ISACA COBIT 2019 Foundation 認定 COBIT-2019 試験問題 (Q113-Q118):

質問 # 113

Which of the following BEST enables an enterprise to show and prove the benefits realized from the implementation of an EGIT program plan?

- A. Tracking expected benefits and targets until program implementation
- **B. Communicating the results and benefits in business impact terms**
- C. Delivering a solution from a long-term and complex project
- D. Adopting performance metrics that are easy to achieve

正解: B

解説:

Communicating the results and benefits of an EGIT program plan in business impact terms is essential for an enterprise to be able to show and prove the benefits realized from the implementation. This includes providing clear evidence of how the program plan has created value, such as increased efficiency, cost savings, and improved customer satisfaction. Additionally, it is important to ensure that the results and benefits are communicated to all relevant stakeholders to ensure that they are aware of the value created.

質問 # 114

Once IT governance is implemented, what is the NEXT phase in the life cycle of governance?

- A. Initiating improvements
- **B. Measuring objectives**
- C. Updating the program

正解: B

解説:

Measuring objectives is the next phase in the life cycle of governance after IT governance is implemented.

The life cycle of governance is a continuous process that involves designing, implementing, evaluating, and improving the IT governance system. Measuring objectives is the phase that involves assessing and monitoring the performance and outcomes of the IT governance system against predefined metrics and targets. Measuring objectives is the next phase after IT governance is implemented because it helps to determine whether the IT governance system is effective, efficient, and aligned with the enterprise goals.

質問 # 115

Which of the following is a strategy archetype focused on increasing revenues?

- A. Client service/stability
- **B. Growth/acquisition**
- C. Innovation/differentiation
- D. Cost leadership

正解: B

解説:

The enterprise strategy archetype is a design factor that describes how an enterprise uses information and technology to achieve its goals and objectives. There are six enterprise strategy archetypes defined in COBIT 2019: growth/acquisition; operational excellence; customer intimacy; product leadership; data-driven; innovation-driven. Each archetype has different implications for the governance and management of information and technology in terms of focus areas processes practices roles structures, and metrics. The enterprise strategy archetype that is focused on increasing revenues is growth/acquisition. Growth/acquisition is a strategy archetype that emphasizes expanding market share revenue customer base or product range through organic growth or acquisition of other businesses or assets. This strategy archetype requires effective portfolio management of information and technology investments and initiatives that support business growth or acquisition objectives. Portfolio management involves selecting prioritizing balancing monitoring evaluating, and optimizing information and technology investments and initiatives based on their alignment with business strategy value delivery potential risk exposure resource availability interdependencies etc.

Portfolio management also involves ensuring that information and technology investments and initiatives are integrated with business processes systems structures culture etc especially in case of mergers or acquisitions.

正解: C

質問 # 117

Before designing an enterprise IT governance system, an organization should FIRST review and understand:

- A. the enterprise's risk profile.
- B. the enterprise's strategy.
- C. current IT-related issues.

正解: B

解説:

Explanation

According to the COBIT 2019 Design Guide, before designing an enterprise IT governance system, an organization should first review and understand the enterprise's strategy. The enterprise's strategy defines the vision, mission, goals and objectives of the organization, and provides the direction and context for IT governance. The enterprise's strategy also identifies the key stakeholders, their needs and expectations, and the value proposition of IT to the business. 1, p. 16-17 References: 1: COBIT 2019 Design Guide: Designing an Information and Technology Governance Solution
