Everyone is desired to have the certification. Because The MuleSoft-Integration-Associate Certification can bring a lot of benefits for people, including money, a better job and social status and so on.

## Salesforce Certified MuleSoft Integration Associate Exam Sample Questions (Q40-Q45):

### NEW QUESTION # 40

An organization needs to procure an enterprise software system to increase cross-selling opportunities and better track prospect data.

Which category of enterprise software has these core capabilities, when used for its typical and intended purpose?

- A. IT Service Management (ITSM)

- B. Supply Chain Management (SCM)
- **C. Customer Relationship Management (CRM)**
- D. Business-to-Business (B2B)

**Answer: C**

Explanation:

Customer Relationship Management (CRM) systems are designed to manage an organization's interactions with current and potential customers. Here's a detailed explanation:

\* Core Capabilities:

\* Cross-Selling Opportunities: CRM systems track customer interactions, preferences, and purchasing history, helping businesses identify opportunities for cross-selling and upselling.

\* Prospect Data Management: CRM systems manage prospect information, track leads, and nurture relationships through the sales funnel.

\* Typical Use:

\* Sales Management: Helps sales teams manage and analyze customer interactions and data throughout the customer lifecycle.

\* Marketing Automation: Assists in automating marketing campaigns, segmenting customer lists, and tracking campaign effectiveness.

\* Customer Service: Provides tools for managing customer support cases, improving customer

\* satisfaction, and retaining customers.

#### NEW QUESTION # 41

A platform architect includes both an API gateway and a service mesh in the architecture of a distributed application for communication management.

Which type of communication management does a service mesh typically perform in this architecture?

- **A. Between services within the application**
- B. Between the application and external API implementations
- C. Between application services and the firewall
- D. Between the application and external API clients

**Answer: A**

Explanation:

A service mesh is typically used to manage communication between microservices within a distributed application. Here's a detailed explanation:

\* Service Mesh:

\* Definition: A service mesh is a dedicated infrastructure layer that manages service-to-service communication within a microservices architecture.

\* Features: Provides features such as load balancing, service discovery, traffic management, and security (e.g., mutual TLS).

\* Intra-Application Communication:

\* Focus: It focuses on internal communication between microservices, ensuring reliability, security, and observability of inter-service communications.

\* Management: Handles retries, circuit breaking, and service-to-service authentication transparently.

\* API Gateway:

\* Complementary Role: While a service mesh manages internal microservice communications, an API gateway manages external client requests and provides a single entry point for external API clients.

#### NEW QUESTION # 42

As part of a growth strategy a supplier signs a trading agreement with a large customer. The customer sends purchase orders to the supplier according to the ANSI X12 EDI standard and the supplier creates the orders in its ERP system using the information in the EDI document. The agreement also requires that the supplier provide a new RESTful API to process requests from the customer for current product inventory levels from the supplier's ERP system.

Which two fundamental integration use cases does the supplier need to deliver to provide an end-to-end solution for this business scenario? (Choose two.)

- A. Data mashups
- B. User interface integration
- **C. Sharing data with external partners**
- **D. Synchronized data transfer**
- E. Streaming data ingestion

**Answer: C,D**

Explanation:

To deliver an end-to-end solution for the described business scenario, the supplier needs to address both EDI processing and providing real-time data through a RESTful API. Here's a detailed explanation:

\* Sharing Data with External Partners:

\* EDI Integration: The supplier needs to process ANSI X12 EDI purchase orders from the customer and convert them into a format suitable for the ERP system.

\* Partner Integration: Establishing secure and reliable data exchanges with the customer is crucial for seamless transactions.

\* Synchronized Data Transfer:

\* Real-Time API: Providing a RESTful API to allow the customer to query current product inventory levels from the supplier's ERP system.

\* Data Consistency: Ensuring that the data provided through the API is accurate and up-to-date, reflecting the current state of the ERP system.

### NEW QUESTION # 43

In preparation for a digital transformation initiative an organization is reviewing related IT integration projects that failed for various reasons. According to MuleSoft's surveys of global IT leaders, what is a common cause of IT project failure that this organization may likely discover in its assessment?

- **A. Lack of alignment around business outcomes**
- B. Spending too much time on enablement
- C. Following an Agile delivery methodology
- D. Reliance on an Integration-Platform-as-a-Service (iPaaS)

**Answer: A**

Explanation:

One common cause of IT project failure identified by MuleSoft's surveys of global IT leaders is the lack of alignment around business outcomes. Here's a detailed explanation:

\* Lack of Alignment:

\* Definition: This occurs when IT projects are not clearly linked to the organization's strategic goals and business objectives.

\* Impact: Misalignment can lead to projects that do not deliver the intended business value, resulting in wasted resources and failed initiatives.

\* Common Causes:

\* Poor Communication: Lack of effective communication between business stakeholders and IT teams can lead to misunderstandings and misaligned priorities.

\* Undefined Objectives: Projects without clearly defined business outcomes and success metrics struggle to demonstrate value and justify investments.

\* Solution:

\* Business-IT Collaboration: Foster strong collaboration between business and IT to ensure projects are aligned with strategic goals.

\* Outcome-Focused Planning: Define clear business outcomes and success criteria at the outset of each project.

#### NEW QUESTION # 44

Which AnypointPlatform component helps integration developers discover and share reusable APIs, connectors and templates'?

- A. API Manager
- B. Anypoint Studio
- **C. Anypoint Exchange**
- D. Design Center

**Answer: C**

Explanation:

Anypoint Exchange is a component of the Anypoint Platform that helps integration developers discover and share reusable APIs, connectors, and templates. Here's a detailed explanation:

\* Anypoint Exchange:

\* Purpose: Acts as a centralized repository for discovering, sharing, and reusing APIs, connectors, templates, and other integration assets.

\* Discovery: Developers can search for and find existing APIs, connectors, and templates within the organization or from the wider MuleSoft community.

\* Sharing: Allows developers to publish their APIs and assets, making them available for reuse by others in the organization.

\* Benefits:

\* Reusability: Promotes reuse of existing assets, reducing development time and effort.

\* Collaboration: Facilitates collaboration and sharing of best practices among development teams.

\* Documentation: Provides comprehensive documentation and usage examples for each asset.

References

\* MuleSoft Documentation: Anypoint Exchange

\* Anypoint Platform Features: Discover and Share with Exchange
