P.S. Free & New PEGACPRSA22V1 dumps are available on Google Drive shared by PracticeTorrent:
<https://drive.google.com/open?id=1PIjWv4e75k1xCvsvebbAHQ5pPN-RRcCJ>

PracticeTorrent has a professional team of IT experts and certified trainers who written the PEGACPRSA22V1 exam questions and valid exam prep according to the actual test. You can download the Pegasystems free demo before you purchase. If you bought our PEGACPRSA22V1 Exam PDF, you will be allowed to free update your dumps one-year. You just need to spend one or two days to practice questions and remember answers.

If you try to get the Certified Pega Robotics System Architect 22 certification that you will find there are so many chances wait for you. You can get a better job; you can get more salary. But if you are trouble with the difficult of PEGACPRSA22V1 exam, you can consider choose our PEGACPRSA22V1 Exam Questions to improve your knowledge to pass PEGACPRSA22V1 exam, which is your testimony of competence. Now we are going to introduce our PEGACPRSA22V1 test guide to you, please read it carefully.

Perfect Latest PEGACPRSA22V1 Test Objectives by PracticeTorrent

Before you buy our PEGACPRSA22V1 study questions you can have a free download and tryout and you can have an

understanding of our product by visiting our pages of our product on the website. The pages of our PEGACPRSA22V1 guide torrent provide the demo and you can understand part of our titles and the form of our software. On the pages of our PEGACPRSA22V1 exam torrent you can see the version of the product, the updated time, the quantity of the questions and answers, the characteristics and merits of the product, the price of the product and the discounts. The pages also list the details and the guarantee of our PEGACPRSA22V1 Exam Torrent, the methods to contact us, the evaluations of the past client on our product, the related exams and other information about our PEGACPRSA22V1 guide torrent. So before your purchase you can have an understanding of our product and then decide whether to buy our PEGACPRSA22V1 study questions or not.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q100-Q105):

NEW QUESTION # 100

The following Context variables are defined in the Interaction.xml of the solution.

- ☐ An automation creates an interaction and later sets the following values for Procedures and HasBeenPaid.
- ☐ When the agent finishes the call, an automation clears the context variables using ClearContext.
- ☐ What is the state of the HasBeenPaid variable at this point?

- **A. The value of HasBeenPaid is now False.**
- B. The value of HasBeenPaid is now null.
- C. The value of HasBeenPaid is now True.

Answer: A

NEW QUESTION # 101

While interrogating a web application, you come across a hidden menu item: AddressType. The AddressType menu item activates when the pointer hovers over the control; the menu displays a drop-down list.

How do you interrogate this hidden drop-down list control?

- A. Choose Select Element from the Interrogation Form dialog box.
- **B. From the Web Controls tab, select the browser and frame, then select List Web controls.**
- C. Choose HTML Table Editor from the Interrogation Form dialog box.
- D. Access the Virtual Controls tab on the adapter tab.

Answer: B

Explanation:

NEW QUESTION # 102

While interrogating a web application, you discover a hidden menu item: AddressType. The AddressType menu item activates when the pointer hovers over the control, and the menu displays a drop-down list.

Which two options can you use to interrogate this hidden drop-down list control? (Choose Two)

- A. On the Web Controls tab, select the page, and then click List Web Controls.
- **B. On the Interrogation Form, select Select Element.**
- **C. Use the Delay option on the Interrogation Form.**
- D. In the Interrogation Form dialog box, select HTML Table Editor.
- E. On the Application tab, click the Virtual Controls tab.

Answer: B,C

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

During interrogation of web applications, developers often encounter dynamic or hidden controls - such as drop-down menus or hover-triggered lists - that do not immediately appear on the page.

To successfully interrogate these elements, Pega Robot Studio provides two essential tools:

- * The Delay option on the Interrogation Form, which allows the developer time to trigger the hidden control before capture.
- * The Select Element option, which enables precise selection of an element directly from the DOM, even if it is not immediately

visible.

According to the Pega Robotics System Design and Implementation Guide, section "Interrogating Dynamic and Hidden Web Controls":

"When interrogating hidden or dynamically rendered controls:

- * Use the Delay option on the Interrogation Form to give yourself time to hover over or activate a hidden control before Robot Studio attempts to capture it.

- * Use the Select Element option to manually highlight and select a control from the web application's DOM, even when it is displayed only after an interaction such as mouse hover. These methods are particularly effective for controls that expand or render asynchronously, such as drop-down menus or tooltip-triggered elements." Detailed Step Reasoning:

- * C. Use the Delay option on the Interrogation Form.

