DOWNLOAD the newest CertkingdomPDF C\_S4TM\_2023 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1ONMMaGiyo3WK1DNpasTRkiIpF2WDjH\\_4](https://drive.google.com/open?id=1ONMMaGiyo3WK1DNpasTRkiIpF2WDjH_4)

Though there are three versions of the C\_S4TM\_2023 training braindumps: the PDF, Software and APP online. I like the Software version the most. This version of our C\_S4TM\_2023 training quiz is suitable for the computers with the Windows system. It is a software application which can be installed and it stimulates the real exam's environment and atmosphere. It builds the users' confidence and the users can practice and learn our C\_S4TM\_2023 learning guide at any time.

If you are already determined to obtain an international certificate, you must immediately purchase our C\_S4TM\_2023 exam practice. Our products have been certified as the highest quality products in the industry. If you know C\_S4TM\_2023 training materials through acquaintance introduction, then you must also know the advantages of C\_S4TM\_2023. Our content and design have laid a good reputation for us. Our users are willing to volunteer for us. You can imagine this is a great product! Next, I will introduce you to the most representative advantages of C\_S4TM\_2023 real exam. You can think about whether these advantages are what you need!

## Free PDF 2026 SAP Efficient Exam Dumps C\_S4TM\_2023 Pdf

CertkingdomPDF has made the SAP C\_S4TM\_2023 exam dumps after consulting with professionals and getting positive feedback from customers. The team of CertkingdomPDF has worked hard in making this product a successful C\_S4TM\_2023 study material. So we guarantee that you will not face issues anymore in passing the C\_S4TM\_2023 Certification test with good grades. CertkingdomPDF has built customizable C\_S4TM\_2023 practice exams (desktop software & web-based) for our customers.

### SAP C\_S4TM\_2023 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• Charge Calculation &amp; Freight Settlement: Setup, integration, and cost distribution are the key sub-topics here. This topic also covers freight contracts and strategic procurement and selling.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Managing Clean Core: This topic discusses the evaluation and application of clean core principles to maximize agility, reduce effort, and accelerate innovation in ERP systems.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Master Data: Master data definition, including logistical and financial data, is essential for effective transportation management and is covered here.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• SAP Transportation Management Overview and Fundamentals: This topic covers the general processes and functional areas of SAP Transportation Management, including external and embedded systems. It also discusses transportation tasks and their management.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Transportation Planning: The sub-topics here include network setup, profile configuration, and VSR optimizer calibration for automatic planning, all essential for efficient transportation planning.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Freight Order Management: Carrier selection, tendering, freight documents, and integrations are covered here. This topic also includes communication with external and internal parties, a key aspect of freight order management.</li> </ul>

## SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q75-Q80):

### NEW QUESTION # 75

What is accomplished with either SAP PI or Web Services Reliable Messaging (WS-RM)? Please choose the correct answer.

- A. Supports a full range of warehouse processes
- B. Maximizes visibility and control
- C. SAP ERP logistics integration
- D. Optimizes warehouse resource and asset utilization

**Answer: C**

### NEW QUESTION # 76

What is frequently the leading master data system? (1 correct answer)

- A. environment PPF
- B. component under
- C. application reusable
- D. the ERP system

**Answer: D**

### NEW QUESTION # 77

Based on your company policy, the hazardous product POISON should NOT be transported on means of transport TRUCK unless authorized by user A. How can you maintain the system reaction in the corresponding incompatibility definition used by user A? Note: There are 2 correct answers to this question.

- A. \*Automatic Violation: Incompatibility Must Not Be Violated  
\*Manual Violation: Incompatibility Must Not Be Violated
- B. \*Automatic Violation: Incompatibility Must Not Be Violated  
\*Manual Violation: Warning If Incompatibility Is Violated
- C. \*Automatic Violation: Incompatibility Is Ignored  
\*Manual Violation: Warning If Incompatibility Is Violated
- D. \*Automatic Violation: Incompatibility Must Not Be Violated  
\*Manual Violation: Incompatibility is Ignored

**Answer: B,D**

Explanation:  
Transportation Planning

**NEW QUESTION # 78**

In which of the following areas can you use incompatibilities? Note: There are 3 correct answers to this question.

- A. Charge calculation
- B. Tendering
- C. Carrier selection
- D. Delivery proposal
- E. Freight unit building

**Answer: C,D,E**

Explanation:

In SAP S/4HANA Transportation Management, incompatibilities are used to enforce restrictions in various processes to prevent incompatible combinations. According to the SAP documentation, incompatibilities can be applied in:

\* Delivery proposal (A): Incompatibilities ensure that certain products or freight units are not combined in delivery proposals (e.g., due to hazardous material restrictions).

\* Freight unit building (D): Incompatibilities prevent specific products or requirements from being combined into the same freight unit (e.g., incompatible goods).

\* Carrier selection (E): Incompatibilities restrict certain carriers from being assigned to specific freight orders based on criteria like equipment or service capabilities.

The other options are incorrect:

\* Tendering (B) uses tendering profiles and rules but does not typically involve incompatibilities.

\* Charge calculation (C) relies on freight agreements and rate tables, not incompatibilities.

Reference:

**NEW QUESTION # 79**

You want to set up charge calculation for freight orders. Valid charges should consist of a base charge based on the distance and gross weight of the freight order, and a supplemental charge per container that is included in the freight order. Multiple containers are allowed for each freight order, and the charge is based on the container type. The container type can be small, medium, or large. What is the minimum number of charge lines with instruction type "standard" that you must set up?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: B**

Explanation:

To set up charge calculation for freight orders in SAP S/4HANA Transportation Management, you need to define charge lines in the calculation sheet with the instruction type "standard" to represent the different types of charges. According to the SAP documentation:

\* A base charge based on distance and gross weight requires one charge line with instruction type "standard" to calculate the cost using a rate table that considers these parameters.

\* A supplemental charge per container based on container type (small, medium, large) requires a second charge line with instruction type "standard" to apply the container-specific charge, which can be defined in a rate table with scales for container types. Since the requirement involves two distinct charge calculations (base charge and container charge), the minimum number of charge lines with instruction type "standard" is 2.

The other options are incorrect:

\* A (0) is not possible, as charges require at least one charge line.

\* C (1) is insufficient, as it cannot cover both the base charge and container charge.

\* D (3) is unnecessary, as the container types can be handled within a single charge line using a rate table with scales.
