While practicing on SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management C_TS414_2023 practice test software you will experience the real-time SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management C_TS414_2023 exam environment for preparation. This will help you to understand the pattern of final SAP C_TS414_2023 exam questions and answers.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q28-Q33):

NEW QUESTION # 28

You have created a new business inspection process and need to customize a new inspection type. Which of the following activities are mandatory? Note: There are 2 correct answers to this question.

- A. Assign the new inspection type to a number range
- **B. Assign the new inspection type to a predefined inspection lot origin**
- **C. Assign a task list type to the new inspection type**
- D. Define default values for the new inspection type

Answer: B,C

Explanation:

Creating a new inspection type in SAP QM (SPRO > QM > Quality Inspection > Inspection Lot Creation > Maintain Inspection Types) requires:

* Assign a Task List Type to the New Inspection Type (A): The inspection type (e.g., custom Z01) must be linked to a task list type (e.g., Q for inspection plans) to define the inspection scope, a mandatory step.

* Assign the New Inspection Type to a Predefined Inspection Lot Origin (C): The type must be assigned to an inspection lot origin (e.g., 01 for GR) to determine when lots are created, a required configuration.

* Assign the New Inspection Type to a Number Range (B): Number ranges are assigned to origins, not directly to types, so this is optional.

* Define Default Values for the New Inspection Type (D): Defaults (e.g., UD settings) are optional enhancements, not mandatory. Thus, "Assign a task list type to the new inspection type" and "Assign the new inspection type to a predefined inspection lot origin" are the correct answers. References: SAP Help Portal - "Customizing Inspection Types"; SAP S/4HANA QM Customizing Guide - "Inspection Lot Creation".

NEW QUESTION # 29

Which of the following can you use to explore released APIs?

- **A. SAP Business Accelerator Hub**
- B. SAP Application Interface Framework
- C. SAP Integration Suite

Answer: A

Explanation:

To explore released APIs in SAP S/4HANA:

* SAP Business Accelerator Hub (B): Formerly SAP API Business Hub, this is the official platform (<https://api.sap.com>) to explore, test, and access released APIs for SAP S/4HANA, including QM- related APIs (e.g., Inspection Lot API). It's the standard tool as of 2025.

* SAP Application Interface Framework (A): AIF is for monitoring and managing interfaces, not exploring APIs.

* SAP Integration Suite (C): This is for building integrations, not a primary API exploration tool.

Thus, "SAP Business Accelerator Hub" is the correct answer (single-choice context assumed). References: SAP Help Portal - "SAP Business Accelerator Hub"; SAP S/4HANA Developer Guide - "APIs".

NEW QUESTION # 30

The quality inspector records defects in results recording for a material inspection. When creating notification the system determines

the catalog profile by consulting objects in which of following sequences?

- A. Material - Notification Type - report type
- B. report type - Notification Type - Material
- C. report type - Material - Notification Type
- D. Notification Type - report type - Material

Answer: A

NEW QUESTION # 31

Which of the following documents can you use as a reference document when creation a customer claim?(2 correct ans)

- A. Quotation
- B. Material document
- C. Sales order
- D. QM order
- E. Delivery

Answer: C,E

NEW QUESTION # 32

You want to print a certificate for an outbound delivery, at which level is a certificate printed?

- A. Delivery header level
- B. material level
- C. Shipping point level
- D. Delivery Item level

Answer: D

NEW QUESTION # 33

.....

It is our promissory announcement on our C_TS414_2023 exam questions that you will get striking by these viable ways.
