

Most Analytics-Con-301 Reliable Questions, Analytics-Con-301 PDF Download

Increase Your Confidence with Latest Cisco 200-301 Dumps

Are you hesitating to take the Cisco Certified Network Associate 200-301 questions because you are afraid of the exam? It is okay. We understand how so many people share the same fear as you. The [200-301 exam question](#) is indeed hard to pass, yet the 200-301 practice test itself is pretty expensive to register. Nobody wants to spend their money to get nothing in the end. Not to mention how much time and energy you would have to spend for the whole process. Fortunately, there is the 200-301 exam dumps preparation package for the 200-301 questions. This complete package includes a program of how you should prepare your 200-301 exam dumps, along with all the materials you require on this process. By investing in our product, you will increase your chance of passing your exam.

Cisco 200-301 Exam Information:

Vendor: Cisco
Exam Code: 200-301
Certification Name: CCNA
Exam Name: Cisco Certified Network Associate
No of Questions: 760
Exam Language: English

What's more, part of that DumpsTorrent Analytics-Con-301 dumps now are free: <https://drive.google.com/open?id=1jFNLAfXGUrGwpz6GAUL4P7z20pVxbJNK>

The Salesforce Analytics-Con-301 exam dumps features are a free demo download facility, real, updated, and error-free Salesforce Analytics-Con-301 test questions, 1 year free updated Salesforce Certified Tableau Consultant (Analytics-Con-301) exam questions and availability of Salesforce Analytics-Con-301 real questions in three different formats. Salesforce PDF Questions format, web-based practice test, and desktop-based Analytics-Con-301 Practice Test formats. All these three Salesforce Analytics-Con-301 exam dumps formats features surely will help you in preparation and boost your confidence to pass the challenging Salesforce Certified Tableau Consultant (Analytics-Con-301) exam with good scores.

Salesforce Analytics-Con-301 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">IT Management: This domain measures skills related to managing Tableau environments. It includes planning server upgrades, recommending deployment solutions (on-premise or cloud), and ensuring alignment between technical and business requirements for analytics infrastructure. It also involves troubleshooting and optimizing system performance relevant to Tableau Server and Cloud deployments.
Topic 2	<ul style="list-style-type: none">Data Management: This part focuses on establishing governance and support for published content. Tableau Consultants are expected to manage data security, publish and maintain data sources and workbooks, and oversee content access. It includes applying governance best practices, using metadata APIs, and supporting administration functions to maintain data integrity and accessibility.
Topic 3	<ul style="list-style-type: none">Business Consulting: For Tableau Consultants, this section involves designing and troubleshooting calculations and workbooks to meet advanced analytical use cases. It covers selecting appropriate chart types, applying Tableau's order of operations in calculations, building interactivity into dashboards, and optimizing workbook performance by resolving resource-intensive queries and other design-related issues.

Topic 4	<ul style="list-style-type: none"> • Data Analysis: This domain targets Tableau Consultants to plan and prepare data connections effectively. It includes recommending data transformation strategies, designing row-level security (RLS) data structures, and implementing advanced data connections such as Web Data Connectors and Tableau Bridge. Skills in specifying granularity and aggregation strategies for data sources across Tableau products are emphasized.
Topic 5	<ul style="list-style-type: none"> • Data Visualization: This section evaluates the Tableau Consultant's ability to design effective visual analytics solutions. It involves creating dashboards and visual reports that enhance user understanding, employing techniques like dynamic actions and advanced chart types, and ensuring performance optimization for an interactive user experience.

Marvelous Salesforce Most Analytics-Con-301 Reliable Questions Are Leading Materials & Verified Analytics-Con-301: Salesforce Certified Tableau Consultant

If you buy our Analytics-Con-301 training quiz, you will find three different versions are available on our test platform. According to your need, you can choose the suitable version of our Analytics-Con-301 exam questions for you. The three different versions of our Analytics-Con-301 Study Materials include the PDF version, the software version and the online version. We can promise that the three different versions are equipped with the high quality for you to pass the exam.

Salesforce Certified Tableau Consultant Sample Questions (Q18-Q23):

NEW QUESTION # 18

A client uses Tableau Data Management and notices that when they view a data source, they sometimes see a different count of workbooks in the Connected Workbooks tab compared to the lineage count in Tableau Catalog. What is the cause of this discrepancy?

- A. Some workbooks have not been viewed by enough users yet.
- B. Some Creators have connected to the data source in Tableau Desktop but have not yet published a workbook.
- C. Some workbooks have been connected to the data source, but do not use any fields from it.
- **D. Some of the workbooks connected to the data source are not visible to the user due to permissions.**

Answer: D

Explanation:

The discrepancy between the count of workbooks in the Connected Workbooks tab and the lineage count in Tableau Catalog can occur because of user permissions. In Tableau Data Management, the visibility of connected workbooks is subject to the permissions set by administrators. If a user does not have permission to view certain workbooks, they will not see them listed in the Connected Workbooks tab, even though these workbooks are part of the data source's lineage and are counted in Tableau Catalog. References: This explanation is based on the functionality of Tableau Data Management and Tableau Catalog, which includes managing user permissions and access to workbooks. The information is supported by Tableau's official documentation on data management and security practices¹.

