1Z0-1133-24 Key Concepts | Practice 1Z0-1133-24 Engine

All these advantages will be available after passing the Oracle Cloud EPM Data Integration 2024 Implementation Professional 1Z0-1133-24 certification exam which is not easy to pass. However, the complete 1Z0-1133-24 test preparation and proper planning can enable you to crack the Oracle 1Z0-1133-24 exam easily. For the complete and comprehensive 1Z0-1133-24 exam preparation, you can trust Oracle 1Z0-1133-24 PDF Questions and practice tests. The Oracle is one of the leading platforms that are committed to ace the Oracle Cloud EPM Data Integration 2024 Implementation Professional 1Z0-1133-24 Exam Preparation with the Oracle 1Z0-1133-24 valid dumps. The Oracle 1Z0-1133-24 practice questions are the real 1Z0-1133-24 exam questions that are verified by experience and qualified Oracle 1Z0-1133-24 exam experts.

Oracle Cloud EPM Data Integration 2024 Implementation Professional Sample Questions (Q14-Q19):

NEW QUESTION # 14

What is the primary role of data maps in Oracle Cloud EPM?

- A. To create real-time financial reports
- B. To assign user roles and permissions
- **C. To facilitate the movement of data between different applications or plan types**
- D. To schedule data validation routines

Answer: C

Explanation:

Data maps are used to move data between different applications or plan types within Oracle Cloud EPM, allowing for the integration and synchronization of data across various systems.

NEW QUESTION # 15

Which of the following is a recommended performance tuning practice for data integration jobs?

- A. Minimizing the amount of data transformed in each job
- B. Increasing the number of user roles for each data load
- C. Automating financial reporting for every job
- D. Running multiple data integrations simultaneously

Answer: A

Explanation:

Minimizing the amount of data transformed in each job helps reduce the processing load, improving the overall performance of data integration jobs.

NEW QUESTION # 16

Which of the following describes a situation in which a source connection is used in Oracle Cloud EPM?

- A. Configuring security roles for application users
- B. Scheduling email notifications for integration updates
- C. Loading historical data from Excel spreadsheets
- D. Manually entering data into Oracle EPM applications

Answer: C

Explanation:

Source connections are used to load data, including historical data, from external sources such as Excel spreadsheets into Oracle EPM applications.

NEW QUESTION # 17

Which of the following is true about using Smart Push in Oracle Cloud EPM?

- A. It generates real-time financial reports
- B. It allows users to move selected data instantly between cubes within the same application
- C. It automates period mapping for cross-application integration
- D. It assigns user roles for each data load

Answer: B

Explanation:

Smart Push enables users to move selected data instantly between cubes within the same application, providing real-time data synchronization without a full data refresh.

NEW QUESTION # 18

In Oracle Cloud EPM, what is the role of source and target application categories during the registration process?

- A. They assign user roles for data integration
- B. They control report generation frequency
- C. They define the type of data being exchanged between systems
- D. They set security levels for the application

Answer: C

Explanation:

Source and target application categories define the type of data being exchanged between systems, such as financial data or planning data.

NEW QUESTION # 19

.....

As we all know, the preparation process for an exam is very laborious and time- consuming. We had to spare time to do other

- [illegible]
