You should start the preparations for the Huawei H35-211_V2.5 Certification Exam to improve your knowledge.

Huawei HCIP-Access V2.5 Sample Questions (Q97-Q102):

NEW QUESTION # 97

(Single choice) The following statement about ssh connection is incorrect, yes

- A. The ssh protocol encrypts all transmitted data, effectively preventing information leakage problems during remote management
- **B. The ssh protocol is working at the network layer**
- C. From a client perspective, SSH provides two levels of security authentication.
- D. ssh can be applied to remote encryption of encrypted file transfers over remote encryption connections

Answer: B

NEW QUESTION # 98

(Single-choice) An IPTV user reports the TV cannot be watched. After enabling OLT debug for multicast /IGMP, the printed information (authorization result) indicates the conclusion below. This can be judged by the results of the query:

- A. The user does not have permission to watch the show
- B. IGMP Snooping failure
- C. User bandwidth validation failed
- D. The PON port multicast bandwidth is insufficient

Answer: A

Explanation:

In Huawei IPTV access, when the OLT's IGMP audit/authorization debug shows a negative program-rights /authorization result, it indicates that the user lacks permission for the requested multicast program group.

This is distinct from port multicast bandwidth alarms (insufficient multicast bandwidth), IGMP snooping state malfunctions, or subscriber traffic shaping/bandwidth checks. Authorization failures map directly to "no permission to watch the program."

NEW QUESTION # 99

Assume that there are 500 broadband users with a concurrency rate of 40%, penetration rate of 50%, online bandwidth of 4 Mbit/s, duty cycle of 12.5%, 1 channel, and coverage rate of 70%. Then the bandwidth is 35 Mbit/s.

- A. TRUE
- B. FALSE

Answer: A

NEW QUESTION # 100

Type B protection provides redundant protection for both OLT PON ports and backbone fibers when OLT or OLT PON If the port or trunk fiber fails, manually switch to another - luguang.

- A. True
- B. False

Answer: B

NEW QUESTION # 101

If multicast services are deployed only on private networks, which multicast address segment is preferred?

- A. 239.0.0.0/8
- B. 232.0.0.0/8
- C. 224.0.0.0/8
- D. 225.0.0.0/8

Answer: A

NEW QUESTION # 102

.....

The evergreen field of Huawei is so attractive that it provides non-stop possibilities for the one who passes the Huawei H35-211_V2.5 exam. So, to be there on top of the IT sector, earning the HCIP-Access V2.5 (H35-211_V2.5) certification is essential. Because of using outdated H35-211_V2.5 Study Material, many candidates don't get success in the H35-211_V2.5 exam and lose their resources. The H35-211_V2.5 PDF Questions of PassSureExam are authentic and real.
