## Data-Architect Book Free & Reliable Data-Architect Braindumps Free

If you buy our Data-Architect training quiz, you will find three different versions are available on our test platform. According to your

need, you can choose the suitable version of our Data-Architect exam questions for you. The three different versions of our Data-Architect Study Materials include the PDF version, the software version and the online version. We can promise that the three different versions are equipped with the high quality for you to pass the exam.

To be eligible for the Salesforce Data-Architect exam, candidates must have a minimum of five years of experience in data architecture and management, including at least two years of experience working with the Salesforce platform. They must also hold one of the prerequisite certifications, such as Salesforce Certified Application Architect or Salesforce Certified System Architect. Passing the Salesforce Data-Architect Exam is a significant achievement that demonstrates a deep understanding of Salesforce data architecture and management, and it can open up new career opportunities in the field.

## Salesforce Certified Data Architect Sample Questions (Q26-Q31):

### NEW QUESTION # 26

Northern Trail Outfitters (NTO) has an external product master system that syncs product and pricing information with Salesforce. Users have been complaining that they are seeing discrepancies in product and pricing information displayed on the NTO website and Salesforce.

As a data architect, which action is recommended to avoid data sync issues?

- **A. Use the Customer 360 data manager to sync product and pricing information from product master database to Salesforce.**
- B. Build a custom integration for two-way sync of product and pricing information between product master to Salesforce.
- C. Implement a manual process to update the products from an extract from the products master on a weekly basis.
- D. Build a custom integration for one-way sync of product and pricing information from product master to Salesforce.

**Answer: A**

### NEW QUESTION # 27

Universal Containers is integrating a new Opportunity engagement system with Salesforce. According to their Master Data Management strategy, Salesforce is the system of record for Account, Contact, and Opportunity data. However, there does seem to be valuable Opportunity data in the new system that potentially conflicts with what is stored in Salesforce. What is the recommended course of action to appropriately integrate this new system?

- **A. Stakeholders should be brought together to discuss the appropriate data strategy moving forward.**
- B. A policy should be adopted so that the system whose record was most recently updated should prevail in conflicts.
- C. The Opportunity engagement system should become the system of record for Opportunity records.
- D. The MDM strategy defines Salesforce as the system of record, so Salesforce Opportunity values prevail in all conflicts.

**Answer: A**

Explanation:

The recommended course of action to appropriately integrate the new Opportunity engagement system with Salesforce is to bring the stakeholders together to discuss the appropriate data strategy moving forward. This is because there may be valuable data in both systems that need to be reconciled and harmonized, and the Master Data Management (MDM) strategy may need to be revised or updated to accommodate the new system. The other options are not recommended, as they may result in data loss, inconsistency, or duplication.

### NEW QUESTION # 28

Cloud Kicks stores Invoice records in a custom object. Invoice records are being sent to the Accounting department with missing States and incorrectly formatted Postal Codes.

Which two actions should Cloud Kicks take to improve data quality? (Choose two.)

- A. Change each address field to required on the Page Layout.
- **B. Utilize a Validation Rule with a REGEX operator on Postal Code.**
- **C. Utilize a Validation Rule with a CONTAINS operator on address fields.**
- D. Write an Apex Trigger to require all fields to be populated.

**Answer: B,C**

### NEW QUESTION # 29

A data architect is working with a large B2C retailer and needs to model the consumer account structure in Salesforce. What standard feature should be selected in this scenario?

- A. Contacts
- **B. Person Accounts**
- C. Individual Accounts
- D. Account Contact

**Answer: B**

### NEW QUESTION # 30

In their legacy system, Universal Containers has a monthly accounts receivable report that compiles data from Accounts, Contacts, Opportunities, Orders, and Order Line Items. What difficulty will an architect run into when implementing this in Salesforce?

- A. A report cannot contain data from Accounts and Contacts.
- B. Salesforce does not support Orders or Order Line Items.
- **C. Salesforce allows up to four objects in a single report type.**
- D. Custom report types cannot contain Opportunity data.

**Answer: C**

### NEW QUESTION # 31

.....

Are you in the condition that you want to make progress but you don't know how to and you are a little lost in the preparation. Perhaps you need help with our Data-Architect preparation materials.
