Salesforce Certified Sharing and Visibility Architect Sample Questions (Q32-Q37):

NEW QUESTION # 32

Universal Containers has a custom object to maintain Job information with a private sharing model. The Delivery group is distributed through the Role Hierarchy based on geography. As the Delivery group often collaborates on Jobs, all users in the Delivery profile required View access to all Job records. In special case, the Delivery user who owns a job must be able to grant a Product Development user access to a Job record.

Which two platform features can be used to support these requirements?

Choose 2 answers

- **A. "View All" Profile settings**
- B. Owner-based Sharing Rules
- C. Criteria-based Sharing Rules
- **D. Manual Sharing**

Answer: A,D

Explanation:

Explanation

Two platform features that can be used to support the requirements for granting access to Job records are

"View All" profile settings and manual sharing. The "View All" profile setting can be enabled for the Delivery profile to grant them View access to all Job records regardless of ownership or role hierarchy. The manual sharing feature can be used by the Delivery user who owns a job to grant access to a Product Development user on a case-by-case basis

NEW QUESTION # 33

Universal Containers (UC) is implementing Sales Cloud. During the final quarter of the financial year, sales managers help each other close deals. They requested a solution in Salesforce to allow them to share opportunities with other sales managers from different teams as needed. They also requested that sharing deals should expire automatically two weeks after the new fiscal year starts.

Which two options to propose a solution to meet the requirements? Choose 2 answers

- **A. Scheduled Apex job to remove access.**
- B. Apex Sharing to share opportunities with sales managers.
- C. Sharing Rules to share opportunities with sales managers.
- **D. Opportunity team to share opportunities with sales managers.**

Answer: A,D

Explanation:

Explanation

The two options to propose a solution to meet the requirements are Scheduled Apex job to remove access and Opportunity team to share opportunities with sales managers. Scheduled Apex job allows developers to run Apex code at a specified time, which can be used to revoke the sharing access after two weeks. Opportunity team allows users to grant access to other users who work on the same opportunity¹. Apex Sharing and Sharing Rules are not suitable options because they do not support automatic expiration of sharing.

NEW QUESTION # 34

Universal Containers (UC) has a custom object to track the internal net promoter score (NPS) for all ..
How can UC ensure that NPS records cannot be accessed by an individual employee's manager?

- A. Remove Create, Read, Edit and Delete from Manager Profiles and Permission sets.
- **B. Set organization wide default to Private and uncheck the Access Using Hierarchies option for the NPS object**
- C. Use Apex Sharing to remove NPS object share records for Manager profiles.
- D. Create a criteria-based sharing rule to remove access to Manager role and above in the Role ..

Answer: B

Explanation:

Explanation

Setting the organization-wide default to Private and unchecking the Access Using Hierarchies option for the NPS object will prevent the managers from accessing the NPS records of their subordinates. This is because the access using hierarchies option allows users above the owner in the role hierarchy to have the same level of access as the owner

NEW QUESTION # 35

The Finance team at Universal Containers usually does not need access to Account and Contract records A given Opportunity access for a big deal to help with tax calculation. She can now also access Account and C.

Which two reasons could be causing this issue? Choose 2 answers

- A. Contact records can be accessed due to implicit sharing from Account.
- **B. Account records can be accessed due to implicit sharing from Opportunity.**
- C. Contact records can be accessed due to implicit sharing from Opportunity.
- D. Account records can be access due to role hierarchy.

Answer: B

NEW QUESTION # 36

The sales managers at Universal Containers requested their teams to define each user's role on their accounts in order to provide an easy way to establish accountability and collaboration. Sales managers also requested that sales associates should only get the following permissions: 1. Read access to the accounts. 2. Read access to cases related to the accounts. 3. No access to deals related to the accounts.

The sales associates may be granted access to opportunities when needed.

Assuming the overall sharing model of the organization is Private and no sharing rules are configured on the Account object, how should an architect achieve these requirements?

- **A. Use Account teams to define access to accounts as well as opportunities and cases related to accounts.**
- B. Use Account teams and Case teams. No configuration required for the Opportunity object.
- C. Use Account teams and sharing rules to share cases with sales associates. No change required to the Opportunity object.

Answer: A

NEW QUESTION # 37

.....

The latest Sharing-and-Visibility-Architect exam torrent covers all the qualification exam simulation questions in recent years, including the corresponding matching materials at the same time. Do not have enough valid Sharing-and-Visibility-Architect practice materials, can bring inconvenience to the user, such as the delay progress, learning efficiency and to reduce the learning outcome was not significant, these are not conducive to the user persistent finish learning goals.
