NEW QUESTION # 58

What does the Side-by-Side extensibility option mean?

- A. SAP S/4HANA extensions are context-aware and focused on tight integration.
- B. Extend SAP S/4HANA using APIs published on SAP Business Accelerator Hub.
- C. There are two SAP S/4HANA instances: one for standard code and another for custom developments
- D. Extending SAP S/4HANA using SAP ABAP Development Workbench.

Answer: B

Explanation:
Step 1 - Understanding the Question
The question refers to theSide-by-Side extensibilityconcept in SAP S/4HANA Cloud, which is one of the three extensibility approaches defined by SAP:
* In-App extensibility- Extensions made directly inside the SAP S/4HANA system using key-user tools.
* Classic extensibility- Custom developments using ABAP in the SAP core system.
* Side-by-Side extensibility- Building and running extensionsoutsidethe SAP S/4HANA core on the SAP Business Technology Platform(BTP).
Step 2 - Evaluate Each Option
A). Extending SAP S/4HANA using SAP ABAP Development Workbench
* This isclassic extensibility, not Side-by-Side.
* It modifies the core ABAP stack directly, which contradicts the clean-core principle for cloud environments.
Result:Incorrect.
B). Extend SAP S/4HANA using APIs published on SAP Business Accelerator Hub
* Side-by-Side extensibility leveragesSAP BTPfor building external applications and services that communicate with SAP S/4HANA usingstandard APIs and events.
* The APIs used for these extensions are published on theSAP Business Accelerator Hub(formerly API Business Hub).
* This approach allows creating customUIs, workflows, or integrations without modifying the core system.
Result:Correct - This defines the Side-by-Side extensibility model.
C). There are two SAP S/4HANA instances: one for standard code and another for custom developments
* SAP does not create a separate instance for custom code in Side-by-Side extensibility.
* Extensions are builtexternally on SAP BTP, not as a second SAP S/4HANA instance.
Result:Incorrect.
D). SAP S/4HANA extensions are context-aware and focused on tight integration
* This describes theIn-App extensibilitymodel, where extensions are embedded within the core system and maintain contextual awareness.
Result:Incorrect.

NEW QUESTION # 59
