass CCSE-204 Certification Exam in a short time. If you purchase our CCSE-204 exam dumps, we will offer free update service within one year.

Marvelous CCSE-204 Certificate Exam - Win Your CrowdStrike Certificate with Top Score

Do you want to find a high efficiency way to prepare for CCSE-204 exam test?As we all know, high efficiency will produce unbelievable benefits. With our CrowdStrike CCSE-204 study pdf, you can make full use of your spare time. If you are tired of screen reading, you can print CCSE-204 Pdf Dumps into papers. You take your spare time to prepare and study. You will get your CCSE-204 exam certification with less time investment. Come on, everyone, Choose CCSE-204 test dumps, you will succeed.

CrowdStrike Certified SIEM Engineer Sample Questions (Q40-Q45):

NEW QUESTION # 40
What dashboard presents a view of third-party data ingestion over the past 30 days?

- A. Next-Gen SIEM Connector Dashboard
- B. Sensor Usage Dashboard
- C. Sensor Subscription Dashboard
- D. Falcon Flex Dashboard

Answer: A

Explanation:
The correct answer is D. Next-Gen SIEM Connector Dashboard .
CrowdStrike describes the Falcon Next-Gen SIEM Connector Dashboard as the place to understand the status and volume of data ingestion for third-party sources. This matches the question's requirement for a dashboard showing third-party ingestion visibility.
The other options are not aimed at third-party SIEM connector ingestion monitoring:
* Sensor Usage Dashboard relates to Falcon sensor usage, not connector-based third-party ingestion.
* Sensor Subscription Dashboard is about licensing/subscription counts.
* Falcon Flex Dashboard is related to subscription consumption and commercial usage, not connector ingestion telemetry.

NEW QUESTION # 41
You want a Next-Gen SIEM dashboard to update automatically when new data is available.
Which action would you take?

- A. Toggle the "Live" button to on
- B. Change the "Start Time" interval to 1 hour
- C. Change the "Relative Time Range" interval to 1 millisecond ago
- D. Change the "Fixed Time Range" to the current date

Answer: A

Explanation:
The correct answer is A . CrowdStrike LogScale documentation says the Live checkbox controls whether dashboard widget queries run as live or static queries. When enabled, the dashboard continuously updates with real-time data , which is exactly what the question asks for.

NEW QUESTION # 42
You suspect that an API key you recently generated has been compromised.
What should you do?

- A. View the API key details in the platform and clone a new API key
- B. Regenerate a new API key directly from the platform
- C. Contact CrowdStrike Support to retrieve and send the key to you
- D. Search the audit logs for the connector creation event and replicate it

Answer: B

Explanation:
The correct answer is A. Regenerate a new API key directly from the platform .
CrowdStrike guidance around connector onboarding shows that after a connector is created, you generate an API key in the platform and use that key for the integration. Related integration guidance also shows a Regenerate API key action in the platform flow, which is the correct response when a key may be exposed or compromised.
Why the other options are incorrect:
* B does not address credential compromise; recreating the connector event does not invalidate the exposed key.
* C is incorrect because the issue is not viewing or cloning details; the security action is to rotate /regenerate the credential.
* D is incorrect because CrowdStrike documentation consistently indicates secrets/keys are generated in- platform and may only be shown once, meaning Support is not the normal mechanism to retrieve and resend an existing secret.

NEW QUESTION # 43
You need to ingest data from a custom internal application hosted on-prem. The application writes logs to a file on a syslog server.
Which data connector would you use?

- A. HTTP Event Connector
- B. Google Cloud Pub / Sub Data Connector
- C. Amazon S3 Data Connector
- D. Azure Virtual Machines Data Connector

Answer: A

Explanation:
The correct answer is B. HTTP Event Connector .
CrowdStrike describes the HTTP Event Connector (HEC) as the generic mechanism used to bring third- party data into Falcon Next-Gen SIEM when you need to onboard logs from sources that are not tied to a specific cloud-native connector. CrowdStrike's own Next-Gen SIEM materials highlight pre-built connectors and HTTP Event Collectors as the way to extend visibility to many different third-party sources.
Because this question describes a custom internal application hosted on-prem , the cloud-specific connectors in options A , C , and D do not fit. The broad, flexible connector option intended for custom or non-native sources is the HTTP Event Connector . Also, CrowdStrike's vCenter example shows an architecture where logs are first centralized and then onboarded to Falcon Next-Gen SIEM through an HTTP Event Connector , which aligns with this kind of custom-source pattern.

NEW QUESTION # 44
Following the principle of least privilege, which is the appropriate role to grant a Falcon Next-Gen SIEM user the permissions to read case data and write XDR data while denying the permission to write case templates?

- A. NGSIEM Administrator
- B. NG SIEM Analyst
- C. NG SIEM Security Lead
- D. NG SIEM Analyst - Read Only

Answer: B

Explanation:
The best answer is C. NG SIEM Analyst .
I need to be careful here: I did not find a public CrowdStrike permissions matrix that explicitly lists this exact combination of rights by role. So this answer is the best-supported least-privilege inference , not one I can claim is directly documented 100%.
Why C is the strongest choice:
* NG SIEM Analyst - Read Only would not fit because the question requires write XDR data permissions.
* NGSIEM Administrator and NG SIEM Security Lead are broader roles and would not satisfy least privilege if a narrower analyst role can do the job.
* That leaves NG SIEM Analyst as the most plausible least-privilege built-in role for reading case data and writing XDR data while not granting broader administrative capabilities. CrowdStrike's Next-Gen SIEM materials describe the platform as combining centralized case management and XDR workflows, but the public pages I found do not expose the exact internal role matrix.

NEW QUESTION # 45
.....

Nowadays the competition in the society is fiercer and if you don't have a specialty you can't occupy an advantageous position in the competition and may be weeded out. Passing the test CCSE-204 certification can help you be competent in some area and gain the competition advantages in the labor market. If you buy our CCSE-204 Study Materials you will pass the CCSE-204 test smoothly. Our product boosts many advantages and it is your best choice to prepare for the test. Our CCSE-204 learning prep is compiled by our first-rate expert team and linked closely with the real exam.
