1 / 8

While the Juniper JN0-336 practice questions in PDF format are helpful for learning all the relevant answers to clear the JN0-336 exam, we offer an additional tool to enhance your confidence and skills. Our online Juniper Practice Test engine allows you to learn and practice for the Security, Specialist (JNCIS-SEC) (JN0-336) exam simultaneously. This feature is designed to strengthen your knowledge and ensure you are fully prepared for success.

It is similar to the Security, Specialist (JNCIS-SEC) (JN0-336) desktop-based exam simulation software, but it requires an active internet. No extra plugins or software installations are required to take the Security, Specialist (JNCIS-SEC) (JN0-336) web-based practice test. Every browser such as Chrome, Mozilla Firefox, MS Edge, Internet Explorer, Safari, and Opera supports this format of JN0-336 mock exam.

Latest Juniper JN0-336 Exam Materials & Exam JN0-336 Tutorial

You don't need to enroll yourself in expensive JN0-336 exam training classes. With the Security, Specialist (JNCIS-SEC) (JN0-336) valid dumps, you can easily prepare well for the actual Juniper JN0-336 Exam at home. Security, Specialist (JNCIS-SEC) (JN0-336) practice test software is compatible with windows and the web-based software will work on many operating systems.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q32-Q37):

NEW QUESTION # 32

Click the Exhibit button.

```
user@host> show configuration policy-options
    prefix-list manager-ip {
    10.0.0.0/8;
    192.168.4.254/32;
    }

user@host> show configuration firewall
    filter manager-ip {
    term block_non_manager {
        from {
            source-address {
                0.0.0.0/0;
            }
            source-prefix-list {
                manager-ip except;
            }
            protocol tcp;
            destination-port [ ssh https telnet http ]
        }
        then {
            discard;
        }

        term accept_everything_else {
            then accept;
        }
    }

user@host> show configuration interfaces lo0
unit 0 {
    family inet {
        filter {
            input manager-ip;
        }
    }
}
```

You are validating the configuration template for device access. The commands in the exhibit have been entered to secure IP access to an SRX Series device.

Referring to the exhibit, which two statements are true? (Choose two.)

- A. The device manager can access the device from 192.168.11.248.
- **B. The loopback interface blocks invalid traffic on its entry into the device.**
- C. The loopback interface blocks invalid traffic on its exit from the device.
- **D. The device manager can access the device from 10.253.1.2.**

Answer: B,D

Explanation:

The commands in the exhibit show how to configure a firewall filter on the loopback interface (lo0) of an SRX Series device. The loopback interface is a gateway for all the control traffic that enters the Routing Engine of the device. The firewall filter can be used to monitor and protect this control traffic from various attacks. Two statements that are true based on the exhibit are:

The loopback interface blocks invalid traffic on its entry into the device: The firewall filter applied on lo0 has a term that matches any packet with an invalid source address (such as 0.0.0.0/8 or 127.0.0.0/8) and discards it. This prevents spoofing or DoS attacks using invalid source addresses. The device manager can access the device from 10.253.1.2: The firewall filter applied on lo0 has a term that matches any packet with a source address of 10.253.1.2 and accepts it. This allows the device manager to access the device from this IP address using protocols such as SSH, Telnet, HTTP, or HTTPS.

NEW QUESTION # 33

You are asked to determine how much traffic a popular gaming application is generating on your network. Which action will you perform to accomplish this task?

- A. Enable AppQoS on the proper security zones
- B. Enable APBR on the proper security zones
- C. Enable screen options on the proper security zones
- **D. Enable AppTrack on the proper security zones.**

Answer: D

Explanation:

AppTrack is a feature of Juniper Networks firewall solutions that allows administrators to track applications, users, and the amount of traffic generated by those applications on the network. AppTrack can be enabled on specific security zones of the network to monitor traffic on those zones. This feature can be used to determine how much traffic a popular gaming application is generating on the network.

For more information, please refer to the Juniper Networks JNCIS-SEC Study Guide.

NEW QUESTION # 34

Which two statements are true about the vSRX? (Choose two.)

- **A. It has VMXNET3 vNIC support.**
- B. UNIX is the base OS.
- C. It does not have VMXNET3 vNIC support.
- **D. Linux is the base OS.**

Answer: A,D

Explanation:

Reference: Juniper Networks Security, Specialist (JNCIS-SEC) Study Guide, Chapter 1: Introduction to Junos Security, page 1-8. The vSRX is a virtual security appliance that runs on a virtual machine. It provides firewall, VPN, and other security services in a virtualized environment.

The vSRX is based on a version of Junos OS that is optimized for virtualization. It runs on a Linux kernel and uses a KVM hypervisor. It supports VMware ESXi and KVM hypervisors.

