Our Microsoft AI-900 can help you clear exams at first shot. We promise that we provide you with best quality Microsoft AI-900 original questions and competitive prices. We provide one year studying assist service and one year free updates downloading of Microsoft Azure AI Fundamentals exam questions.

The Microsoft Azure AI Fundamentals certification exam consists of multiple-choice questions and is designed to be completed in one hour. AI-900 exam can be taken online or in-person at a testing center. The passing score for the exam is 700 out of 1000. AI-900 exam fee is \$99 USD, and Microsoft offers free online training courses to help candidates prepare for the exam.

Microsoft AI-900 exam, also known as the Microsoft Azure AI Fundamentals exam, is a certification exam that tests individuals on their knowledge of artificial intelligence and its applications in Microsoft Azure. AI-900 exam is designed for individuals who are interested in learning about AI and its practical use in the cloud, and for those who are looking to gain a basic understanding of AI terminology, concepts and technologies.

The AI-900 Exam covers a wide range of topics related to AI and ML such as Understanding AI workloads and considerations, Understanding fundamental principles of machine learning on Azure, Understanding features of computer vision workloads on Azure, Understanding features of Natural Language Processing (NLP) workloads on Azure, Understanding features of conversational AI workloads on Azure, and many more.

Additionally, all operating systems also support this format. The third format is the desktop AI-900 Practice Exam software. It is ideal for users who prefer offline Microsoft Azure AI Fundamentals (AI-900) exam practice. This format is supported by Windows computers and laptops. You can easily install this software in your system to use it anytime to prepare for the examination.

Microsoft Azure AI Fundamentals Sample Questions (Q145-Q150):

NEW QUESTION # 145

You are designing a system that will generate insurance quotes automatically.

Match the Microsoft responsible AI principles to the appropriate requirements.

To answer, drag the appropriate principle from the column on the left to its requirement on the right. Each principle may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Principles

- Accountability
- Fairness
- Inclusiveness
- Privacy and security
- Reliability and safety
- Transparency

Answer Area

The decision-making process must be recorded so that staff can identify the reasoning behind a particular quote:

A customer's personal information must be visible only to staff who are involved in the decision-making process:

The system must be accessible to customers who use screen readers or other assistive technology:

Answer:

Explanation:

Principles

- Accountability
- Fairness
- Inclusiveness
- Privacy and security
- Reliability and safety
- Transparency

Answer Area

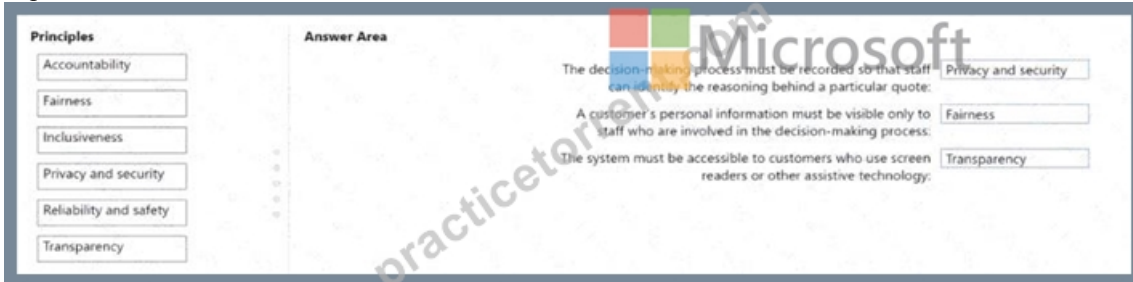

The decision-making process must be recorded so that staff can identify the reasoning behind a particular quote:

A customer's personal information must be visible only to staff who are involved in the decision-making process:

The system must be accessible to customers who use screen readers or other assistive technology:

Explanation:

Microsoft's Responsible AI principles are the foundation for developing and deploying ethical and trustworthy AI systems. The six key principles are Fairness, Reliability and Safety, Privacy and Security, Inclusiveness, Transparency, and Accountability. Each principle guides specific practices for ensuring AI systems operate responsibly in real-world applications like automated insurance quoting systems.

* Transparency - This principle ensures that the AI's decisions can be understood and explained.

Recording the decision-making process and enabling staff to trace how a quote was generated aligns with transparency. It allows stakeholders to interpret the reasoning behind model outputs, ensuring that the AI behaves predictably and ethically.

