

# Latest 1Z0-1151-25 Exam Book & 100% Latest 1Z0-1151-25 Official Cert Guide Library - Oracle Cloud Infrastructure 2025 Multicloud Architect Professional

BONUS!!! Download part of TopExamCollection 1Z0-1151-25 dumps for free: [https://drive.google.com/open?id=1j3v1qyPfiKSmZOWHNN\\_g6BiLiDeB34B1](https://drive.google.com/open?id=1j3v1qyPfiKSmZOWHNN_g6BiLiDeB34B1)

Actually we eliminate the barriers blocking you from our 1Z0-1151-25 practice materials. All types of our 1Z0-1151-25 exam questions are priced favorably on your wishes. Obtaining our 1Z0-1151-25 study guide in the palm of your hand, you can achieve a higher rate of success. Besides, there are free demos for your careful consideration to satisfy individual needs on our 1Z0-1151-25 learning prep. You can free download them to check if it is the exact one that you want.

## Oracle 1Z0-1151-25 Exam Syllabus Topics:

| Topic   | Details  |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"><li>• Introduction to Multicloud: This section of the exam measures the skills of Cloud Architects in understanding multicloud environments and their benefits. It covers the reasons organizations adopt multi-cloud strategies, including flexibility, cost optimization, and risk management. Candidates will learn about common multicloud use cases and how they are implemented in Oracle Cloud Infrastructure (OCI) to enhance interoperability and performance.</li></ul>  |
| Topic 2 | <ul style="list-style-type: none"><li>• Implement Oracle Database@Google Cloud: This section measures the proficiency of Cloud Database Engineers in utilizing Oracle Database@Google Cloud. It explores the architecture and operational framework for running Oracle databases on Google Cloud. Candidates will learn about onboarding procedures, provisioning resources, and managing database services effectively to optimize performance and availability in a Google Cloud-integrated multi-cloud ecosystem.</li></ul>   |
| Topic 3 | <ul style="list-style-type: none"><li>• Core OCI Services Overview: This section evaluates the knowledge of Identity and Database Administrators in managing OCI's core services for multi-cloud integration. It covers the implementation of identity federation between OCI Identity Domains and external identity providers, ensuring secure authentication across multiple cloud environments. Candidates will also gain expertise in configuring Virtual Cloud Network (VCN) components and administering OCI database services, including Base Databases, Autonomous Databases, and HeatWave, to support scalable multi-cloud deployments.</li></ul> |
| Topic 4 | <ul style="list-style-type: none"><li>• Configure Multicloud Connection Options: This section assesses the abilities of Network Engineers in configuring connectivity solutions for OCI multi-cloud environments. It includes setting up secure networking options such as Site-to-Site VPN and FastConnect for seamless cloud integration. Candidates will also learn how to implement Oracle Interconnect services for establishing direct, high-performance connections between OCI and third-party cloud providers like Microsoft Azure and Google Cloud.</li></ul>  |
|         |  |

|         |   |
|---------|---|
| Topic 5 | <ul style="list-style-type: none"> <li>• <b>Implement Oracle Database@Azure:</b> This section tests the expertise of Database Solutions Architects in deploying and managing Oracle Database@Azure. It covers the architectural components and onboarding processes required for provisioning databases in Azure while maintaining Oracle's advanced database capabilities. Candidates will also focus on configuring high availability and disaster recovery strategies to ensure business continuity and data resilience in a multi-cloud setup.</li> </ul> |
|---------|---|

## Test 1Z0-1151-25 King | 1Z0-1151-25 Latest Exam Price

1Z0-1151-25 exam materials contain all the questions and answers to pass 1Z0-1151-25 exam on first try. The Questions & answers are verified and selected by professionals in the field and ensure accuracy and efficiency throughout the whole Product. You will not need to collect additional questions and answers from any other source because this package contains every detail that you need to Pass 1Z0-1151-25 Exam.

## Oracle Cloud Infrastructure 2025 Multicloud Architect Professional Sample Questions (Q47-Q52):

### NEW QUESTION # 47

Which of the Autonomous Database deployment options gives you exclusive use of Exadata hardware?

- A. Serverless
- B. Exclusive Deployment
- **C. Dedicated Deployment**
- D. Standalone Deployment

**Answer: C**

Explanation:

The Dedicated Deployment option for OCI Autonomous Database provides exclusive use of Exadata hardware, ensuring isolation and performance for critical workloads. Serverless (Option C) shares resources, while "Standalone" and "Exclusive" (Options A and B) are not standard OCI terms for this context. Oracle's Autonomous Database documentation specifies Dedicated Deployment as the option for dedicated Exadata infrastructure.

