

# Well Nutanix NCP-EUC Prep | Questions NCP-EUC Exam

2026 Latest Lead2Passed NCP-EUC PDF Dumps and NCP-EUC Exam Engine Free Share: <https://drive.google.com/open?id=1Pn5WKDoPGepwvMscGn2Up4vqBZAZHP>

NCP-EUC Practice Material is from our company which made these NCP-EUC practice materials with accountability. And NCP-EUC Training Materials are efficient products. What is more, NCP-EUC Exam Prep is appropriate and respectable practice material. We know making progress and getting the certificate of NCP-EUC Training Materials will be a matter of course with the most professional experts in command of the newest and the most accurate knowledge in it. Our NCP-EUC exam prep has taken up a large part of market.

Nutanix Certified Professional - End-User Computing (NCP-EUC) certification exam is an important credential for IT professionals who specialize in virtual desktop infrastructure (VDI). It is designed to assess an individual's knowledge of Nutanix's VDI solutions and their ability to install, configure, and manage these solutions. If you are an IT professional looking to advance your career in VDI, obtaining the NCP-EUC Certification can help you achieve your goals.

## 100% Pass 2026 Realistic Well NCP-EUC Prep - Questions Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Exam

With our NCP-EUC practice test software, you can simply assess yourself by going through the NCP-EUC practice tests. We highly recommend going through the NCP-EUC answers multiple times so you can assess your preparation for the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam. Make sure that you are preparing yourself for the NCP-EUC test with our practice test software as it will help you get a clear idea of the real NCP-EUC exam scenario. By passing the exams multiple times on practice test software, you will be able to pass the real NCP-EUC test in the first attempt.

The NCP-EUC certification exam is an ideal choice for IT professionals who want to validate their skills and knowledge in end-user computing. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification exam is designed to help IT professionals demonstrate their expertise in Nutanix's end-user computing technology solutions. NCP-EUC Exam covers a wide range of topics, including Nutanix VDI, application delivery, and management, as well as the deployment and troubleshooting of these technologies.

## Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q56-Q61):

### NEW QUESTION # 56

An administrator needs to create a new MCS Catalog, but is receiving a failure error, as shown below:

```
Acropolis _ Inventory: Getccntent Exception:system.ArgumentException: Error during serialization or deserialization using the JSON Java Scriptserializer. The length of the string exceeds the value set on the maxJsonLenth property.
```

- A. Running the below command on CVM shows the following output:

- B. nutanix@cvmr: ~\$ acli snapshot.list I wc - l
- C. 0
- D. nutanix@cvmr: ~\$ acli snapshot.list I wc - l
- E. 1

**Answer: B,C,D**

#### NEW QUESTION # 57

An administrator has been asked to enable multi-monitor support for a graphic designer that needs to be able to use four monitors. After on boarding the designer on to the Frame desktop, the end user does not see the ability to use all four monitors while using the Firefox web browser.

What should the administrator do to enable the ability to use all four monitors?

- A. Switch to Edge
- B. Switch to Chrome
- C. Switch to Safari
- D. Deploy Frame App

**Answer: D**

Explanation:

According to Nutanix documentation, to use more than two monitors with Frame, you need to deploy the Frame App. The Frame App provides multi-monitor support, whereas using Frame through web browsers is currently limited to two monitors. Frame App is a native application that provides a better user experience for accessing Frame desktops and applications than a web browser<sup>1</sup>. Frame App supports the Frame multi-monitor feature automatically. If an end user has more than one monitor attached to their device, Frame App prompts the user if they want to use all of their monitors<sup>1</sup>. Frame Administrators do not have to enable explicitly multi-monitor support for Frame App users<sup>1</sup>.

#### NEW QUESTION # 58

After receiving multiple complaints from VMware Horizon-based virtual desktop users about their slower logon and application load times, an administrator performed troubleshooting on the issue to optimize the environment.

The following discoveries were made on the Nutanix cluster:

- A. 75% average memory utilization
- B. Host power Policy set to High Performance
- C. Failed to create Native clone errors.
- D. 4% average CPU Ready time

**Answer: C**

Explanation:

one of the possible causes of slower logon and application load times for VMware Horizon-based virtual desktop users is Failed to create Native clone errors. This error occurs when there is a problem with cloning virtual machines using Nutanix Native Clones technology. To troubleshoot this issue, you can check the following:

The Nutanix cluster has enough free space to create clones

The Nutanix cluster has enough CPU and memory resources to handle cloning operations The Nutanix cluster is running a compatible version of AOS and AHV with VMware Horizon The VMware Horizon environment is configured correctly to use Nutanix Native Clones The VMware Horizon agent is installed and updated on the master image

#### NEW QUESTION # 59

A previous administrator provisioned all of the virtual desktops in a virtual desktop Nutanix cluster using the following specifications:

- \* 6 vCPU
- \* 8 GB Memory
- \* 300 GB HDD

How can the current administrator best prepare next fiscal year's budget using Prism Central?

- A. Review most recent in Tasks.
- B. Review the most recent in Audits.
- C. Execute a Calm blueprint to add additional desktops.
- **D. Execute Capacity Runway scenario.**

**Answer: D**

Explanation:

In Nutanix Prism Central, the Capacity Runway scenario provides details on the available capacity for the next 12 months based on the current usage pattern. This feature can help the administrator to plan and prepare the budget for the next fiscal year. The administrator can use this information to decide whether more resources need to be added to the Nutanix cluster or if the existing resources are sufficient.

<https://www.nutanix.com/products/prism/prism-central>

Prism Central planning tools can help you estimate the capacity runway of your cluster by considering the storage, CPU, and memory capacity. However, you need to have at least 21 days of data from a cluster to calculate the baseline runway estimates<sup>4</sup>.

### NEW QUESTION # 60

A group of developers are migrating from physical computers to persistent virtual desktops. What is the recommended migration path?

- A. Deploy a base image and provision required hosted applications
- B. Convert the developers profile to a roaming profile.
- **C. Convert the physical computers to virtual desktops,**
- D. Deploy non-persistent desktops and install required applications.

**Answer: C**

Explanation:

persistent virtual desktops are virtual desktops that retain their state and configuration across sessions.

This means that users can customize their virtual desktops with their own applications, settings, and data, and have them available every time they log on.

Persistent virtual desktops are suitable for users who need a consistent and personalized experience, such as developers.

According to Nutanix best practices<sup>2</sup>, one of the recommended migration paths for persistent virtual desktops is to convert the physical computers to virtual desktops.

This can be done by using a tool such as VMware Converter or Microsoft Disk2vhd to create a virtual disk image of the physical computer's hard drive.

Then, this image can be imported into Nutanix Cloud Platform and used as a base image for creating persistent virtual desktops.

This migration path can preserve the existing applications, settings, and data of the physical computers and minimize the disruption for the users.
