100% Pass Adobe - Accurate AD0-E117 - Adobe Experience Manager Architect Master Latest Exam Cost

The pass rate of the AD0-E117 exam braindumps is 98.75%, and pass guarantee and money back guarantee, if you indeed fail in the exam by using AD0-E117 exam dumps of us, we will refund your money or if you need to attend other exam, we will replace other 2 valid exam dumps for free. Besides, the AD0-E117 Exam Dumps contain both quality and certain quantity, it is good for you to practice and pass the exam successfully.

The Adobe Experience Manager Architect Master certification exam is ideal for professionals who work with AEM, including solution architects, technical leads, and developers. By obtaining this certification, professionals can demonstrate their advanced knowledge and skills related to AEM architecture, which are highly valued by employers across various industries.

The AD0-E117 exam covers a wide range of topics related to AEM architecture, including designing and implementing AEM components, integrating AEM with other systems, configuring AEM security, and optimizing AEM performance. AD0-E117 Exam also tests the candidate's understanding of AEM best practices, industry standards, and trends. Passing the AD0-E117 exam demonstrates that the candidate is a skilled AEM architect who can design and implement effective AEM solutions that meet the needs of businesses and their customers.

Adobe Experience Manager Architect Master Sample Questions (Q37-Q42):

NEW QUESTION # 37

AEM Site users report that the web content pages render very slowly. An Architect notices that the CPU usages of the AEM Publish instances are spiking and reviews the following entry in the log:

[Frt Nov 27 23:11:00 2019] [I] [pid 16004 (tid 140134145820416)] Current cache hit ratio: 47.94 % What should the Architect do to increase the dispatcher cache ratio and prevent the AEM Publish CPU usage spikes?

- A. Review and optimize the Dispatcher cache configuration
- B. Create a cron job that will delete the dispatcher cache on a regular basis
- C. Add additional AEM instances to the Publish Farm
- D. Add additional dispatcher servers

Answer: A

Explanation:

According to Adobe Experience Manager documentation⁵, dispatcher is a caching and load balancing tool that can be used to improve performance and security of AEM sites. Dispatcher cache configuration can be adjusted using various properties in the dispatcher.any file⁶. Creating a cron job that will delete the dispatcher cache on a regular basis is not a good idea as it will reduce the cache hit ratio and increase the load on AEM servers.

NEW QUESTION # 38

A company is implementing a new e-commerce site that is expected to get seasonal and flash-sale induced traffic peaks from all over the world. It is projected that a minute of downtime could cause excessive lost revenue. The company management wants to keep resource utilization to optimal levels without experiencing degradation to avoid introducing bugs in the system.

The Architect needs to choose between AEM 6.5 and AEM as Cloud Service.

What are the two most critical non-functional requirements the Architect must consider? (Choose two.)

- A. Maintainability
- B. Usability
- C. Availability
- D. Scalability
- E. Reliability

Answer: B,D

NEW QUESTION # 39

A client's marketing pages are generally slow to load which is causing a significant drop in sales. All other AEM pages load within expected performance guidelines regardless of whether the visitor is being served the desktop or mobile experiences.

The marketing pages typically get slower when multiple external campaigns such as Facebook and AdWords drive traffic to those pages. The page performance tends to dip during high traffic periods. Internal campaign clicks such as those from hero images use similar campaign codes as external campaign traffic.

What should the Architect do to resolve this issue?

- A. Add a new dispatcher farm to assist with the client's marketing pages
- B. Modify the dispatcher.any file's section to ignore campaign-based URL parameters
- C. Convert the marketing pages to a responsive design instead of an adaptive design
- D. Set AEM to use GZIP compression instead of the web server's compression

Answer: B

Explanation:

Modify the dispatcher.any file's section to ignore campaign-based URL parameters¹². According to Adobe Experience Manager documentation², dispatcher can be configured to ignore certain URL parameters that do not affect the content of a page. This can improve caching performance and reduce load on AEM servers.

NEW QUESTION # 40

A customer has a requirement to allow authors to access AEM with single sign-on. To achieve this an Architect needs to integrate AEM with the customer's identity management system.

Which two actions could an Architect take to meet this requirement? (Choose two.)

- **A. Implement the generic SSO Authentication Handler interface**
- B. Configure the Sling Authentication Requirements for the OSGi HTTP Service
- C. Configure the SAML Authentication Handler
- **D. Configure the generic SSO Authentication Handler**
- E. Implement a custom JAAS Login Module

Answer: A,D

Explanation:

"implementing and configuring the generic SSO Authentication Handler interface can enable single sign-on integration with an identity management system".

NEW QUESTION # 41

A client recently purchased the Smart Content Service and is considering using the Enhanced Smart Tagging feature. As part of the process, the client recently created a new tagging taxonomy that has not been applied to any assets yet. An Architect needs to demonstrate the feature on a subset of the client's assets before using on all assets.

How should the Architect proceed?

- A. Enable Smart Tagging via the folder properties for a single folder of assets
- B. Add sample assets to a new folder, tag assets in folder, then run the Smart Tags Training workflow
- C. Add sample assets to a new folder, tag assets in folder, then enable Smart Tagging via the folder properties
- **D. Enable Smart Tagging via the folder properties for a single folder of assets, then run the Smart Tags Training workflow**

Answer: D

Explanation:

"to use Enhanced Smart Tagging, the Architect needs to enable Smart Tagging via the folder properties for a single folder of assets, then run the Smart Tags Training workflow to train the model with the new tagging taxonomy".

NEW QUESTION # 42
