Latest GH-100 Test Report, GH-100 Reliable Braindumps Sheet

Our GH-100 preparation exam is compiled specially for it with all contents like exam questions and answers from the real GH-100 exam. If you make up your mind of our GH-100 exam prep, we will serve many benefits like failing the first time attached with full refund service, protecting your interests against any kinds of loss. In a word, you have nothing to worry about with our GH-100 Study Guide.

Microsoft GitHub Administration Sample Questions (Q62-Q67):

NEW QUESTION # 62

A GitHub Enterprise administrator is planning to implement SAML SSO across their company. Which of the following correctly distinguishes enterprise-wide SAML SSO from organization-level SAML SSO?

- A. Enterprise-wide SAML SSO allows different organizations to use different authentication methods.
- B. Enterprise-wide SAML SSO requires less initial administrative overhead than organization-level implementation.

- C. Enterprise-wide SAML SSO immediately removes users who fail to authenticate via the IdP.
- **D. Enterprise-wide SAML SSO ensures users authenticate through the same IdP across all organizations.**

Answer: D

Explanation:

Enterprise-wide SAML SSO enforces a single IdP across all member organizations-its configuration overrides any per-organization SAML settings, so everyone must authenticate through the same provider.

NEW QUESTION # 63

A token was used to access an organization's resource via API. What fields in the audit log help determine who used it?

- A. The token expiration date
- B. The GitHub Actions runner name
- **C. The token ID, requesting IP address, and associated user**
- D. The token's permissions and the geographic region of access

Answer: C

Explanation:

The audit log records the token's identifier (the hashed token value), the source IP address of the request, and the actor (the user or app) associated with that token, allowing you to trace exactly who used it.

NEW QUESTION # 64

Which of the following accurately contrasts a GitHub App and a GitHub Action?

- A. GitHub Apps can only be used inside .github/workflows
- **B. GitHub Actions can only be used to respond to events within a single repository while GitHub Apps can respond to events from multiple repositories**
- C. GitHub Apps run only on GitHub-provided virtual machines, while GitHub Actions run only on customer-hosted machines
- D. GitHub Actions are limited to reading repository content only

Answer: B

Explanation:

GitHub Actions workflows are defined and triggered within a single repository's context, whereas GitHub Apps are installed at the organization or user level and can subscribe to events across multiple repositories.

NEW QUESTION # 65

When comparing fine-grained Personal Access Tokens (PATs) with classic PATs, which of the following statements is accurate?

- A. Fine-grained PATs automatically renew while classic PATs require manual renewal.
- **B. Fine-grained PATs permissions can be scoped to specific repositories.**
- C. Classic PATs can be restricted to specific organizations, but fine-grained PATs cannot.
- D. Classic PATs offer more permission controls than fine-grained PATs.

Answer: B

Explanation:

Fine-grained personal access tokens let you scope permissions down to individual repositories, whereas classic PATs grant access across every repo the user can reach.

NEW QUESTION # 66

What is the potential consequence of enabling multiple rulesets that apply to the same branch in a repository?

- **A. All applicable rulesets will be evaluated, and their combined rules enforced**
- B. Only organization-level rulesets are enforced over repository-level ones

- C. Rulesets will override each other, leading to unpredictable behavior
- D. Only the most recently created ruleset will be enforced

Answer: A

Explanation:

If you enable multiple rulesets that target the same branch, GitHub will evaluate every matching ruleset and enforce the aggregate of their rules - so all constraints from all applicable rulesets apply.

NEW QUESTION # 67

.....

The education level of the country has been continuously improved. At present, there are more and more people receiving higher education, and even many college graduates still choose to continue studying in school. Getting the test GH-100 certification maybe they need to achieve the goal of the learning process, have been working for the workers, have more qualifications can they provide wider space for development.
