You can learn FCP_FAZ_AD-7.4 quiz torrent skills and theory at your own pace, and you are not necessary to waste your time on some useless books or materials and you will save more time and energy that you can complete other thing. We also provide every candidate who wants to get certification with free Demo to check our materials. It is time for you to realize the importance of our FCP_FAZ_AD-7.4 Test Prep, which can help you solve these annoyance and obtain a FCP_FAZ_AD-7.4 certificate in a more efficient and productive way.

Fortinet FCP_FAZ_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Device Management: Here, Fortinet network and security analysts are evaluated on their ability to handle devices linked to FortiAnalyzer. This includes adding new devices, managing them efficiently, and troubleshooting communication issues.
Topic 2	<ul style="list-style-type: none"> Logs and Reports Management: This part of the exam measures the candidate's ability to handle log data and generate reports using FortiAnalyzer. Network and security analysts must show proficiency in managing, analyzing, and reviewing logs to ensure effective system monitoring and auditing processes are in place.
Topic 3	<ul style="list-style-type: none"> System Configuration: This section assesses the capabilities of network and security analysts in managing FortiAnalyzer systems. It includes tasks like performing initial configurations, setting up high-availability systems, and configuring RAID for storage.
Topic 4	<ul style="list-style-type: none"> Administration: This section evaluates the ability of network and security analysts to configure administrative access and manage Administrative Domains (ADOMs). It covers tasks such as setting user permissions, managing backups, and disk quotas, and ensuring secure and efficient management of administrative privileges within FortiAnalyzer systems.

Latest FCP_FAZ_AD-7.4 Exam Format & Key FCP_FAZ_AD-7.4 Concepts

Under the hatchet of fast-paced development, we must always be cognizant of social long term goals and the direction of the development of science and technology. Adapt to the network society, otherwise, we will take the risk of being obsoleted. Our FCP

- FortiAnalyzer 7.4 Administrator qualification test help improve your technical skills and more importantly, helping you build up confidence to fight for a bright future in tough working environment. Our professional experts devote plenty of time and energy to developing the FCP_FAZ_AD-7.4 Study Tool. You can trust us and let us be your honest cooperater in your future development. Here are several advantages about our FCP - FortiAnalyzer 7.4 Administrator exam for your reference. We sincere suggest you to spare some time to have a glance over the following items.

Fortinet FCP - FortiAnalyzer 7.4 Administrator Sample Questions (Q126-Q131):

NEW QUESTION # 126

In a Fortinet Security Fabric, what can make an upstream FortiGate create traffic logs associated with sessions initiated on downstream FortiGate devices?

- A. The traffic destination is another FortiGate in the fabric.
- **B. The upstream FortiGate is configured to do NAT**
- C. The downstream device cannot connect to FortiAnalyzer.
- D. Log redundancy is configured in the fabric.

Answer: B

Explanation:

When the upstream FortiGate is performing Network Address Translation (NAT), it creates new session entries for traffic passing through it. As a result, it generates its own traffic logs for those sessions, even if the sessions were initiated on a downstream FortiGate. This is because the upstream FortiGate is altering the source IP address, making it responsible for tracking the session details.

NEW QUESTION # 127

Refer to the exhibit.

What does the data point at 12:20 indicate?

- A. FortiAnalyzer is using its cache to avoid dropping logs.
- B. The log insert lag time is increasing.
- C. The performance of FortiAnalyzer is below the baseline.
- **D. The sqlplugin service is caught up with new logs.**

Answer: D

NEW QUESTION # 128

FortiAnalyzer reports are dropping analytical data from 15 days ago, even though the data policy setting for analytics logs is 60 days.

What is the most likely problem?

- A. Logs are rolling before the report is run
- B. CPU resources are too high
- C. Disk utilization for archive logs is set for 15 days
- D. Quota enforcement is acting on analytical data before a report is complete

Answer: A

NEW QUESTION # 129

Which statement is true when you are upgrading the firmware on an HA cluster made up of three FortiAnalyzer devices?

- A. You can perform the firmware upgrade using only a console connection.
- B. All FortiAnalyzer devices will be upgraded at the same time.
- C. Enabling uninterruptible-upgrade prevents normal operations from being interrupted during the upgrade.
- D. First, upgrade the secondary devices, and then upgrade the primary device.

Answer: D

Explanation:

In an HA cluster, the firmware upgrade process involves upgrading the secondary devices first. This approach ensures that the primary device can continue to handle traffic and maintain the operational stability of the network while the secondary devices are being upgraded. Once the secondary devices have successfully upgraded their firmware and are operational, the primary device can then be upgraded. This method minimizes downtime and maintains network integrity during the upgrade process.

When upgrading firmware in a High Availability (HA) cluster of FortiAnalyzer units, the recommended practice is to first upgrade the secondary devices before upgrading the primary device. This approach ensures that the primary device, which coordinates the cluster's operations, remains functional for as long as possible, minimizing the impact on log collection and analysis. Once the secondary devices are successfully upgraded and operational, the primary device can be upgraded, ensuring a smooth transition and maintaining continuous operation of the cluster.

NEW QUESTION # 130

You are using RAID with a FortiAnalyzer that supports software RAID, and one of the hard disks on FortiAnalyzer has failed.

What is the recommended method to replace the disk?

- A. Clear all RAID alarms and replace the disk while FortiAnalyzer is still running
- B. Perform a hot swap
- C. Shut down FortiAnalyzer and then replace the disk
- D. Downgrade your RAID level, replace the disk, and then upgrade your RAID level

Answer: C

Explanation:

<https://community.fortinet.com/t5/FortiAnalyzer/Technical-Note-How-to-swap-Hard-Disk-on-FortiAnalyzer/ta-p/194997?externalID=FD41397#:~:text=If%20a%20hard%20disk%20on,process%20known%20as%20hot%20swapping>

NEW QUESTION # 131

.....

If you want to pass your FCP_FAZ_AD-7.4 exam and get the FCP_FAZ_AD-7.4 certification which is crucial for you successfully, I highly recommend that you should choose the FCP_FAZ_AD-7.4 certification preparation materials from our company so that you can get a good understanding of the FCP_FAZ_AD-7.4 Exam that you are going to prepare for. We believe that if you decide to buy the FCP_FAZ_AD-7.4 exam materials from our company, you will pass your exam and get the FCP_FAZ_AD-7.4 certification in a more relaxed way than other people.
