With the development of IT technology in recent, many people choose to study IT technology which lead to lots of people join the IT industry. So, the competition is in fierce in IT industry. With working in IT industry and having IT dream, you don't expect to be caught up by other people which need you to improve your IT skills to prove your ability. How do you want to prove your ability? More and more people prove themselves by taking IT certification exam. Do you want to get the certificate? You must first register Huawei H12-711\_V4.0 Exam. H12-711\_V4.0 test is the important exam in Huawei certification exams which is well recognized.

Huawei H12-711\_V4.0 (HCIA-Security V4.0) Certification Exam is an industry-recognized certification designed to enhance the competency levels of security professionals. HCIA-Security V4.0 certification exam focuses on providing the foundational understanding of network security and the practical skills required to handle security incidents. H12-711\_V4.0 Exam is intended to validate the candidate's knowledge of security technologies and network security operations, including security management, firewall implementation, intrusion prevention, and virtual private network technologies.

### Authentic H12-711\_V4.0 Exam Hub - H12-711\_V4.0 Authorized Certification

Each question presents the key information to the learners and each answer provides the detailed explanation and verification by the senior experts. The success of our H12-711\_V4.0 study materials cannot be separated from their painstaking efforts. Our system will do an all-around statistics of the sales volume of our H12-711\_V4.0 Study Materials at home and abroad and our clients' positive feedback rate of our H12-711\_V4.0 study materials. Our system will deal with the clients' online consultation and refund issues promptly and efficiently. So our system is great.

### Huawei HCIA-Security V4.0 Sample Questions (Q135-Q140):

### NEW QUESTION # 135

In a stateful inspection firewall, when the stateful inspection mechanism is turned on, when the second message (SYN+ACK) of the three-way handshake reaches the firewall, if there is no corresponding session table on the firewall, which of the following descriptions is correct?

- A. The packet must pass through the firewall and a session can be established.
- B. If the firewall security policy allows the packet to pass, create a session table
- **C. The packet must not pass through the firewall**
- D. The firewall does not create a session table, but allows packets to pass through.

**Answer: C**

### NEW QUESTION # 136

Which of the following attributes are contained in the distinguished name DN in LDAP?

- A. DIT
- **B. DC**
- **C. CN**
- **D. OU**

**Answer: B,C,D**

Explanation:

In LDAP, a Distinguished Name or DN is used to uniquely identify an entry in the directory tree. The DN is composed of a sequence of attribute-value pairs that describe the exact location of an object within the LDAP directory hierarchy. Common attributes used in a DN include CN, DC, and OU.

CN stands for Common Name and is often used to identify a specific user, host, or object. OU stands for Organizational Unit and is used to represent a department or subdivision within the directory structure. DC stands for Domain Component and is commonly used to describe parts of a domain name, such as dc=example,dc=com.

On the other hand, DIT stands for Directory Information Tree. It refers to the overall hierarchical structure of the LDAP directory, not an attribute contained inside a DN. In other words, DIT describes the tree itself, while CN, OU, and DC are actual naming attributes used to build the DN of an LDAP object.

Therefore, the correct attributes contained in the DN are CN, DC, and OU.

### NEW QUESTION # 137

Which of the following types of packets cannot be filtered by a packet filtering firewall?

- A. Forged ICMP error packets
- **B. Non-initial fragments**
- C. Non-fragmented packets
- D. Initial fragments

**Answer: B**

Explanation:

Explanation From HCIA-Security documents:

A traditional packet filtering firewall mainly makes forwarding decisions based on information in the packet header, typically using fields such as source/destination IP address, protocol type, and for TCP/UDP traffic the source/destination port numbers in the transport-layer header. This works well for non-fragmented packets, because the IP header and the complete transport-layer header are present, and it can also work for initial fragments because the first fragment usually contains the transport-layer header (including ports) along with the IP header.

However, non-initial fragments (fragments after the first one) usually contain only the IP header and a continuation of the payload, but do not include the TCP/UDP header where port numbers and some key identifying fields exist. Because a packet filtering firewall relies on these transport-layer fields to match many rules, it cannot accurately apply port-based filtering to non-initial fragments. This limitation is why fragmentation can be abused to bypass basic filtering, and why more advanced firewalls/IPS features include fragment reassembly and deeper inspection. Therefore, non-initial fragments are the type that cannot be effectively filtered by a packet filtering firewall.

### NEW QUESTION # 138

According to the HiSec solution, please drag the device on the left into the logical architecture layer to which it belongs on the right.

**Answer:**

Explanation:

CIS - Analyzer

SecoManager - Controller

Switch - actuator

### NEW QUESTION # 139

Regarding the deployment method of Huawei IPS, which of the following options are incorrectly described? (Multiple Choice)

- A. Direct connection deployment can identify network traffic in real time, but cannot effectively control it.
- B. Bypass deployment can identify network traffic in real time, but cannot effectively control it.
- C. Bypass deployment can identify and control network traffic in real time
- D. Directly connected router, which can identify and control network traffic in real time

**Answer: A,C**

### NEW QUESTION # 140

.....

Our company always lays great emphasis on offering customers more wide range of choice. Now, we have realized our promise. Our H12-711\_V4.0 exam guide almost covers all kinds of official test and popular certificate. So you will be able to find what you need easily on our website. Every H12-711\_V4.0 exam torrent is professional and accurate, which can greatly relieve your learning pressure. In the meantime, we have three versions of product packages for you. They are PDF version, windows software and online engine of the H12-711\_V4.0 Exam Prep. The three versions of the study materials packages are very popular and cost-efficient now. With the assistance of our study materials, you will escape from the pains of preparing the exam. Of course, you can purchase our H12-711\_V4.0 exam guide according to your own conditions. All in all, you have the right to choose freely. You will not be forced to buy the packages.
