Microsoft DP-300 Exam Success Tips For Passing Your Exam on the First Try
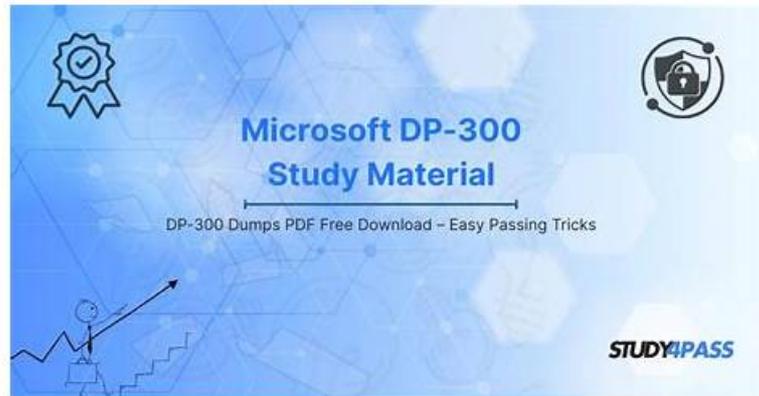

Users are buying something online (such as DP-300 learning materials), always want vendors to provide a fast and convenient sourcing channel to better ensure the user's use. Because without a quick purchase process, users of our DP-300 learning materials will not be able to quickly start their own review program. So, our company employs many experts to design a fast sourcing channel for our DP-300 Learning Materials. All users can implement fast purchase and use our learning materials.

Microsoft DP-300 certification exam is a valuable credential for professionals who want to demonstrate their expertise in cloud-based database administration. By passing the exam, candidates can prove that they have the skills and knowledge needed to effectively manage and optimize databases on Microsoft Azure, making them a sought-after asset in the technology industry.

Earning the Microsoft Certified: Azure Database Administrator Associate certification by passing the DP-300 exam can help professionals demonstrate their expertise in this field, which can lead to better job opportunities and higher salaries. Administering Relational Databases on Microsoft Azure certification is also a valuable asset for organizations that use Microsoft Azure for their database management needs, as it ensures that their database administrators have the necessary skills to effectively manage and maintain their databases in the cloud.

Microsoft DP-300 Exam consists of multiple-choice questions and performance-based tasks that require candidates to demonstrate their ability to perform various database administration tasks on Azure. DP-300 exam is divided into several sections, each of which covers a specific area of database administration. Candidates must score at least 700 out of 1000 points to pass the exam.

With our DP-300 learning materials, what you receive will never be only the content of the material, but also our full-time companionship and meticulous help. After you have successfully paid, we will send all the DP-300 information to your email within 10 minutes. During your installation, our DP-300 study guide is equipped with a dedicated staff to provide you with free remote online guidance.

Microsoft Administering Relational Databases on Microsoft Azure Sample Questions (Q90-Q95):

NEW QUESTION # 90
You have an Azure SQL database that contains a table named factSales. FactSales contains the columns shown in the following table.

FactSales has 6 billion rows and is loaded nightly by using a batch process.
Which type of compression provides the greatest space reduction for the database?

- A. page compression

- B. columnstore archival compression
- C. row compression
- D. columnstore compression

Answer: B

Explanation:
Columnstore tables and indexes are always stored with columnstore compression. You can further reduce the size of columnstore data by configuring an additional compression called archival compression.
Note: Columnstore - The columnstore index is also logically organized as a table with rows and columns, but the data is physically stored in a column-wise data format.

https://docs.microsoft.com/en-us/sql/relational-databases/data-compression/data-compression

NEW QUESTION # 91
You need to recommend a configuration for ManufacturingSQLDb1 after the migration to Azure. The solution must meet the business requirements.
What should you include in the recommendation? To answer, select the appropriate options in the answer area.
NOTE:Each correct selection is worth one point.

Answer:

Explanation:
Explanation
Scenario: Business Requirements
Litware identifies business requirements include: meet an SLA of 99.99% availability for all Azure deployments.
Box 1: Cloud witness
If you have a Failover Cluster deployment, where all nodes can reach the internet (by extension of Azure), it is recommended that you configure a Cloud Witness as your quorum witness resource.
Box 2: Azure Basic Load Balancer
Microsoft guarantees that a Load Balanced Endpoint using Azure Standard Load Balancer, serving two or more Healthy Virtual Machine Instances, will be available 99.99% of the time.
Note: There are two main options for setting up your listener: external (public) or internal. The external (public) listener uses an internet facing load balancer and is associated with a publicVirtual IP (VIP) that is accessible over the internet. An internal listener uses an internal load balancer and only supports clients within the same Virtual Network.

NEW QUESTION # 92
HOTSPOT
You have SQL Server on an Azure virtual machine.
You review the query plan shown in the following exhibit.
For each of the following statements, select yes if the statement is true. Otherwise, select no.
NOTE: Each correct selection is worth one point.
Hot Area:

Answer:

Explanation:
Section: [none]
Explanation/Reference:
https://docs.microsoft.com/en-us/sql/relational-databases/performance/monitoring-performance-by-using-the-query-store

NEW QUESTION # 93

Hotspot Question

You have an Azure subscription that contains an Azure SQL database named DB1 and a managed identity.

You need to create a user in DB1 that will be used by the managed identity to perform automated tasks.

How should you complete the query? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: FROM EXTERNAL PROVIDER

Create a user-assigned managed identity

Box 2: OBJECT_ID

The above syntax allows creation of Microsoft Entra users without validation. For this to work, the Object Id of the Microsoft Entra principal would have to be supplied and used as an SID in the T- SQL statement.

The validity check of the Object Id is the responsibility of the user running the T-SQL statement.

Reference:

https://learn.microsoft.com/en-us/azure/azure-sql/database/authentication-azure-ad-user-assigned-managed-identity

NEW QUESTION # 94

You have an Azure SQL database named DBI that contains a nonclustered index named index1.

End users report slow queries when they use index1.

You need to identify the operations that are being performed on the index.

Which dynamic management view should you use?

- A. Option C
- B. Option D
- C. Option A
- D. Option B

Answer: B

NEW QUESTION # 95

......

As we all know, it is difficult to prepare the DP-300 exam by ourselves. Excellent guidance is indispensable. If you urgently need help, come to buy our study materials. Our company has been regarded as the most excellent online retailers of the DP-300 exam question. So our assistance is the most professional and superior. You can totally rely on our study materials to pass the exam. All the key and difficult points of the DP-300 exam have been summarized by our experts. They have rearranged all contents, which is convenient for your practice. Perhaps you cannot grasp all crucial parts of the DP-300 Study Tool by yourself. You also can refer to other candidates' review guidance, which might give you some help. Then we can offer you a variety of learning styles. Our printable DP-300 real exam dumps, online engine and windows software are popular among candidates. So you will never feel bored when studying on our DP-300 study tool.