### NEW QUESTION # 48

How does Oracle Database on Google Cloud make database management easier for customers?

- **A. It enables customers to manage databases through the Google Cloud console or Google Cloud automation tools.**
- B. OCI offers a management console within Google Cloud to simplify database management.
- C. It requires customers to use Oracle-specific management tools.
- D. It automatically transfers all database management tasks to the Oracle Cloud Infrastructure console.

**Answer: A**

Explanation:

Oracle Database@Google Cloud simplifies management by allowing customers to use the Google Cloud console and GCP automation tools (e.g., Terraform) to provision and manage databases, integrating seamlessly with GCP workflows. It doesn't shift tasks to OCI (Option B), nor does OCI embed a console in GCP (Option C). Option D contradicts the multicloud ease-of-use goal. This is a key feature highlighted in Oracle's June 2024 Google Cloud partnership announcement.

### NEW QUESTION # 49

Which workload type is NOT optimized for Oracle Autonomous Database on Shared Exadata Infrastructure?

- **A. High-performance computing**
- B. Transaction processing

- C. Mixed workloads
- D. Data warehousing

**Answer: A**

Explanation:

Oracle Autonomous Database on Shared Exadata Infrastructure is optimized for data warehousing (Option A), mixed workloads (Option B), and transaction processing (Option D), leveraging Exadata's performance and automation. High-performance computing (HPC, Option C), typically involving compute-intensive tasks like simulations, is not a primary focus-OCI offers separate HPC solutions. Oracle's documentation confirms these workload optimizations.

#### NEW QUESTION # 50

When configuring a Site-to-Site VPN, which component resides on the customer's on-premises network?

- A. Dynamic Routing Gateway (DRG)
- B. Virtual Private Gateway (VPG)
- C. IPSec tunnel
- **D. Customer Premises Equipment (CPE)**

**Answer: D**

Explanation:

Here's why:

Customer Premises Equipment (CPE): The CPE is a physical or virtual device (e.g., a router, firewall, or dedicated VPN appliance) located on the customer's side of the VPN connection. It's responsible for establishing and maintaining the VPN tunnel to the cloud provider (in this case, OCI).

Why the other options are incorrect:

A). Dynamic Routing Gateway (DRG): The DRG is an OCI resource. It acts as the termination point for the VPN connection on the OCI side.

C). Virtual Private Gateway (VPG): While some cloud providers use the term "Virtual Private Gateway," OCI uses the DRG for this purpose. The VPG is not a component in OCI's VPN setup.

D). IPSec tunnel: The IPSec tunnel is the logical connection established between the CPE and the DRG. It's not a physical component that resides on either side of the connection. It's the secure communication channel itself.

#### NEW QUESTION # 51

What encryption protocol is used to secure data transmission in an OCI Site-to-Site VPN connection?

- A. Transport Layer Security (TLS)
- B. Datagram Transport Layer Security (DTLS)
- C. Secure Sockets Layer (SSL)
- **D. Internet Protocol Security (IPsec)**

**Answer: D**

Explanation:

OCI Site-to-Site VPN connections use Internet Protocol Security (IPsec) to secure data transmission, providing encryption and authentication over the tunnel. SSL (Option A) and TLS (Option C) are typically used for web traffic, not VPNs, while DTLS (Option B) is designed for datagram-based applications, not standard VPNs. Oracle's VPN documentation specifies IPsec as the protocol, aligning with industry standards for secure VPNs. The original question incorrectly listed SSL as the answer; IPsec is correct per OCI standards.

#### NEW QUESTION # 52

.....

Passing the 1Z0-1151-25 exam means you might get the chance of higher salary, greater social state and satisfying promotion chance. Once your professional 1Z0-1151-25 ability is acknowledged by authority, you master the rapidly developing information technology. With so many advantages, why don't you choose our reliable 1Z0-1151-25 actual exam guide, for broader future and better life? So our high efficiency 1Z0-1151-25 Torrent question can be your best study partner. Only 20 to 30 hours study can help

you acquire proficiency in the exam. And during preparing for 1Z0-1151-25 exam you can demonstrate your skills flexibly with your learning experiences.