- * Correct.

- * The Delay setting pauses the interrogation process for a specified number of seconds, allowing you to hover over the hidden element (e.g., AddressType menu) and make it visible before capture.

- * Once the menu appears, Pega Robot Studio can detect and interrogate it.

- * D. On the Interrogation Form, select Select Element.

- * Correct.

- * The Select Element tool allows manual selection of an element directly from the web page's HTML DOM structure.

- * This is especially useful for hidden or dynamically rendered elements like the AddressType dropdown that may not be visible until hovered over.

Incorrect Options Explained:

- * A. In the Interrogation Form dialog box, select HTML Table Editor.

- * Incorrect.

- * The HTML Table Editor is used to inspect and modify HTML table-based controls (grid or table structures), not dynamic menus.

- * B. On the Web Controls tab, select the page, and then click List Web Controls.

- * Incorrect.

- * The List Web Controls option lists already recognized controls in the DOM but cannot reveal or capture hidden dynamic elements.

- * E. On the Application tab, click the Virtual Controls tab.

- * Incorrect.

- * Virtual Controls are used for defining custom controls when the default adapter cannot identify one, not for capturing hidden menu elements.

Final Correct answer:

C). Use the Delay option on the Interrogation Form.

D). On the Interrogation Form, select Select Element.

NEW QUESTION # 103

Which responsible for sending the deployment package to the customer. You want to build your project to work with the test and production Human Resource (HR) systems..... I have different access points for the HR applications, How can you design a single project to work in both systems?

- A. Create one environment override for the HR System project; the override contains both the production and test details.
- **B. Create two environment overrides for the HR System project: one override for production, and one for test.**
- C. Add two environment overrides and two applications for the HR project: one override and application for production, and the other override and application for test.
- D. Add two applications for the HR Project: one application for production, and one application for test.

Answer: B

Explanation:

In Pega Robot Studio, an environment override allows developers to configure multiple deployment environments (such as test, staging, and production) using a single project. This helps you avoid creating separate projects for each environment and ensures consistent automation logic while dynamically switching between environment-specific settings at runtime.

According to the Pega Robotics System Design and Implementation Guide, section "Managing Environment Overrides and Multi-Environment Deployments":

"Environment overrides provide a mechanism to define environment-specific configuration values for applications within a project.

For example, the same automation logic can be used for both test and production systems by creating separate environment override files - one for the test environment and one for the production environment - each specifying unique paths, credentials, or URLs for the corresponding system." Detailed Reasoning:

- * The HR system has different access points for test and production, which typically means different URLs or executable paths.
- * The automation logic (how the robot interacts with the HR application) remains identical; only the connection configuration changes.
- * Therefore, instead of creating multiple applications or modifying logic, you configure two environment override files - one for production and one for test - each defining environment-specific details such as:
 - * Application path (for Windows adapters)
 - * StartPage URL (for web adapters)
 - * Credentials or runtime parameters

This allows a single automation project to adapt dynamically based on which environment override is active during deployment or testing.

Option Analysis:

- * A. Incorrect - A single override cannot contain two sets of environment details; each override corresponds to one environment.
- * B. Incorrect - Creating two applications increases complexity and redundancy; both would duplicate the same logic.
- * C. Incorrect - Adding both separate applications and overrides is unnecessary; overrides alone are sufficient for environment flexibility.
- * D. Correct - Two environment overrides (one for production, one for test) allow the same project and automation logic to function properly across both environments.

Therefore, the correct answer is D. Create two environment overrides for the HR System project: one override for production, and one for test.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Managing Environment Overrides and Multi-Environment Deployment Configuration section (Pega Robotics 19.1 and later).

NEW QUESTION # 104

Pega Robot Studio has several methods to manage the flow of an automation depending on when a control is matched. In the Answer Area, drag the description on the left to its matching Design Block.

Answer:

Explanation:

NEW QUESTION # 105

.....

Firstly, we can give you 100% pass rate guarantee on the PEGACPRSA22V1 exam. Our PEGACPRSA22V1 practice quiz is equipped with a simulated examination system with timing function, allowing you to examine your learning results at any time, keep checking for defects, and improve your strength. Secondly, during the period of using PEGACPRSA22V1 learning guide, we also provide you with 24 hours of free online services, which help to solve any problem for you on the PEGACPRSA22V1 exam questions at any time and sometimes mean a lot to our customers.
