The MikroTik Certified Network Associate Exam (MTCNA) practice questions have a close resemblance with the actual MikroTik Certified Network Associate Exam (MTCNA) exam. Our MikroTik MTCNA exam dumps give help to give you an idea about the actual MikroTik Certified Network Associate Exam (MTCNA) exam. You can attempt multiple MikroTik Certified Network Associate Exam (MTCNA) exam questions on the software to improve your performance.

The MTCNA exam is recognized globally and is a valuable certification for IT professionals who want to enhance their career opportunities. MikroTik Certified Network Associate Exam certification not only validates the knowledge and skills of candidates but also demonstrates their commitment to their profession. The MTCNA Certification is the first step in a series of certifications offered by MikroTik, and it provides a strong foundation for professionals who want to pursue further certifications in the field of networking.

MTCNA Training Questions & MTCNA Reliable Exam Pdf

It is a truth universally acknowledged that the exam is not easy but the related MTCNA certification is of great significance for workers in this field so that many workers have to meet the challenge, I am glad to tell you that our company aims to help you to pass the examination as well as gaining the related certification in a more efficient and simpler way. During recent 10 years, our MTCNA Exam Questions have met with warm reception and quick sale in the international market. Our MTCNA study materials are not only as reasonable priced as other makers, but also they are distinctly superior in the following respects.

MikroTik Certified Network Associate Exam Sample Questions (Q157-Q162):

NEW QUESTION # 157

What protocol does ping use?

- **A. ICMP**
- B. UDP
- C. TCP
- D. ARP

Answer: A

Explanation:

Ping is a network diagnostic tool used to test the reachability of a host and measure round-trip time for packets. It uses the Internet Control Message Protocol (ICMP), not TCP or UDP.

ICMP is a Layer 3 protocol designed for diagnostics and control messaging. Ping sends ICMP Echo Request packets and waits for ICMP Echo Reply packets.

Evaluation:

- * A. TCP # Used for reliable data transmission, not for ping.
- * B. ARP # Resolves MAC addresses on LANs; unrelated to ping.
- * C. UDP # Used for connectionless communication; ping does not use it.
- * D. ICMP # Correct. Protocol used by ping.

Extract from MTCNA Official Training Slides - Tools Section:

"Ping sends ICMP Echo Request messages to the target IP address and expects Echo Reply messages. ICMP is a protocol used for diagnostic purposes." Rene Meneses Study Guide - Diagnostic Tools:

"Ping is based on ICMP, which is part of Layer 3. It's used for checking connectivity and response times." Terry Combs Notes - Common Tools:

"Ping = ICMP. Always. No TCP/UDP involved."

NEW QUESTION # 158

Which of the following are layers in the TCP/IP model?

Application

Session

Transport

Internet

Data Link

Physical

- A. 2, 3 and 5
- B. 3, 4 and 5
- C. 1, 3 and 4
- D. 1 and 2

Answer: C

NEW QUESTION # 159

Which features are removed when the advanced-tools package is uninstalled?

- A. ip-scan
- B. LCD support
- C. neighbors
- D. bandwidth-test
- E. ping
- F. netwatch

Answer: A,D,F

Explanation:

The advanced-tools package in MikroTik RouterOS contains a set of diagnostic and monitoring tools. If this package is removed, the following features are lost:

- * ip-scan ##Used for scanning IP ranges to discover hosts
- * netwatch ##Monitors host availability and runs scripts on status changes
- * bandwidth-test ##Used to measure throughput between MikroTik devices

Incorrect options:

- * A. neighbors # Part of the main system package (MAC discovery)
- * B. LCD support # Tied to specific hardware; not affected by advanced-tools
- * D. ping # Part of the base system package

MTCNA System Tools Section - Package Breakdown:

"The advanced-tools package includes netwatch, bandwidth-test, and ip-scan. These are not part of the base system." Rene Meneses Guide - Package Management:

"Removing advanced-tools disables several diagnostic commands like ip-scan and bandwidth-test." Terry Combs Notes - Tools Overview:

"Ping and neighbors are in core OS. Advanced-tools affects monitoring scripts and traffic tools."

NEW QUESTION # 160

A client that has successfully connected to a wireless network is considered to be which of the following?
Choose all that apply:

- A. Unauthenticated
- B. Unassociated
- C. Authenticated
- D. Associated

Answer: C,D

Explanation:

For a client to exchange data over a wireless network, it must complete two key steps:

- * Association - Establishes the basic radio link between client and access point
- * Authentication - Verifies credentials (e.g., WPA2 handshake)

When both are complete, the client is both authenticated and associated.

- * A.#Authenticated - Encryption and access control is complete
- * B.#Associated - Wireless radio link is established
- * C.#Unauthenticated - Incorrect; client is verified
- * D.#Unassociated - Incorrect; client is linked to AP

Extract from MTCNA Course Material - Wireless Client States:

"A connected client is associated (Layer 2) and authenticated (security/credentials verified)." Extract from Terry Combs MTCNA Notes - Wireless States:

"Authenticated and associated are required for data transfer. Unassociated = disconnected."

NEW QUESTION # 161

In order to use dynamic keys in your wireless security profile for an AP, you MUST set up the dhcp server to provide the dynamic keys.

- A. false
- B. true

Answer: A

NEW QUESTION # 162

.....

As indicator on your way to success, our MTCNA practice materials can navigate you through all difficulties in your journey. Every challenge cannot be dealt like walk-ins, but our MTCNA simulating practice can make your review effective. That is why our MTCNA study questions are professional model in the line. With high pass rate as more than 98%, our MTCNA exam questions have helped tens of millions of candidates passed their exam successfully.