* Privacy and Security - This principle focuses on protecting personal data and ensuring that sensitive information is handled responsibly. Limiting access to customer data only to authorized personnel maintains compliance with privacy laws (like GDPR) and safeguards against misuse. Microsoft emphasizes that AI systems should maintain strict control over data visibility and integrity.

* Inclusiveness - This principle ensures that AI systems are accessible to all users, including people with disabilities. By supporting screen readers and assistive technologies, the system ensures equal access to information and services for every customer.

Inclusiveness prevents discrimination and promotes accessibility, both of which are central to Microsoft's Responsible AI strategy.

Thus, the correct mapping of principles is:

- * Decision process # Transparency
- * Personal information visibility # Privacy and Security
- * Accessibility via screen readers # Inclusiveness.

NEW QUESTION # 146

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Azure Machine Learning designer provides a drag-and-drop visual canvas to build, test, and deploy machine learning models.	<input type="radio"/>	<input type="radio"/>
Azure Machine Learning designer enables you to save your progress as a pipeline draft.	<input type="radio"/>	<input type="radio"/>
Azure Machine Learning designer enables you to include custom JavaScript functions.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area Microsoft

Statements	Yes	No
Azure Machine Learning designer provides a drag-and-drop visual canvas to build, test, and deploy machine learning models.	<input checked="" type="radio"/>	<input type="radio"/>
Azure Machine Learning designer enables you to save your progress as a pipeline draft.	<input checked="" type="radio"/>	<input type="radio"/>
Azure Machine Learning designer enables you to include custom JavaScript functions.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation

Answer Area

Statements	Yes	No
Azure Machine Learning designer provides a drag-and-drop visual canvas to build, test, and deploy machine learning models.	<input checked="" type="radio"/>	<input type="radio"/>
Azure Machine Learning designer enables you to save your progress as a pipeline draft.	<input checked="" type="radio"/>	<input type="radio"/>
Azure Machine Learning designer enables you to include custom JavaScript functions.	<input type="radio"/>	<input checked="" type="radio"/>

Box 1: Yes

Azure Machine Learning designer lets you visually connect datasets and modules on an interactive canvas to create machine learning models.

Box 2: Yes

With the designer you can connect the modules to create a pipeline draft.

As you edit a pipeline in the designer, your progress is saved as a pipeline draft.

Box 3: No

NEW QUESTION # 147

You plan to apply Text Analytics API features to a technical support ticketing system.

Match the Text Analytics API features to the appropriate natural language processing scenarios.

To answer, drag the appropriate feature from the column on the left to its scenario on the right. Each feature may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

API Features

Entity recognition

Key phrase extraction

Language detection

Sentiment analysis

Answer Area

API Feature

Understand how upset a customer is based on the text contained in the support ticket.

API Feature

Summarize important information from the support ticket.

API Feature

Extract key dates from the support ticket.

Answer:

Explanation:

API Features

Entity recognition

Key phrase extraction

Language detection

Sentiment analysis

Answer Area

Sentiment analysis

Understand how upset a customer is based on the text contained in the support ticket.

Key phrase extraction

Summarize important information from the support ticket.

Entity recognition

Extract key dates from the support ticket.

NEW QUESTION # 148

To complete the sentence, select the appropriate option in the answer area.

Answer Area

The handling of unusual or missing values provided to an AI system is a consideration for the Microsoft principle for responsible AI.

- inclusiveness
- privacy and security
- reliability and safety
- transparency

Answer:

Explanation:

Answer Area

The handling of unusual or missing values provided to an AI system is a consideration for the Microsoft principle for responsible AI.

- inclusiveness
- privacy and security
- reliability and safety
- transparency

NEW QUESTION # 149

You need to build an app that will read recipe instructions aloud to support users who have reduced vision. Which version service should you use?

- A. Translator Text
- B. Language Understanding (LUIS)
- C. Text Analytics
- D. Speech

Answer: D

Explanation:

Section: Describe features of Natural Language Processing (NLP) workloads on Azure Explanation/Reference: <https://azure.microsoft.com/en-us/services/cognitive-services/text-to-speech/#features>

NEW QUESTION # 150

.....

It is very important for us to keep pace with the changeable world and update our knowledge if we want to get a good job, a higher standard of life and so on. First, we need to get a good AI-900 quiz prep. Because we only pass AI-900 exam and get a certificate, we can have the chance to get a decent job and make more money. But there are question is that how you can pass the AI-900 Exam and get a certificate. The best answer is to download and learn our AI-900 quiz torrent. Our products will help you get what you want in a short time.
