

Useful Latest 300-745 Exam Practice Help You to Get Acquainted with Real 300-745 Exam Simulation

What's more, part of that BraindumpsIT 300-745 dumps now are free: https://drive.google.com/open?id=1dteT7Z-5IKx-wbHQQmEZjluV__BXdCvZ

Every working person knows that 300-745 is a dominant figure in the field and also helpful for their career. If 300-745 reliable exam bootcamp helps you pass exams and get a qualification certificate you will obtain a better career even a better life. Our study 300-745 Guide materials cover most of latest real 300-745 test questions and answers. If you are certainly determined to make something different in the field, a useful certification will be a stepping-stone for your career, so why not try our product?

Cisco 300-745 Exam Syllabus Topics:

Topic	Details
Topic 1	Artificial Intelligence, Automation, and DevSecOps: Explores AI's role in securing network infrastructure, selecting tools for automated security architectures such as SOAR, IaC, and API tooling, and integrating security into DevSecOps workflows and pipelines to minimize deployment risk.
Topic 2	Applications: Focuses on selecting security solutions to protect applications and designing secure architectures for cloud-native, containerized, and serverless environments using segmentation. Also addresses security design impacts of emerging technologies like AI, ML, and quantum computing.
Topic 3	- Secure Infrastructure: Covers selecting security approaches for endpoints, identities, email, and modern environments like hybrid work, IoT, SaaS, and multi-cloud. Includes choosing VPN - tunneling solutions, securing management planes, and selecting the appropriate firewall architecture based on business needs.
Topic 4	Risk, Events, and Requirements: Covers SOC incident handling and response tools, modifying security designs to mitigate or respond to incidents, and applying frameworks like MITRE CAPEC, NIST SP 800-37, and SAFE. Includes matching regulatory and compliance requirements to business scenarios.

Interactive Cisco 300-745 Course, Valid Study 300-745 Questions

It is known to us that getting the 300-745 certification has become more and more popular for a lot of people in different area, including students, teachers, and housewife and so on. Everyone is desired to have the 300-745 certification. Our 300-745 Exam Dumps Question is very necessary for you to try your best to get the certification in a short time. 300-745 Exam Braindumps is willing to give you a hand to pass the exam. 300-745 Exam Torrent will be the best study tool for you to get the certification

Cisco Designing Cisco Security Infrastructure Sample Questions (Q67-Q72):

NEW QUESTION # 67

Which Cisco product provides automated incident response workflows integrated with SIEM and SOAR platforms?

- A. Cisco Catalyst
- B. Cisco AnyConnect
- C. Cisco DNA Center
- **D. Cisco SecureX**

Answer: D

Explanation:

Cisco SecureX integrates multiple security tools with SIEM and SOAR platforms and provides automated incident response workflows to speed up detection, investigation, and remediation.

NEW QUESTION # 68

A construction company recently introduced a BYOD policy, where contractors can bring personal devices and connect to the wireless network. The network engineer configured a Wi-Fi network with a guest splash page to provide internet access only. Although the policy was limited to wireless devices, contractors started bringing devices that needed wired connections without authorization and connecting to the network. The network team suggested shutting down ports where unauthorized devices are connected. Which technology must be implemented to ensure that wired and wireless devices are granted network access only after successful authentication?

- A. VACLs
- **B. 802.1x**
- C. private VLANs
- D. VxLANs

Answer: B

Explanation:

802.1X provides port-based network access control, requiring devices (wired or wireless) to authenticate before gaining network access. This ensures that only authorized users and devices can connect, enforcing the BYOD policy and preventing unauthorized wired connections.

NEW QUESTION # 69

A company published software that had a security vulnerability, and an attacker used the vulnerability to steal critical information from the environment. The issue was reported by the security team, and the administrator was instructed to run shift-left security tests before publishing the software. Which component of the software development pipeline must be recommended to run the tests?

- A. cloud security posture management
- B. continuous deployment
- **C. source code management**
- D. software bill of material analysis

Answer: C

Explanation:

Shift-left security means running security tests earlier in the development lifecycle. By integrating tests in the source code management stage (e.g., Git repositories), vulnerabilities can be detected and fixed before software is built and deployed, reducing the risk of publishing insecure code.

NEW QUESTION # 70

A company recently discovered that a former employee, who left to join a competitor, continued to access and exfiltrate sensitive data over several weeks after leaving. The breach highlighted vulnerabilities in the organization's data security and access management practices. To prevent such incidents in the future, the organization must adopt measures that detect and restrict unauthorized data access and transfer. Which mitigation strategy must be implemented to address the issue?

- A. Upgrade network policy access.

- B. Deploy audit logging and monitoring solution.
- C. Implement web application firewall.
- **D. Implement data loss prevention strategy.**

Answer: D

Explanation:

The scenario describes a typical "insider threat" involving data exfiltration. While the initial failure was likely in the off-boarding process (Identity Management), the technical control required to specifically "detect and restrict unauthorized data access and transfer" is a Data Loss Prevention (DLP) strategy. DLP solutions are designed to monitor, detect, and block sensitive data from leaving the organization's control.

A robust DLP strategy-integrated across Cisco platforms like Email Security (ESA), Web Security (WSA), and Cisco Umbrella-works by identifying sensitive content (such as customer lists, proprietary code, or financial data) using techniques like fingerprinting or keyword matching. If an unauthorized attempt is made to upload this data to a personal cloud drive or send it via email, the DLP engine intercepts and blocks the transfer. While Audit Logging (Option D) is essential for forensic investigation after the fact, it does not "restrict" the transfer in real-time. WAFs (Option A) protect against external attacks on web servers, and Network Policies (Option B) control traffic flow but generally lack the content-awareness required to identify sensitive business data. Implementing DLP ensures that the organization's intellectual property remains protected even if an account remains active or a user has legitimate network access.

NEW QUESTION # 71

Which two best practices align with incident response and compliance objectives? (Choose two.)

- A. Disable auditing to improve performance
- B. Use shared admin credentials
- **C. Implement real-time monitoring**
- **D. Maintain immutable logs**

Answer: C,D

Explanation:

Immutable logs preserve evidence integrity, while real-time monitoring allows faster detection and response-both essential for incident response and regulatory compliance.

NEW QUESTION # 72

.....

Our company has realized that a really good product is not only reflected on the high quality but also the consideration service, including the pre-sale service and after-sale service. So we not only provide all people with the 300-745 test training materials with high quality, but also we are willing to offer the fine pre-sale and after-sale service system for the customers, these guarantee the customers can get that should have. If you decide to buy the 300-745 learn prep from our company, we are glad to arrange our experts to answer your all questions about the study materials. We believe that you will make the better choice for yourself by our consideration service.
