Citrix Virtual Apps and Desktops Administration Sample Questions (Q52-Q57):

NEW QUESTION # 52
After creating a new machine catalog using the Machine Creation Services (MCS) wizard in Citrix Studio, a Citrix Administrator determines that Windows activation fails for all new machines in that catalog.
Which two conditions can cause this to happen? (Choose two.)

- A. The base image rearm count has been exceeded.
- B. The Microsoft License Server is unreachable.
- C. The version of Windows installed uses Multiple Activation Key (MAK) licensing.
- D. The version of Windows installed is Windows Server 2012 R2.

Answer: A,C

Explanation:
Rearm count exceeded: If the base image has been sysprepped too many times, the rearm count may be exhausted, preventing Windows activation on cloned machines.
MAK licensing: MCS-provisioned machines are treated as newly deployed instances. MAK licensing is not suitable for this scenario because each clone would require its own activation, leading to failures.

NEW QUESTION # 53

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a large number of Windows users running various locally attached client printers. No network printers are being used. The administrator has enabled the HDX printer mapping policy to 'Auto-create all client printers', which has resulted in a large number of drivers being loaded onto the Virtual Delivery Agent (VDA) machines. New standards are requiring the administrator to limit these Windows drivers on the VDA machines. Which printing feature can the administrator enable to meet the new standards?

- A. The Auto-create local (non-network) client printers only policy
- B. The Citrix Universal Printer Driver
- C. The Auto-create PDF universal printer policy
- D. The Citrix Universal Print Server

Answer: B

Explanation:
Enabling the Citrix Universal Printer Driver allows client printers to be auto-created without requiring individual printer drivers to be installed on the VDA machines. This standardizes printing, reduces driver sprawl, and meets compliance requirements by minimizing the number of Windows drivers on the VDAs.

NEW QUESTION # 54

A Citrix Administrator is configuring a Citrix Virtual Desktops Site for use with a mirrored SQL Server database. Which setting In SQL is important that the administrator configure manually when creating an empty database on the principal SQL Server?

- A. SQL Mirroring Version
- B. Database Type Setting
- C. Collation Setting
- D. SQL Version Number

Answer: C

Explanation:
When configuring a Citrix Virtual Desktops Site with a mirrored SQL Server database, the collation setting must be configured manually and must match across all SQL Servers in the mirroring setup. Citrix relies on consistent collation to ensure proper database functionality.

NEW QUESTION # 55

Scenario: A Citrix Administrator is investigating an issue in which a user's session does NOT successfully end after closing the last published application. The administrator used Task Manager to inspect the hanging session but could NOT find any relevant information. Which tool could the administrator use to get further details on orphaned processes in the session?

- A. Regmon
- B. Process Explorer
- C. Handle
- D. Procmon

Answer: B

Explanation:
Process Explorer provides detailed insight into running processes, their parent-child relationships, and resource usage. It is the best tool to identify orphaned processes that prevent a Citrix session from ending after the last application is closed.

NEW QUESTION # 56

Which command must a Citrix Administrator run on the Citrix Director machine to integrate the NetScaler Console appliance with Citrix Director?

- A. DirectorConfig.exe /configscom
- B. Set-MonitorConfiguration
- C. DirectorConfig.exe /confignetscaler
- D. Set-LogSite

Answer: C

Explanation:
To integrate the NetScaler (Citrix ADC) Console with Citrix Director, the administrator must run the command DirectorConfig.exe /confignetscaler on the Director machine. This enables Director to display NetScaler Gateway and HDX Insight data.
