## **CIS-Discovery Latest Test Dumps - Latest CIS-Discovery Dumps Sheet**

It is common in modern society that many people who are more knowledgeable and capable than others finally lost some good

opportunities for development because they didn't obtain the CIS-Discovery Certification. The prerequisite for obtaining the CIS-Discovery certification is to pass the exam, but not everyone has the ability to pass it at one time. Because of not having appropriate review methods and review materials, or not grasping the rule of the questions, so many candidates eventually failed to pass even if they have devoted much effort.

## ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q39-Q44):

### NEW QUESTION # 39

Which choice represents the three best ways of extending Discovery?

- A. Classifiers, Probes & Sensors, Discovery Patterns
- B. **Classifiers, Fingerprinting, Probes & Sensors**
- C. Orchestration, Classifiers, Discovery Patterns
- D. Fingerprinting, Classifiers, Discovery Patterns
- E. Orchestration, Classifiers, Probes & Sensors

**Answer: B**

### NEW QUESTION # 40

What entry point type must a horizontal pattern have to execute from a process classifier?

- A. A subnet entry point type.
- B. **TCP entry point type or ALL entry point type.**
- C. HTTP(S) entry point type if the pattern is running on a web server application.
- D. It does not matter, it is triggered for all entry point types.

**Answer: B**

Explanation:

A horizontal pattern must have a TCP entry point type or an ALL entry point type to execute from a process classifier. A process classifier is a rule that matches a process running on a host and triggers a horizontal pattern to discover the application associated with that process1. The entry point type determines the type of connection that the pattern uses to access the target host. A TCP entry point type means that the pattern uses a TCP port to connect to the host, while an ALL entry point type means that the pattern can use any available connection method2.

### NEW QUESTION # 41

If the WMI service is not running on a host, it will prevent the discovery of which devices?

- A. Unix
- B. **Windows**
- C. Storage
- D. Network

**Answer: B**

Explanation:

The WMI service is a Windows service that enables remote management of Windows devices using the WMI protocol. The WMI service is required for Discovery to access the configuration and status information of Windows devices using WMI queries. If the WMI service is not running on a host, it will prevent the discovery of Windows devices, as Discovery will not be able to communicate with the WMI Collector or execute WMI queries on the target device123.

:

How to resolve a failure to communicate with the WMI Collector during top-down discovery - Support and Troubleshooting - Now Support Portal Windows discovery without 'domain admin' or 'local admin' privileges ? - Support and Troubleshooting - Now Support Portal Discovery - ServiceNow Elite

## NEW QUESTION # 42

Which of the following choices must be installed on a MID Server to run Credential-less Discovery?

- A. Credential-less Extension
- B. Advanced IP Scanner
- C. Defender
- D. **Nmap**

**Answer: D**

Explanation:

Credential-less Discovery is a feature of ServiceNow Discovery that allows the instance to identify configuration items (CIs) without using credentials. Credential-less Discovery uses Network Mapper (Nmap), a free and open-source network scanner, to collect information about the CIs by sending packets and analyzing the responses. Nmap must be installed on the MID Server that runs Credential-less Discovery. Credential-less Discovery can be used as a fallback option when credential-based probes fail, or as a primary option for scanning certain types of devices, such as network devices, printers, or IoT devices<sup>12</sup>.