NEW QUESTION # 19

A university has data on its undergraduate students and their majors by grade level (Freshman, Sophomore, Junior, Senior). The university is interested in visualizing the path students take as they change majors across grade levels. Which visualization type should the consultant recommend?

- A. Radar Chart
- B. Tree Chart
- C. Chord Chart
- **D. Sankey Diagram**

Answer: D

Explanation:

To visualize the path students take as they change majors across different grade levels, a Sankey Diagram is highly effective. This type of visualization illustrates the flow and quantity between different stages or categories:

Sankey Diagram: It allows for a visual representation of students' movements between majors over time. Each flow's thickness is proportional to the number of students moving from one major to another, giving a clear, immediate visual cue of major popularity and student migration patterns.

To create a Sankey Diagram in Tableau, you typically need to prepare the data specifically for this type of chart. The data must include source (starting major), target (ending major), and the value (number of students). It often requires custom calculations and data reshaping to get the data in a format that a Sankey can use.

Once the data is prepared, you can use a combination of calculated fields, path binning, and line charts to simulate the flow effect in Tableau. External plugins or web-based integrations might also be employed for more direct implementations.

References

Sankey Diagrams are not natively supported in Tableau but can be implemented through creative use of data preparation and calculations, as suggested in advanced Tableau user communities and demonstrated in various Tableau public galleries.

NEW QUESTION # 20

A client wants to provide sales users with the ability to perform the following tasks:

- * Access published visualizations and published data sources outside the company network.
- * Edit existing visualizations.
- * Create new visualizations based on published data sources.
- . Minimize licensing costs.

Which site role should the client assign to the sales users?

- **A. Explorer (can publish)**
- B. Viewer
- C. Site Administrator
- D. Creator

Answer: A

Explanation:

The Explorer (can publish) site role in Tableau is designed for users who need to access, edit, and create visualizations based on published data sources, even when they are outside the company network. This role allows users to perform web editing and save their work, making it suitable for sales users who need these capabilities. It is also a cost-effective option as it does not require the full capabilities and associated costs of the Creator license.

References: The information about the Explorer (can publish) role and its capabilities can be found in the official Tableau documentation on site roles and permissions¹². This role is appropriate for users who need to interact with published content and create new visualizations without the need for full site administration or advanced content creation tools that come with the Creator role³.

NEW QUESTION # 21

A client is evaluating which user roles to assign to managers. The managers need to view dashboards, create Data-Driven Alerts, and perform ad hoc analysis of existing Tableau data sources. A consultant must provide a solution that minimizes licensing costs.

Which role should the consultant recommend be assigned to the managers?

- **A. Explorer**
- B. Viewer
- C. Site Administrator
- D. Creator

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Tableau documentation clearly defines user capabilities per license:

Viewer

- * Can view dashboards only.
- * Cannot create Data-Driven Alerts.
- * Cannot perform ad hoc analysis.# Insufficient.

Explorer

- * Can view dashboards.
- * Can create Data-Driven Alerts.
- * Can perform ad hoc analysis using existing published data sources.
- * Does NOT require full creator-level capabilities.# Meets all requirements at lower cost than Creator.

Creator

- * Full authoring, data source creation, and prep capabilities.
- * Higher cost.# Overkill and violates "minimizes licensing costs."

Site Administrator

- * Includes Creator capabilities plus admin privileges.
- * Most expensive.# Not appropriate for managers.

Therefore, the correct and most cost-efficient role is Explorer.

- * Tableau role capability matrix showing Explorers can create alerts and analyze existing data sources.
- * Licensing guidance recommending Explorer for ad hoc analysis without data-source creation.

NEW QUESTION # 22

A client notices that while creating calculated fields, occasionally the new fields are created as strings, integers, or Booleans. The client asks a consultant if there is a performance difference among these three data types.

What should the consultant tell the customer?

- A. Strings are fastest, followed by integers, and then Booleans.
- B. Booleans are fastest, followed by integers, and then strings.
- C. Strings, integers, and Booleans all perform the same.
- D. Integers are fastest, followed by Booleans, and then strings.

Answer: D

Explanation:

In Tableau, the performance of calculated fields can vary based on the data type used. Calculations involving integers and Booleans are generally faster than those involving strings. This is because numerical operations are typically more efficient for a computer to process than string operations, which can be more complex and time-consuming. Therefore, when performance is a consideration, it is advisable to use integers or Booleans over strings whenever possible.

References: The performance hierarchy of data types in Tableau calculations is documented in resources that discuss best practices for optimizing Tableau performance¹.

NEW QUESTION # 23

.....

If you can possess the certification, your competitive force in the job market will be improved, and you can also improve your salary. Analytics-Con-301 exam dumps can help you pass the exam and obtain the certification successfully. With a professional team to edit and verify, Analytics-Con-301 exam materials are high quality and accuracy. In addition, we offer you free demo to have a try, so that you can know what the complete version is like. We have online and offline chat service, and the service staff possess the professional knowledge for Analytics-Con-301 Exam Materials, if you have any questions, you can consult us.
