The Resource Conservation and Recovery Act (RCRA) was enacted to protect public health from

- A. improper disposal of used needles.
- B. improper medical waste management.
- C. hospital incinerator emissions.
- D. improper management of hazardous wastes.

Answer: D

Explanation:

The RCRA (1976) governs the proper management of hazardous waste from generation to disposal ("cradle to grave"). - B. categorizes risk assessments
- C. ensures compliance with TJC standards
- D. identifies hazards

Answer: D

Explanation:

NEW QUESTION # 31

Which scenario is best for managing an inventory of repair parts?

- A. Purchase spare parts from suppliers as replacements are needed.
- B. Purchase one spare part in inventory for each part in use.
- **C. Purchase one spare part in inventory for all patient equipment parts in use.**
- D. Purchase critical spare parts from suppliers on an annual basis.

Answer: C

Best practice in healthcare facilities management is to keep one critical spare part for each unique piece of patient-care equipment (not for every unit). This approach balances patient safety and risk mitigation while avoiding excessive storage costs.

A: "As needed" creates downtime risk.

B: Annual bulk purchase may leave gaps in urgent needs.

D: One-for-one spares is excessive, costly, and impractical.

NEW QUESTION # 32

A hospital will purchase builder risk insurance to address which of the following?

- **A. replacement or repair value of a damaged structure**
- B. payment to subcontractors in the event the prime contractor fails to pay subcontractors
- C. medical costs in the event a worker gets hurt on a construction site
- D. liability caused by general contractor default

Answer: A

Explanation:

Builder's risk insurance is first-party property insurance that covers physical loss to the work under construction, including the replacement or repair value of a structure and materials during the construction period.
