

# Reliable C\_CPI\_2506 Exam Review | Real C\_CPI\_2506 Question

What's more, part of that Prep4cram C\_CPI\_2506 dumps now are free: [https://drive.google.com/open?id=14BUum3QZy\\_-ndeZp8V2UQmfaO6Hh8QFL](https://drive.google.com/open?id=14BUum3QZy_-ndeZp8V2UQmfaO6Hh8QFL)

Infinite striving to be the best is man's duty. We have the responsibility to realize our values in the society. Of course, you must have enough ability to assume the tasks. Then our C\_CPI\_2506 learning quiz can give you some help. First of all, you can easily pass the C\_CPI\_2506 Exam and win out from many candidates for our C\_CPI\_2506 study materials are the most effective exam materials in the market. Secondly, you can also learn a lot of the specialized knowledge at the same time.

## SAP C\_CPI\_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>SAP Integration Suite Overview:</b> This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Implementing Cloud Integration:</b> This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>SAP Event Mesh:</b> This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Managing APIs:</b> This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.</li> </ul>

Real C\_CPI\_2506 Question, Latest C\_CPI\_2506 Questions

Through our prior investigation and researching, our C\_CPI\_2506 preparation exam can predicate the exam accurately. You will come across almost all similar questions in the real C\_CPI\_2506 exam. Then the unfamiliar questions will never occur in the examination. Even the C\_CPI\_2506 test syllabus is changing every year; our experts still have the ability to master the tendency of the important knowledge as they have been doing research in this career for years.

## SAP Certified Associate - Integration Developer Sample Questions (Q36-Q41):

### NEW QUESTION # 36

Which log level must you use to examine the payload at specific processing steps in an integration flow?

- A. Debug
- **B. Trace**
- C. Error
- D. Info

**Answer: B**

Explanation:

To examine the payload at specific processing steps in an integration flow, you must use the Trace log level. The Trace log level provides the most detailed information about the message processing, including the payload content and the headers at each step. You can use the Message Processing Log to view the trace logs for a specific message. Reference: Modernize Integration with SAP Integration Suite | openSAP

### NEW QUESTION # 37

To receive the "sap/s4/beh/businesspartner/va/BusinessPartner/Changed/v1" business event from SAP S/4HANA Cloud in SAP Integration Suite Event Mesh, which components are required to construct the Topic Subscription string?

- A. Source system Target system Integration flow
- B. API key Authentication token Client ID
- C. Business Partner ID Change type Event timestamp
- **D. Namespace Topic name Separator.**

**Answer: D**

Explanation:

In SAP Event Mesh, topic subscriptions follow a defined hierarchical string structure:

Namespace # Defines the domain or context (e.g., sap/s4/beh/businesspartner).

Topic name # Specifies the exact event (e.g., BusinessPartner/Changed).

Separators (/) # Used to concatenate namespace and event details into a full subscription string.

Other options:

API key, Client ID, and Authentication token # Used for connectivity but not part of the topic string.

Business Partner ID, Change type, Event timestamp # Payload details, not part of the subscription string.

Source/Target system # Not required for constructing the topic name.

Thus, the correct components are Namespace, Topic name, Separator.

### NEW QUESTION # 38

You are using a Data store Operation of the type Write. Which parameter must you select to avoid duplicate entries?

- **A. Overwrite Existing Message**
- B. Retention Threshold for Alerting
- C. Include Message Headers
- D. Encrypted stored Message

**Answer: A**

Explanation:

In a Data Store Write operation:

If multiple messages are written with the same Entry ID, enabling Overwrite Existing Message ensures that the previous entry is

replaced, avoiding duplicate records.

Other options:

Encrypted Stored Message # Secures data, not related to duplicates.

Include Message Headers # Controls storage of headers, not duplication.

Retention Threshold for Alerting # Configures alerts, not duplication.

Thus, the parameter required to avoid duplicates is Overwrite Existing Message.

### NEW QUESTION # 39

Which part of the proxy URL is provided by the initial configuration step of the API Management?

- A. Version
- B. Service name
- C. Virtual host
- D. Name of the API management

**Answer: C**

Explanation:

To set up the API Management capability within SAP Integration Suite, you must provide a virtual host as part of the initial configuration step. The virtual host is a host alias that identifies your organization and is used as the base URL of your API proxies.

For example, if your virtual host is myorg, your API proxy URL will look like this:

<https://myorg.apimanagement.hana.ondemand.com/<api-name>>. The virtual host can be changed later in the API portal settings.

### NEW QUESTION # 40

You want to access individual entities of an HTTP call over XPath. What must you do if no namespace mapping exists?

- A. Remove the namespaces.
- B. Convert the namespaces to XML
- C. Convert the namespaces to JSON.
- D. Remove the XML prolog

**Answer: A**

Explanation:

If no namespace mapping exists, you must remove the namespaces to access individual entities of an HTTP call over XPath.

Namespaces are prefixes that identify the source or context of an XML element or attribute. If the namespaces are not mapped to a URI, they can cause errors or conflicts when using XPath expressions. Therefore, you must remove the namespaces before applying XPath queries.
