

Quiz 2026 300-610: Authoritative Designing Cisco Data Center Infrastructure Prep Guide

BTW, DOWNLOAD part of VCEPrep 300-610 dumps from Cloud Storage: https://drive.google.com/open?id=10TGfL0SL3PZQN_T6E9X01DT_WcBdnwm

These formats are 300-610 web-based practice test software, desktop practice exam software, and Designing Cisco Data Center Infrastructure (300-610) PDF dumps files. All these three 300-610 exam questions formats are easy to use and compatible with all devices and the latest web browsers. Just choose the right Designing Cisco Data Center Infrastructure (300-610) exam dumps format and start Cisco 300-610 exam questions preparation today. As far as the prices of 300-610 exam dumps are concerned, we ensure you that our Designing Cisco Data Center Infrastructure (300-610) exam questions prices are entirely affordable for everyone.

Our company has always been following the trend of the 300-610 certification. Our research and development team not only study what questions will come up in the exam, but also design powerful study tools like 300-610 exam simulation software. This Software version of our 300-610 learning questions are famous for its simulating function of the real exam, which can give the candidates a chance to experience the real exam before they really come to it.

Free Download Cisco 300-610 Prep Guide With Interactive Test Engine & High-quality 300-610 Trustworthy Exam Content

Forget complaining for your failure. Please think about why there are candidates to pass exam every day. Option is more important than effort sometimes. Cisco 300-610 reliable exam collection pdf are being searched about 100,000 in the website every day. There are more than 600 candidates choosing valid Cisco 300-610 reliable exam collection pdf every day. We help thousands of people clear exams every year. The success is close at hand, why do you grab it?

Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q301-Q306):

NEW QUESTION # 301

Which two methods mitigate congestion in a SAN network? (Choose two.)

- A. Configure the port monitor to allow categorization of a specific device as slow.
- B. Configure the flow control for the FC to use R_RDY.
- C. Configure ER_RDY to allow splitting of each ISL between switches into separate virtual links.
- D. Use the port-monitor command to detect slow drain devices.
- E. Configure the port channel to enable individual buffer-to-buffer credits.

Answer: A,C

Explanation:

- Extended Receiver Ready - This feature allows each ISL between supporting switches to be split into four separate virtual links, with each virtual link assigned its own buffer-to-buffer credits. Virtual link 0 used to carry control traffic, virtual link 1 is used to carry high-priority traffic, virtual link 2 is used to carry slow devices, and virtual link 3 is used to carry normal traffic.
 - Congestion Isolation - This feature allows devices to be categorized as slow by either configuration command or by port monitor.
 - Port monitor portguard action for Congestion Isolation - Port monitor has a new portguard option to allow the categorization of a device as slow so that it can have all traffic flowing to the device routed to the slow virtual link.
- https://www.cisco.com/c/en/us/td/docs/switches/datacenter/mds9000/sw/8_x/config/interfaces/cisco_mds9000_interfaces_config_guide_8x/congestion_avoidance_isolation.html

NEW QUESTION # 302

A midsize corporation with significant data-storage requirements is planning to deploy RFC 3720-based technology in its data center to provide efficient and reliable block-level storage access to servers. The corporation requires a robust solution with optimal performance, load-balancing, and fault tolerance. The solution must use multiple network paths to optimize bandwidth usage and provide redundancy. LACP has already been enabled on the data-center switches. Which two actions must be taken to accomplish the goal? (Choose two.) Implement VLAN tagging in accordance with the IEEE 802.1Q standard to segregate iSCSI traffic from other data-center traffic.

- A. Disable jumbo frames on the data center switches
- B. Configure iSCSI MPIO software on the hosts
- C. Configure the iSCSI initiators and targets to use a single network path
- D. Implement MPIO with redundant network paths

Answer: B,C

NEW QUESTION # 303

Which approach splits a pair of clustered fabric interconnects into two standalone devices?

- A. Unplug the Layer 1 and Layer 2 interfaces between the devices.
- B. Run the disable fips-mode command on each fabric interconnect.
- C. Run the connect local-management command on each fabric interconnect.
- D. Erase the configuration of both fabric interconnects.

Answer: A

Explanation:

Section: Compute Design

Explanation/Reference:

NEW QUESTION # 304

An engineer must use OTV for layer 2 connectivity between data centers to support virtual machine between the customer sites. To support this requirement, the engineer must ensure the existence of the same default gateway on both sites. Additionally, the operations team report high bandwidth utilization on site A and wants to optimize the outbound traffic flows to use a DC exit point. Which feature must be used to meet these requirements?

- A. ARP filter
- B. FHRP filter
- C. Data group
- D. Control group

Answer: B

Explanation:

https://www.cisco.com/c/dam/en/us/products/collateral/switches/nexus-7000-series-switches/guide_c07-728315.pdf

It is critical that you enable the filtering of FHRP messages across the overlay because it allows the use of the same FHRP configuration in different sites. The end result is that the same default gateway is available, and it is characterized by the same virtual IP and virtual MAC addresses in each data center. Thus the outbound traffic will be able to follow the optimal and shortest path, always using the local default gateway.

The appendix has a sample configuration that can be copied into your Nexus 7000 Series in order to utilize this feature.

NEW QUESTION # 305

Which type fields can an engineer use to identify an iSCSI participant? (Choose two.)

- A. type
- B. identifying tag
- C. preshared key
- D. hostname
- E. port number

Answer: D,E

Explanation:

Section: Storage Network Design

NEW QUESTION # 306

.....

The key trait of our product is that we keep pace with the changes of syllabus and the latest circumstance to revise and update our 300-610 study materials, and we are available for one-year free updating to assure you of the reliability of our service. Our company has established a long-term partnership with those who have purchased our 300-610 Exam guides. We have made all efforts to update our product in order to help you deal with any change, making you confidently take part in the exam.

300-610 Trustworthy Exam Content: <https://www.vceprep.com/300-610-latest-vce-prep.html>

We all know that it is not easy to prepare the 300-610 exam; there are thousands of candidates to compete with you. We are engaging in this line to provide efficient reliable 300-610 practice materials which is to help you candidates who are headache for their 300-610 exams. After passing the Cisco 300-610 exam you can gain more career opportunities and feel confident to pursue a rewarding career in your professional life. The user only needs to submit his E-mail address and apply for free trial online, and our system will soon send free demonstration research materials of 300-610 study materials to download.

It is important to have data integrity so your users know that 300-610 they can rely on the data to be correct and that the results of their queries and programs will be accurate and expected.