The vSRX has support for VMXNET3 vNICs, which are high-performance virtual network interfaces provided by VMware. These interfaces can provide higher throughput and lower CPU utilization than other virtual NIC types.

NEW QUESTION # 35

Click the Exhibit button.

```

APPTACK_SESSION_CLOSE {source-address="192.168.1.254" source-port="5573" reason="TCP-CLIENT_RST"
source-address="192.168.1.254" destination="192.168.1.254" destination-port="80" service-name="junos-http"
application="HTTP" nested-application="UNKNOWN" nat-source-address="192.168.1.254" nat-source-port="5573" nat-destination-address="192.168.1.254" nat-destination-port="80" src-nat-rule-name="N/A" dest-nat-rule-name="N/A" protocol-id="6" policy-name="permit-all" source-zone-name="trust" destination-zone-name="untrust" session-id="32" packet-size-from-client="5" bytes-from-client="332" packet-size-to-server="3" bytes-to-server="646" elapsed-time="3" username="user1" roles="DEPT1" encrypted="No" routing-instance="default" destination-interface-name="eto.0" category="Web" sub-category="N/A"}

```

Which two statements about the log output shown in the exhibit are correct? (Choose two)

- A. Source NAT is performed
- B. AppTrack is enabled on the untrust zone
- C. AppTrack is enabled on the trust zone:
- D. Traffic destined to the HTTP server is placed in an IPsec tunnel

Answer: A,C

NEW QUESTION # 36

Exhibit

```

[edit services ssl]
user@srx# commit
[edit services ssl proxy]
'profile Server-Protect'
  Unsupported cert type of server certid: SSL-Proxy
error: configuration check-out failed
[edit services ssl]
user@srx#

```

When trying to set up a server protection SSL proxy, you receive the error shown.

What are two reasons for this error? (Choose two.)

- A. The SSL proxy certificate ID does not have the correct renegotiation option set.
- B. The SSL proxy certificate ID is part of a blocklist.
- C. The SSL proxy certificate ID is for a forwarding proxy.
- D. The SSL proxy certificate ID does not exist.

Answer: A,D

Explanation:

The error message shown in the exhibit regarding the SSL proxy setup indicates an issue with the type of server certificate being used. The error explicitly states, "Unsupported cert type of server certid." Here are two plausible reasons for this error based on the options provided:

Option B. The SSL proxy certificate ID does not have the correct renegotiation option set.

This option points to a configuration issue related to the properties or capabilities of the certificate, such as renegotiation, which if not set correctly according to the expected requirements of the SSL proxy, might lead to the certificate being unsupported.

Renegotiation settings are critical in ensuring secure connections, and mismatches in configuration can result in errors.

Option D. The SSL proxy certificate ID does not exist.

If the certificate ID being referred to in the SSL proxy profile does not exist in the device's certificate store or is incorrectly referenced, the system will be unable to apply the configuration, leading to an error during the commit operation. This situation would typically result in an error indicating that the system can't find or recognize the specified certificate ID.

NEW QUESTION # 37

.....

Our JN0-336 study guide has become a brand for our candidates to get help for their exams. Because our JN0-336 learning materials contain not only the newest questions appeared in real exams in these years, but the most classic knowledge to master. Besides, it is unavoidable that you may be baffled by some question points during the review process of the JN0-336 Exam Questions, so there are clear analysis under some necessary questions.

Latest JN0-336 Exam Materials: <https://www.dumps4pdf.com/JN0-336-valid-braindumps.html>

We also pass guarantee and money back guarantee if you choose JN0-336 exam dumps of us, Because our JN0-336 study materials have the enough ability to help you improve yourself and make you more excellent than other people, For the purpose of giving our customers first-hand experience to get to know the contents in our real JN0-336 exam preparatory: Security, Specialist (JNCIS-SEC), we have prepared the free demo in this website, the contents in which are a little part of our real JN0-336 exam torrent questions, Juniper JN0-336 New Practice Materials Our Gold Customer Service.

Battle the Cynics and Gain Allies, A Complex Subsystem, We also pass guarantee and money back guarantee if you choose JN0-336 Exam Dumps of us, Because our JN0-336 study materials have the enough ability to help you improve yourself and make you more excellent than other people.

Latest JN0-336 New Practice Materials offer you accurate Latest Exam Materials | Juniper Security, Specialist (JNCIS-SEC)

For the purpose of giving our customers first-hand experience to get to know the contents in our real JN0-336 exam preparatory: Security, Specialist (JNCIS-SEC), we have prepared the free demo in this website, the contents in which are a little part of our real JN0-336 exam torrent questions.

Our Gold Customer Service, You just JN0-336 need to have a browser on your device you can use our study materials.
