

HPE7-A03 Exams & HPE7-A03 Exam Exercise

What's more, part of that Actual4Dumps HPE7-A03 dumps now are free: https://drive.google.com/open?id=1ewDp_M8gGfaacoV4SVSSRJp6IRhWGjVt

Nowadays, all of us are living a fast-paced life and we have to deal with things with high-efficiency. We also develop our HPE7-A03 practice materials to be more convenient and easy for our customers to apply and use. The most advanced operation system in our HPE7-A03 Exam Questions which can assure you the fastest delivery speed, and your personal information will be encrypted automatically by our operation system. Within several minutes, you will receive our HPE7-A03 study guide!

HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.
Topic 2	<ul style="list-style-type: none">• Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.
Topic 3	<ul style="list-style-type: none">• Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.
Topic 4	<ul style="list-style-type: none">• Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.

2026 Perfect HPE7-A03 – 100% Free Exams | Aruba Certified Campus Access Architect Exam Exam Exercise

Our experts are working hard on our HPE7-A03 exam questions to perfect every detail in our research center. Once they find it possible to optimize the HPE7-A03 study guide, they will test it for many times to ensure the stability and compatibility. Under a series of strict test, the updated version of our HPE7-A03 learning quiz will be soon delivered to every customer's email box since we offer one year free updates so you can get the new updates for free after your purchase.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q89-Q94):

NEW QUESTION # 89

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sq m). Data centers are all offsite and will be out of scope for this project. The customer is underserved by its existing L2- based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services.

The client would like to ensure full wireless coverage in its 40 m x 40 m (130 ft x 130 ft) auditorium during company functions while maintaining the fewest APs for aesthetic purposes.

Wi-Fi6 APs are a minimum requirement.

Which AP series would you use in the auditorium's 1,000 seats with a maximum take rate of 80%?

- A. AP577
- B. AP555
- C. AP635
- D. AP515

Answer: C

Explanation:

The Aruba AP-635 is a Wi-Fi 6 (802.11ax) access point, designed for high-density environments such as auditoriums. It is capable of providing high throughput and efficient airtime fairness to a large number of clients, which makes it suitable for an auditorium setting with 1,000 seats and a high take rate. The AP-635's advanced capabilities, including OFDMA and MU-MIMO, allow it to handle multiple simultaneous connections efficiently, ensuring robust wireless coverage and performance during company functions, all while keeping the number of APs to a minimum to satisfy aesthetic concerns.

NEW QUESTION # 90

Hotspot Question

Based on this campus design, which layer is the most appropriate to be designed as a Border Persona, considering an EVPN VXLAN Fabric?

□

Answer:

Explanation:

□

NEW QUESTION # 91

Which licenses are needed in order to use the UXI Client on Zebra (Devices? (Select two.)

- A. Wireless Insights
- B. UXI LTE Subscription
- C. UXI Cloud Subscription
- D. UXI Agent Subscription

Answer: C,D

Explanation:

To utilize the UXI Client on Zebra Devices, the necessary licenses include the UXI Cloud Subscription (Option A) and the UXI Agent Subscription (Option B). The UXI Cloud Subscription provides access to the UXI platform's cloud-based analytics and insights, facilitating the monitoring and management of network performance and user experience. The UXI Agent Subscription is required for each Zebra device, enabling it to run the UXI Client software that collects and sends network performance data to the UXI cloud platform.

Together, these licenses empower organizations to enhance network visibility and improve the user experience on Zebra devices within their networks.

NEW QUESTION # 92

What possible issue with the core switch selection do you see in regards to the customers' requirements?

- A. The core switch will have a lot of unused ports.
- B. The core switch will not support the 10GbE downlinks to the cabins and technical rooms.
- C. The core switch will not have enough ports for VSX links.
- D. The core switch will not support the 25GbE downlinks to the distribution switches.

Answer: A

Explanation:

* Customer Requirement Recap (cruise line scenario):

* Each ship has two core switches in the MDF.

* Each core connects to up to 10 distribution switches in IDFs.

* Uplinks between core and distribution are 25 GbE SMF links.

* Cabins/technical rooms connect to distribution switches via 10 GbE uplinks.

* Only 8 uplinks per core switch are required to meet the design.

* Issue Identified:

* The selected core switch platform provides dozens of 25/40/100 GbE ports, far exceeding what is needed for this environment.

* With only 8 ports in use per core, that leaves ~40 unused ports.

* This creates a cost inefficiency - the customer is paying for hardware capacity that will remain idle.

* Why the Correct Answer is B:

* The main "issue" is not about lack of capability (uplinks and VSX are supported).

* The issue is about overprovisioning - the core switch selection results in a large number of unused ports, which is against the CIO's requirement to limit unused capacity and avoid waste.

* Why Not the Other Options:

* A. Core will not support 25 GbE downlinks # Incorrect. The selected core switches do support 25 GbE uplinks.

* C. Not enough ports for VSX links # Incorrect. Core switches only require a few ports for VSX interconnect, which is easily supported.

* D. Core will not support 10 GbE downlinks to cabins # Incorrect. Core switches don't connect directly to cabins; those connections terminate at the distribution layer.

Aruba Design Guide Reference:

* Aruba ESP Campus Design Principles: Switch sizing should consider right-sizing the port count to avoid excessive unused capacity.

* Aruba Validated Solution Guides: Core switches should be selected for performance, scalability, and efficiency - not overspec'd beyond realistic need.

Final Justification:

The issue with the customer's core switch selection is not about functionality, but about efficiency. Only 8 uplinks per core are needed, leaving ~40 ports unused - which contradicts the CIO's goal of minimizing unused ports.

NEW QUESTION # 93

The current IT staff is used to working with legacy OS-S (ProCurve) equipment. They are worried that they cannot handle OS-CX switches due to the different command syntax. What are two ways to make the transition easier for them? (Choose two.)

- A. ASP
- B. create aliases
- C. CLI Reference Guide for OS-CX, OS-Switch, Comware and Cisco IOS
- D. CLI Bank

Answer: B,C

Explanation:

To ease the transition for IT staff accustomed to legacy Aruba OS-S (ProCurve) equipment when moving to Aruba OS-CX switches, two effective approaches are creating aliases (Option A) and using the CLI Reference Guide for Aruba OS-CX, Aruba OS-Switch, Comware, and Cisco IOS (Option B). Aliases allow the creation of custom command shortcuts or mappings in Aruba OS-CX, which can mimic or resemble the commands staff are familiar with from Aruba OS-S, making the command-line interface (CLI) more intuitive for them. The CLI Reference Guide is an invaluable resource that provides a comparative view of commands across different operating systems, including Aruba OS-CX and Aruba OS-S, helping staff understand the equivalent commands

and functionalities in the new OS-CX environment. Both these tools can significantly reduce the learning curve and help the IT staff become proficient with Aruba OS-CX switches more quickly.

NEW QUESTION # 94
